TECHNICAL SPECIFICATIONS

Mechanism

Swivel with Tilt Tension Adjustment & Tilt Lock

The mechanism is constructed of heavy-gauge steel and includes swivel, tension adjustment and tilt lock. Tilt tension knob allows a rocking motion to support movement. Adjustment is controlled via the tension knob located beneath the seat. Seat height lever adjusts with $3\frac{3}{4}$ " of travel, from $18\frac{1}{2}$ " to $22\frac{1}{4}$ ".

Seat

Constructed with $\frac{1}{2}$ " thick plywood, steel frame and polyester fiber batting cushion.

Backrest

High-back with integrated headrest, constructed with $\frac{1}{2}$ " thick plywood, steel frame, polyurethane cut-foam cushion with integrated lumbar contour. Infinite-angle lock provides up to ten locking positions, from upright to a maximum 135 degree full-recline, via the convenient and easy to access adjustment lever.

Base

Injection-molded plastic 5-blade base.

Casters

Casters are 55 mm O.D., hooded, dual-wheel plastic, and are designed for use on both carpet and hard floor.

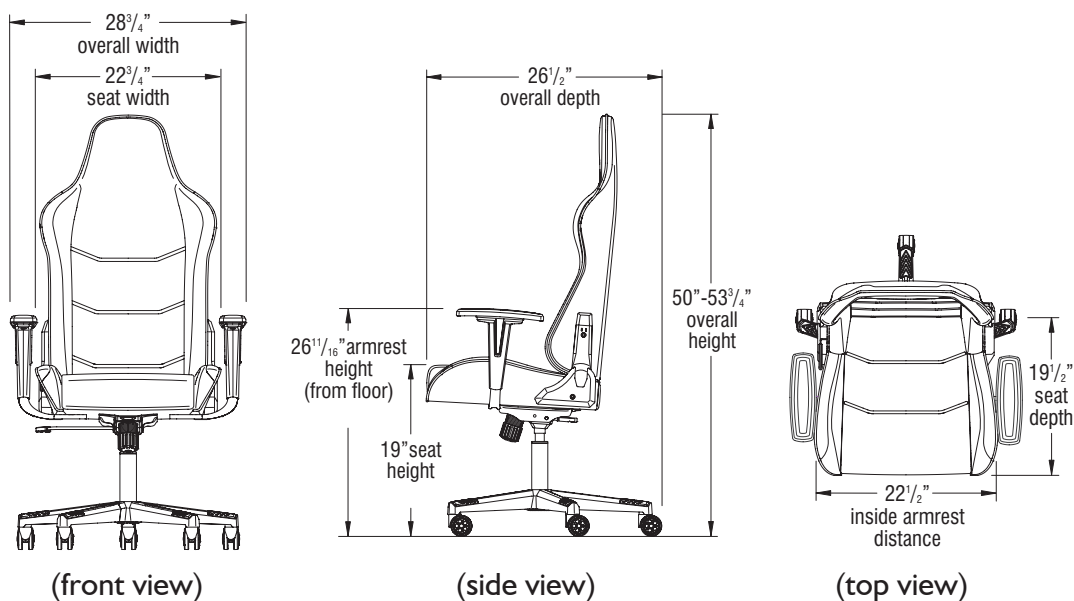

Arms

All chairs include fixed-height non-adjustable arms with steel tube uprights and injection-molded caps. Interior arm width is 22". Top of arms are 8" from seat.
