Ginza Horizontal Pendant

Design by: Note Design Studio

As if it's suspending little buckets of light, the Ginza Horizontal pendant, designed by Thomas Bernstrand, has the smarts to allow light to flow in all directions given the shades are adjustable. Made of painted aluminum and metal, the fixture is available in black, white and orange. Matt diffusers soften the glow of the illumination as it flows from the fixture's clever cups fitted to an elongated bar. This fixture would look oh-so-smooth over a kitchen island in a modern loft or a sleek bar in a restaurant with a contemporary vibe.
