

Bolia

Acorn Pendant 21 Glass

Design by: 365° North

The components that make up the Acorn Pendant 21 Glass are an oiled oak cap that dangles a shade made of white opal glass hanging from a natural textile cord that is seamlessly integrated into the design. The contrasting materials create a warm/cool interplay that turns luminous when the lights are switched on. Designed by Danish atelier 365° North for Bolia, the different sizes of pendants in this series are even more striking when hung in groups in different sizes.
