SEAT AND BACK CONSTRUCTION

- 11-ply, 1 piece solid molded plywood shell forms the seat and back
- 3" of high density foam covers the seat and 2½" of high density foam covers the back

ARM CONSTRUCTION

BASE AND CASTERS

- Wood base features a standard 5-prong, rigid steel understructure to ensure long life
- Caster posts fit directly into steel sleeves, greatly reducing caster socket failure
- Decorative hardwood caps complement the chair design
- Black, hard double wheel casters, which work on multiple surfaces, are standard
- Black, soft double wheel casters are available for use on hard floors; upcharge applies to this option

FINISH

- Features a catalyzed top coat that resists denting, peeling and reactions to chemicals

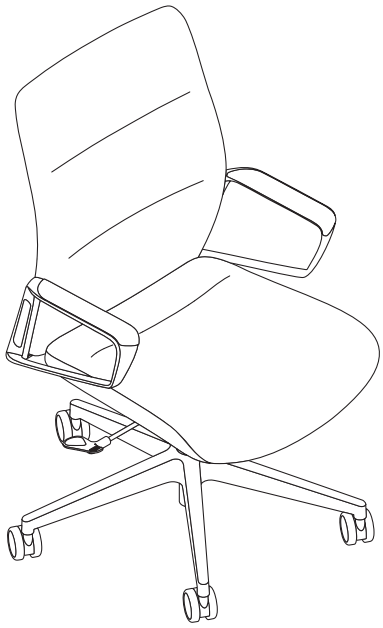
KARID PRODUCT SPECIFICATIONS



BACK CONSTRUCTION

- Back consists of a metal frame with a 1½" thick polyurethane molded foam overlay with horizontal decorative stitching

HEADREST CONSTRUCTION

- Headrest on high back unit has 4¼" thick molded foam

SEAT CONSTRUCTION

- Seat consists of a plywood core panel with a 4" molded polyurethane foam with piping around the seat edge

ARM CONSTRUCTION

- Static arms are aluminum with a polyurethane black arm cap

CONTRASTING TEXTILES

- Contrasting textile available on all models except the 48 hour Quick Delivery

CONTROL MECHANISM—SYNCHRONOUS TILT

- In synchronous one lock tilt, the backrest and seat pan of a chair recline at a different ratio. For every 2" of back recline, the seat angle tilts 1" (2:1 ratio) as you lean back. This minimizes the seat pan rise as you tilt, allowing your feet to remain on the floor while your gaze remains straight ahead
- Tension control allows for greater spring tension control for a firmer or softer tilting motion. Turn knob counterclockwise to decrease. Tension control is important so that a chair can be adjusted to accommodate users of different body types and sizes and for different work styles. It regulates the amount of resistance you feel when leaning back in the chair, and the effort required to recline backwards

HEIGHT ADJUSTMENT

- The pneumatic height adjustment raises or lowers the seat to the desired height
- Seat height should be adjusted to allow your legs to maintain a 90° angle to the floor or footrest. This keeps pressure off the back of your legs, so blood flow isn't restricted
- 5-star swivel base gives 5" of height adjustment and swivels 360°
- Base comes in polished aluminum or black nylon

CASTERS

- Black/polished 65mm, hard dual-wheel casters are standard
- Soft dual-wheel casters are available as an option on configurable task models

WEIGHT RATING

- Standard task seating (seat width less than 22") will accommodate individuals up to 350 lbs. per seat
