# Introduction

## A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

### Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

### Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

### The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

## General Information

This book is effective July 1, 2024, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit [www.HermanMiller.com](http://www.HermanMiller.com).

All prices are list prices. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest 1/8". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

### 20-Day or Less/Assigned Lead-Time Shipments

All products and options in this price book not designated by an Assigned Program icon  will ship in **20 business days or less** after being acknowledged by Herman Miller.

Products and options designated by an  are on the assigned lead-time program and may ship in 20 days, less than 20 days, or more than 20 days from order acknowledgement.

# Morse 31.5" Deep Work Table Configuration

NOMSA

## Product Information

### Description

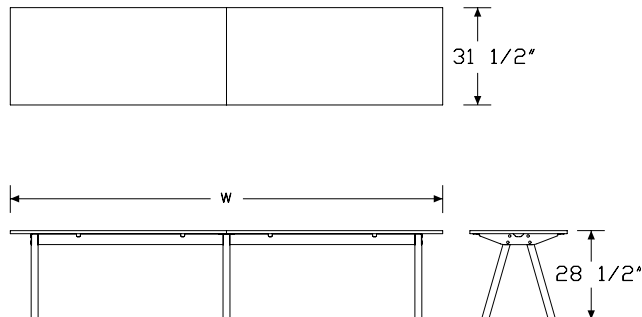

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Dimensional illustration does not contain all configurations.

# Morse Bar Height 31.5" Deep Work Table Configuration

NOMSA

## Product Information

### Description

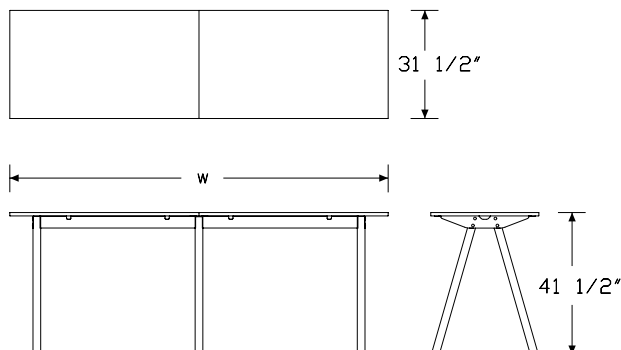

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide 3/4" of leveling adjustment. Product is delivered unassembled.

### Notes

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Dimensional illustration does not contain all configurations.

# Morse 31.5" Deep Work Table      NOMSA

## Section Middle A

### Product Information

#### Description

This table section middle enables creation of longer tables in a Morse Table System build-your-own configuration. It has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

#### Notes

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Depth of table section middle must match depth of other table section elements in build-your-own configuration.

Height of table section middle must match height of other table section elements in build-your-own configuration.

Morse build-your-own table must contain at least 2 section starters (NOMSxSx) or leaf ends (NOMSLFD) and 1 leg set (NOMSLG). Section middles can be used to extend the length of the build-your-own table.

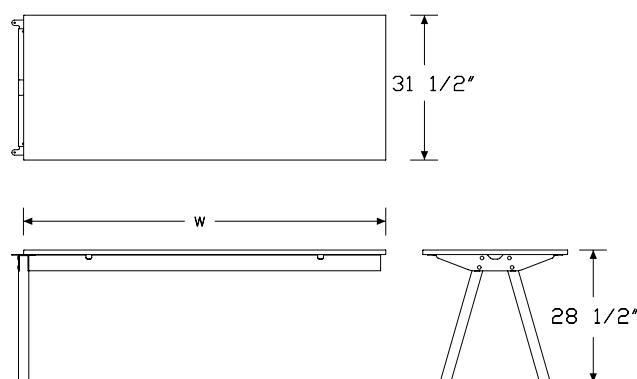

Leaf ends are only available for 55" deep build-your-own tables.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

For further information, reference Morse Planning Guide.

# Morse 31.5" Deep Work Table Section Corner A

NOMSA

## Product Information

### Description

The 90° curve extension offers versatility in tight turns and corner configurations for Morse Table System. It has a laser-cut and folded mild steel underframe finished with polyester powder coat. Legs come in either powder-coated mild steel or solid wood with a clear lacquer finish. Tops are available in a variety of materials and finishes. Fixed-height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

When specified with a cable managed leg (X), standard leg is replaced with a version that has an aperture to guide cable from tabletop to floor. Cable managed leg can be used in any leg position.

Depth of corner section must match depth of other table section elements in build-your-own configuration.

Height of corner section must match height of other table section elements in build-your-own configuration.

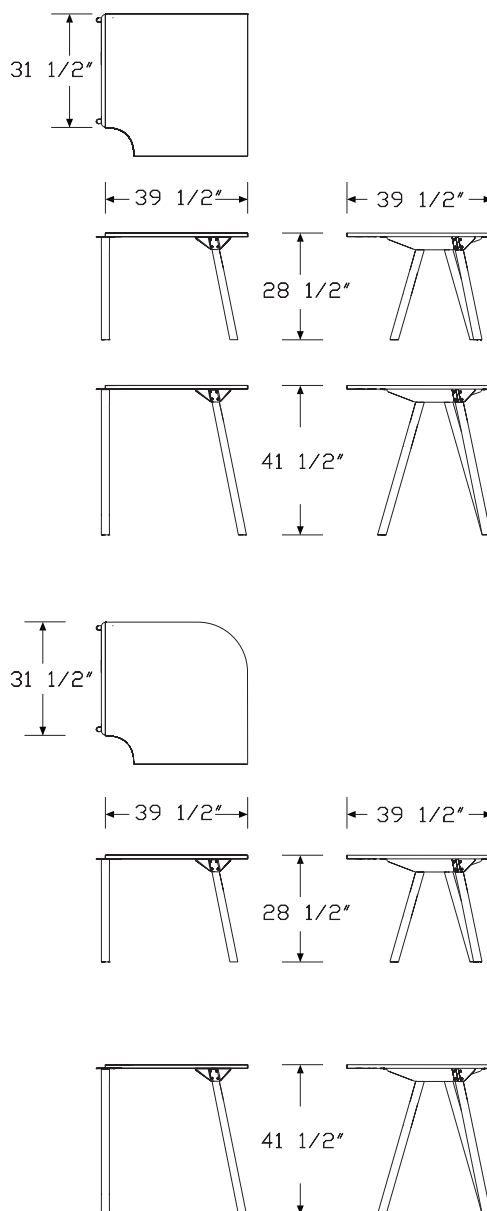

Curve extension cannot be used next to leaf ends (NOMSLFDx).

Curve extensions cannot be used next to another curve extension (NOMSAUX).

Curve extensions must be connected by 2 straight sections (NOMSASx or NOMSAMx) of the same width and height.

Dimensional illustration does not contain all configurations.

# Morse 31.5" Deep Work Table Section Starter A

NOMSA

## Product Information

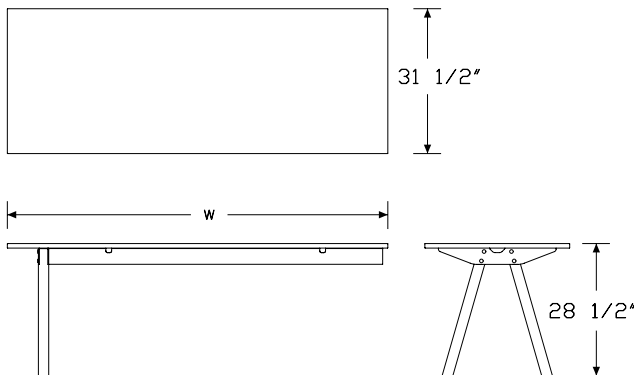

### Description

This table section starter provides a beginning or end to a Morse Table System build-your-own configuration. It has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide 3/4" of leveling adjustment. Product is delivered unassembled.

### Notes

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position. Depth of table section starter must match depth of other table section elements in build-your-own configuration. Height of table section starter must match height of other table section elements in build-your-own configuration. Morse build-your-own table must contain at least 2 section starters or leaf ends (NOMSLFD) and 1 leg set (NOMSLG). Section middles (NOMSxMx) can be used to extend the length of the build-your-own table. Leaf ends are only available for 55" deep build-your-own tables. Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately. Dimensional illustration does not contain all configurations. For further information, reference Morse Planning Guide.

# Morse 39.5" Deep Meeting Table NOMSB

## Product Information

### Description

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

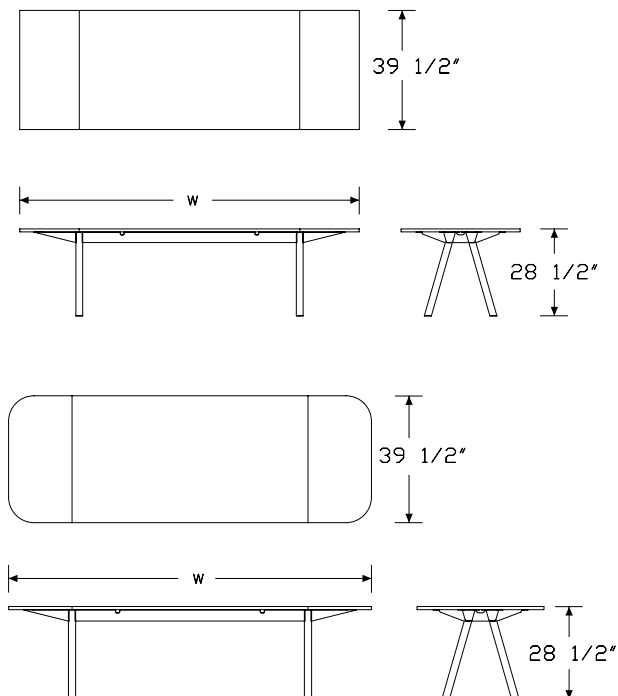

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

When specified with dot power ports, table tops are also provided with a machined accessories channel. This does not apply to rectangular meeting table 2000w x 1000d (20R), which comes with the dot power port only.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

# Morse Bar Height 39.5" Deep Meeting Table

NOMSB

## Product Information

### Description

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

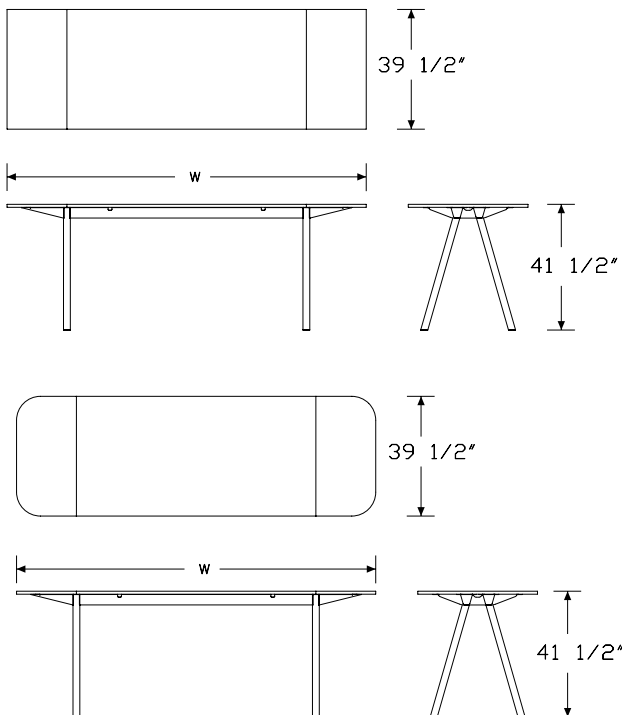

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

When specified with dot power ports, table tops are also provided with a machined accessories channel. This does not apply to bar height rectangular meeting table 2000w x 1000d (20R), which comes with the dot power port only.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

Morse 47" Deep Meeting Table

NOMSC

Product Information

Description

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide 3/4" of leveling adjustment. Product is delivered unassembled.

Notes

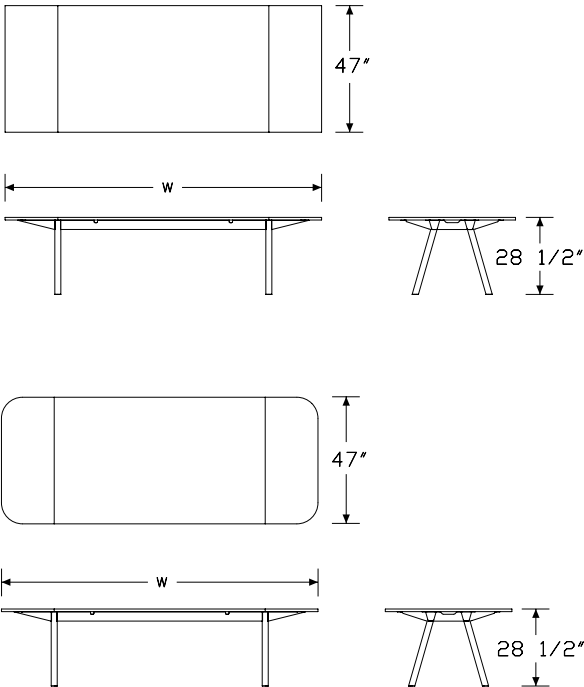

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

When specified with dot power ports, table tops are also provided with a machined accessories channel. This does not apply to rectangular meeting table 2000w x 1200d (20R), which comes with the dot power port only.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

# Morse Bar Height 47" Deep Meeting Table

NOMSC

## Product Information

### Description

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

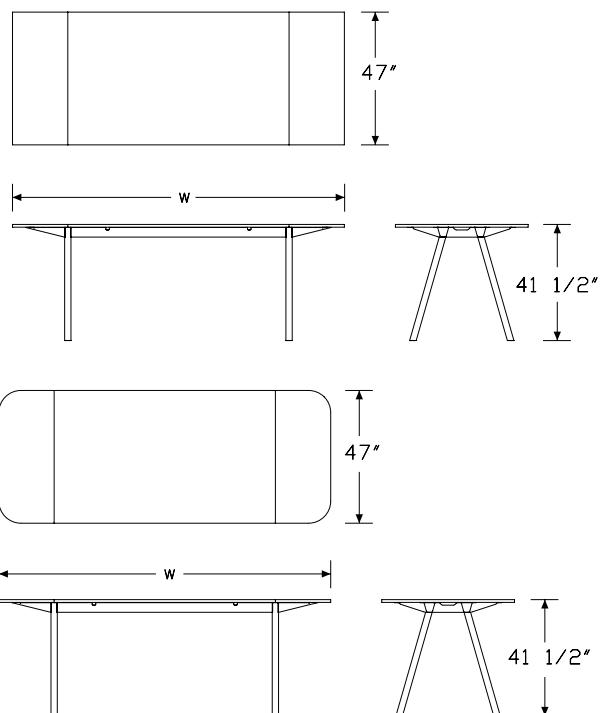

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

When specified with dot power ports, table tops are also provided with a machined accessories channel. This does not apply to bar height rectangular meeting table 2000w x 1200d (20R), which comes with the dot power port only.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

# Morse 55" Deep Work Table

NOMSD

## Product Information

### Description

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide 3/4" of leveling adjustment. Product is delivered unassembled.

### Notes

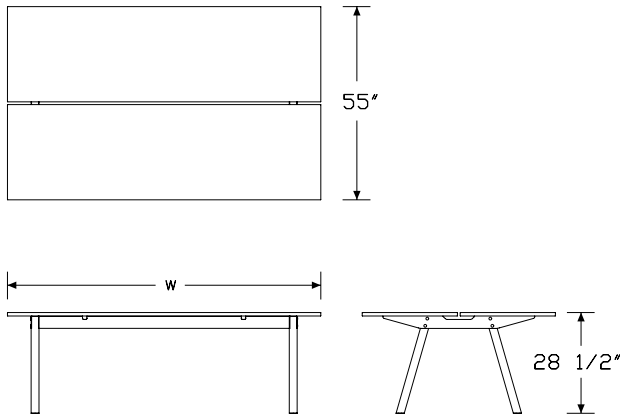

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Table tops are provided with an accessories channel. Morse accessories (NOMA) are ordered separately.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

# Morse Bar Height 55" Deep Work Table

NOMSD

## Product Information

### Description

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide 3/4" of leveling adjustment. Product is delivered unassembled.

### Notes

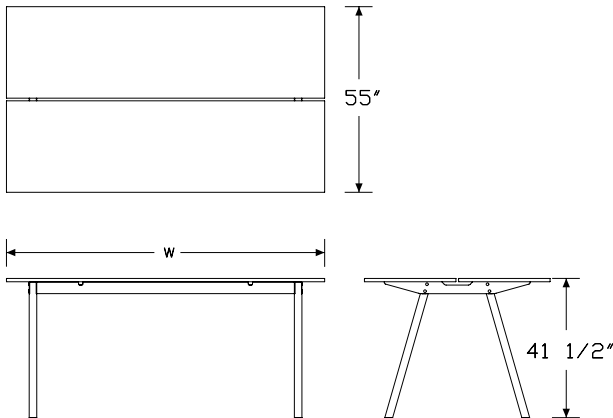

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Table tops are provided with an accessories channel. Morse accessories (NOMA) are ordered separately.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

# Morse 55" Deep Work Table Configuration

NOMSD

## Product Information

### Description

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

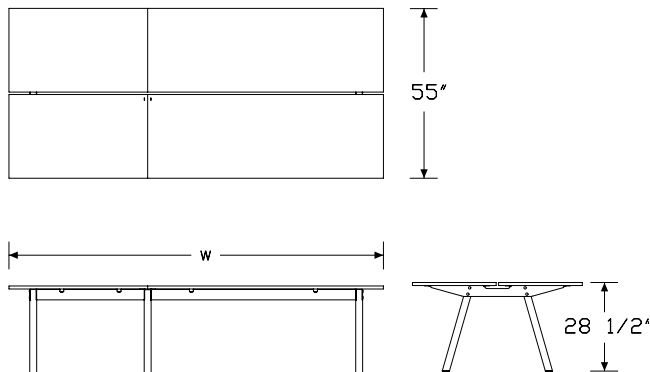

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Table tops are provided with an accessories channel. Morse accessories (NOMA) are ordered separately.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

# Morse Bar Height 55" Deep Work NOMSD Table Configuration

## Product Information

### Description

This table has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide 3/4" of leveling adjustment. Product is delivered unassembled.

### Notes

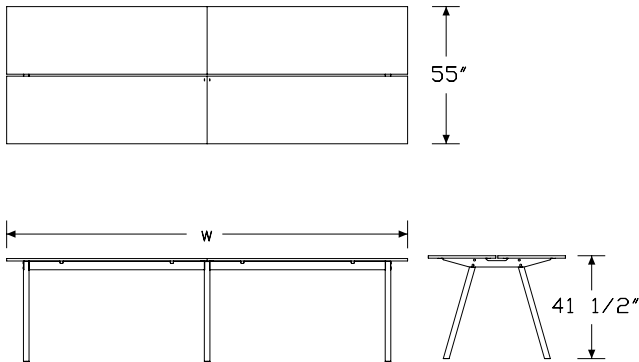

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Table tops are provided with an accessories channel. Morse accessories (NOMA) are ordered separately.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

# Morse 55" Deep Work Table Section Middle D

NOMSD

## Product Information

### Description

This table section middle enables creation of longer tables in a Morse Table System build-your-own configuration. It has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Depth of table section middle must match depth of other table section elements in build-your-own configuration.

Height of table section middle must match height of other table section elements in build-your-own configuration.

Morse build-your-own table must contain at least 2 section starters (NOMSxSx) or leaf ends (NOMSLFD) and 1 leg set (NOMSLG). Section middles can be used to extend the length of the build-your-own table.

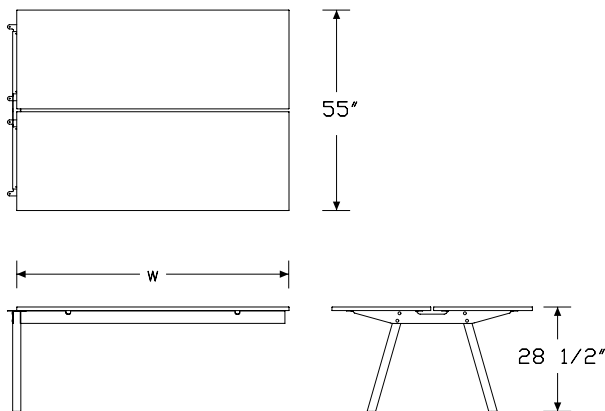

Leaf ends are only available for 55" deep build-your-own tables.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

For further information, reference Morse Planning Guide.

# Morse Bar Height 55" Deep Work Table Section Middle D

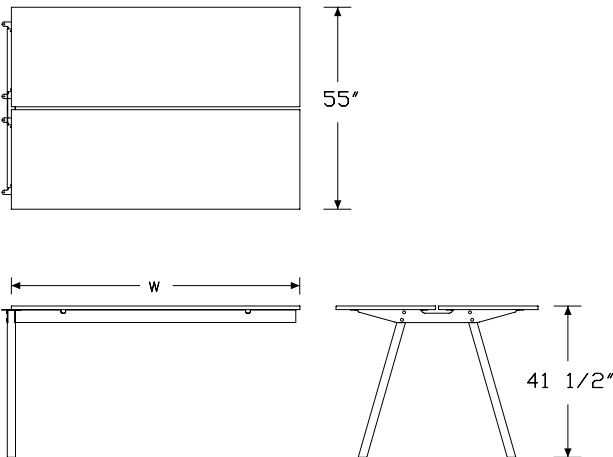

## Product Information

**Description**  
This table section middle enables creation of longer tables in a Morse Table System build-your-own configuration. It has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide 3/4" of leveling adjustment. Product is delivered unassembled.

**Notes**  
When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.  
Depth of table section middle must match depth of other table section elements in build-your-own configuration.  
Height of table section middle must match height of other table section elements in build-your-own configuration.  
Morse build-your-own table must contain at least 2 section starters (NOMSxSx) or leaf ends (NOMSLFD) and 1 leg set (NOMSLG). Section middles can be used to extend the length of the build-your-own table.  
Leaf ends are only available for 55" deep build-your-own tables.  
Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.  
Dimensional illustration does not contain all configurations.  
For further information, reference Morse Planning Guide.

# Morse 55" Deep WorkTable Section Curve D

NOMSD

## Product Information

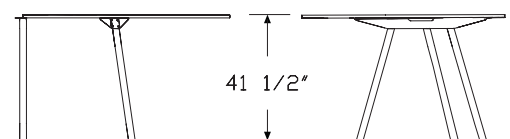

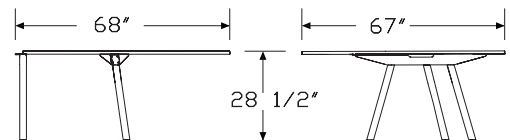

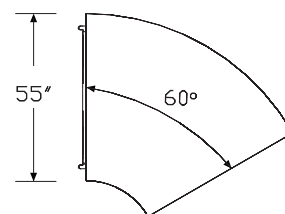

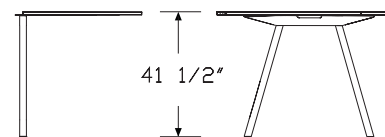

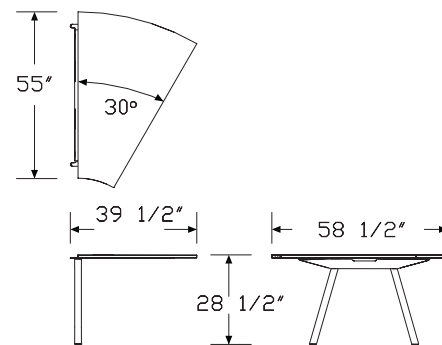

### Description

The 30° and 60° curve extensions seamlessly integrate into a Morse Table System, allowing gentle bends in configurations. They have a laser-cut and folded mild steel underframe finished with polyester powder coat. Legs come in either powder-coated mild steel or solid wood with a clear lacquer finish. Tops are available in a variety of materials and finishes. Fixed-height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

When specified with a cable managed leg (X, Y), standard leg is replaced with a version that has an aperture to guide cable from tabletop to floor. Cable managed leg can be used in any leg position. Depth of corner section must match depth of other table section elements in build-your-own configuration. Height of corner section must match height of other table section elements in build-your-own configuration. Curve extension cannot be used next to leaf ends (NOMSLFDx). Curve extensions cannot be used next to another curve extension (NOMSDUx). Curve extensions must be connected by 2 straight sections (NOMSDSx or NOMSDMx) of the same width and height. Morse power units (NOMSPWRx) which are suited to the dot power ports are ordered separately. Dimensional illustration does not contain all configurations.

# Morse 55" Deep Work Table Section Starter D

## NOMSD

### Product Information

#### Description

This table section starter provides a beginning or end to a Morse Table System build-your-own configuration. It has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

#### Notes

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

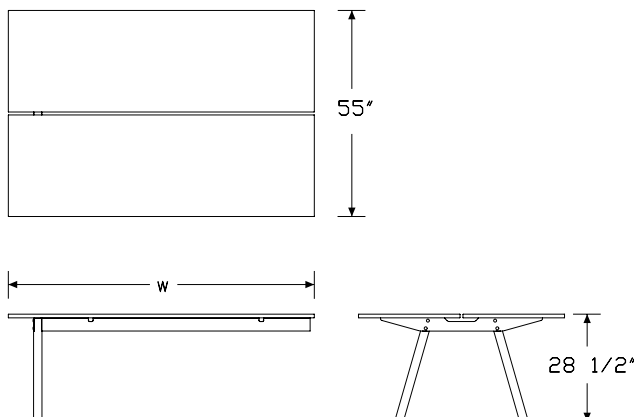

Depth of table section starter must match depth of other table section elements in build-your-own configuration.

Height of table section starter must match height of other table section elements in build-your-own configuration.

Morse build-your-own table must contain at least 2 section starters or leaf ends (NOMSLFD) and 1 leg set (NOMSLG). Section middles (NOMSxMx) can be used to extend the length of the build-your-own table. Leaf ends are only available for 55" deep build-your-own tables. Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations. For further information, reference Morse Planning Guide.

# Morse Bar Height 55" Deep Work Table Section Starter D

## Product Information

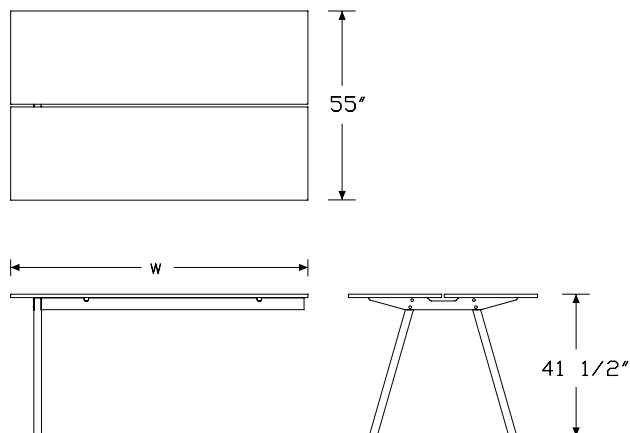

### Description

This table section starter provides a beginning or end to a Morse Table System build-your-own configuration. It has a laser cut and folded mild steel underframe, finished with polyester powder coat. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Tops are available in a variety of materials and finishes. Fixed height legs provide  $\frac{3}{4}$ " of leveling adjustment. Product is delivered unassembled.

### Notes

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.  
 Depth of table section starter must match depth of other table section elements in build-your-own configuration.  
 Height of table section starter must match height of other table section elements in build-your-own configuration.  
 Morse build-your-own table must contain at least 2 section starters or leaf ends (NOMSLFD) and 1 leg set (NOMSLG). Section middles (NOMSxMx) can be used to extend the length of the build-your-own table. Leaf ends are only available for 55" deep build-your-own tables. Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.  
 Dimensional illustration does not contain all configurations.  
 For further information, reference Morse Planning Guide.

Morse 55" Deep Work Table

NOMSL

Section Leaf End D

Product Information

Description

This table section leaf end provides a beginning or end to a Morse Table System build-your-own configuration. It has a laser cut and folded mild steel underframe, finished with polyester powder coat. Tops are available in a variety of materials and finishes. Product is delivered unassembled.

Notes

Depth of table section leaf end must match depth of other table section elements in build-your-own configuration. Leaf ends are only available for 55" deep build-your-own tables.

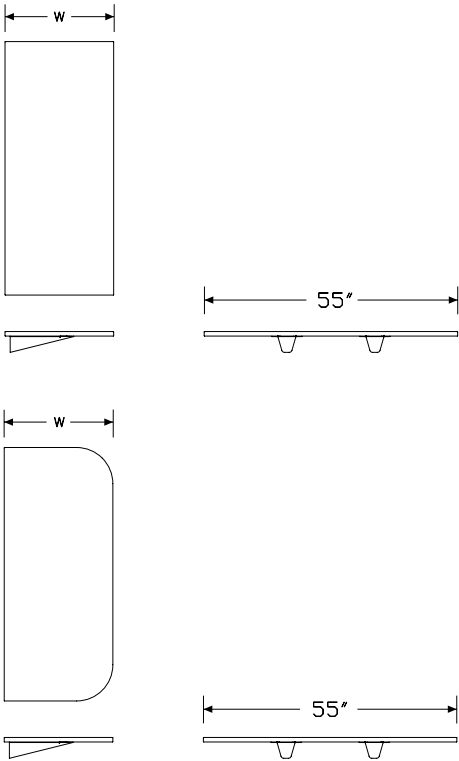

Morse build-your-own table must contain at least 2 section starters (NOMSxSx) or leaf ends and 1 leg set (NOMSLG). Section middles (NOMSxMx) can be used to extend the length of the build-your-own table. Leaf ends are only available for 55" deep build-your-own tables.

Morse power units (NOMSPWR) which are suited to the dot power ports are ordered separately.

Dimensional illustration does not contain all configurations.

For further information, reference Morse Planning Guide.

# Morse Leg Set

NOMSL

## Product Information

### Description

This leg set is required to complete a Morse Table System build-your-own configuration. Legs come in either powder coated mild steel, or solid wood finished in a clear lacquer. Product is delivered unassembled.

### Notes

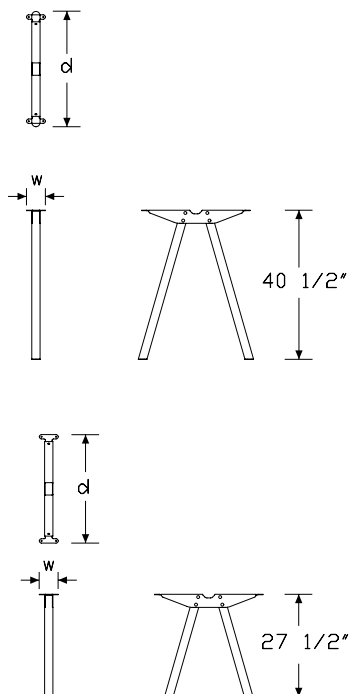

When specified with a cable managed leg, a standard leg is replaced with a version that has an aperture to guide a cable from table top to floor. Cable managed leg can be used in any leg position.

Specify depth and height of leg set to match other elements in build-your-own configuration.

Morse build-your-own table must contain at least 2 section starters (NOMSxSx) or leaf ends (NOMSLFD) and 1 leg set. Section middles (NOMSxMx) can be used to extend the length of the build-your-own table. Leaf ends are only available for 55" deep build-your-own tables. Dimensional illustration does not contain all configurations.

For further information, reference Morse Planning Guide.

# Morse Table System Dot Power Unit

NOMSP

## Product Information

### Description

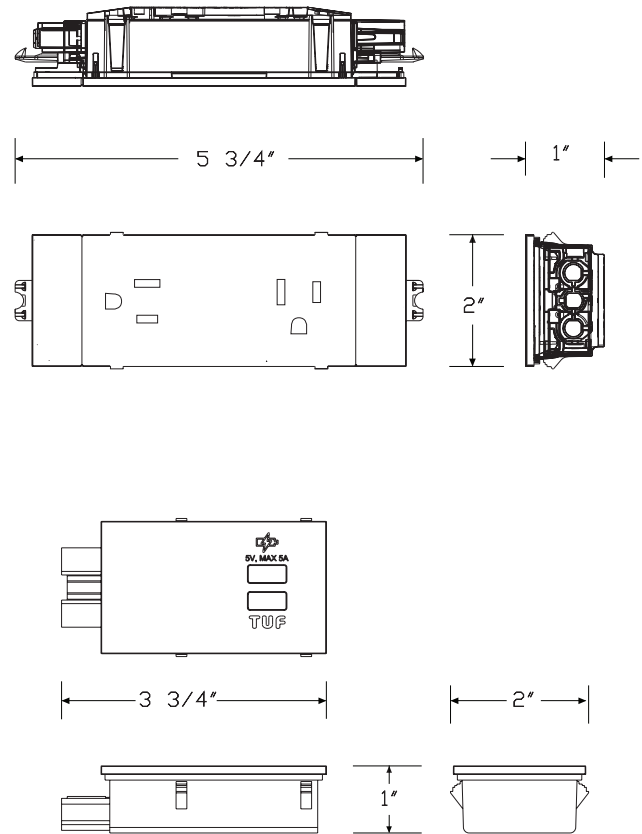

The Morse Dot Power units come in a combination of power and USB power options. The unit is powered using a GST18i3 connector with plug end. Unit is designed to sit neatly under the Morse Table System Dot Power Port and can be snapped directly into the cable trays provided. Power outlets are angled toward users on both sides of the table to allow easier access.

### Notes

Morse Dot Power units are suitable for Morse Table products specified with a Dot Power Port. Unit snaps directly into the cable tray provided underneath the Dot Power Port.

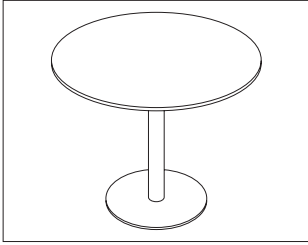

Power unit NOMSPWR40US can also be located in a cable tray in a position that is not under the Dot Power Port to provide power outlets for monitors and other devices that do not require frequent user access.

### Product Information

#### Description

The Pullman desk and desk pod are upholstered over a plywood inner frame topped with high quality foams. Pullman can be upholstered in a single fabric or multiple fabrics. Desk is specified with an upholstered plinth base. Desktop is CNC cut from white or black melamine-faced medium-density fiberboard, oak or walnut veneer, or forbo lino.

#### Notes

Desktop comes with scoop cutout at center rear of unit for mounting monitor arms and power options (ordered separately).

Scoop cutout is 19.7" wide by 2" deep.

MFMDf and veneer desktops are 1" thick.

Forbo lino desktops are 1.08" thick.

Nominal dimensions rounded to the nearest 1/2 inch.
