Important safety instructions

When using an electrical furnishing, basic precautions should always be followed, including the following:

This furnishing is made for commercial use only.

Read all instructions before using this furnishing:

DANGER

To reduce the risk of electrical shock:

1. Always unplug this furnishing from the electrical outlet before cleaning.

WARNING

To reduce the risk of burns, fire, electric shock, or injury to persons:

1. Unplug from outlet before putting on or taking off parts.
2. Close supervision is necessary when this furnishing is used by, or near children, invalids, or disabled persons.
3. Use the furnishing only for its intended use as described in these instructions.
Do not use attachments not recommended by the manufacturer.
4. Never operate this furnishing if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped in water. Return the furnishing to a service center for examination and repair.
5. Keep the cord away from heated surfaces.
6. Do not use outdoors.
7. Use only SJT 18 AWG cord.
8. Risk of injury. Maximum load 75 pounds.

To reduce the risk of electric shock, this furnishing has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

Note – servicing is only to be performed by an authorized representative.

Servicing of double-insulated products

In a double-insulated product, two systems of insulation are provided instead of grounding. No grounding means is provided on a double-insulated product, nor is a means for grounding to be added to the product. Servicing a double-insulated product requires extreme care and knowledge of the system, and is to be done only by qualified service personnel. Replacement parts for a double-insulated product must be identical to the parts they replace. A double-insulated product is marked with the words “DOUBLE INSULATION” OR “DOUBLE INSULATED”. The symbol (square within a square) is also able to be marked on the product.

Clamp on power

Components:

Power unit

2x Thumb screws

Assembly:

1. Slide unit mount onto edge of surface. **(Figure A)**
2. Tighten thumb screws on underside of the surface. **(Figure B)**
3. Plug in the unit.

Figure A

Figure B

Undersurface mount power

Components:

Tools required:

Phillips screwdriver
Pilot drill bit (optional)

Assembly:

1. With two of the provided screws, attach the mounting bracket to the underside of the surface in the location desired, utilizing the two slotted holes. Do not fully tighten screws. **(Figure A)**
2. Adjust the mounting bracket into its final desired position and drive in the third screw through the remaining hole.
3. Tighten all screws.

Figure A

Undersurface mount power continued

1. Feed unit through the mounting bracket making sure to pass the threaded stud through the hole in the back of the bracket. (**Figure B**)
2. Fix the unit with the provided thumb nut. (**Figure C**)
3. Plug in the unit
