A Price List Overview
Where do I send my order? How should I maintain my marble table? From textile options to wood polishes, the KnollStudio price list is designed to provide you with everything you need to know in order to understand, specify, and care for furniture in the KnollStudio Collection.

This book is divided into two easy-to-use sections.
- Side Chairs and Lounge Seating
- Tables and Executive Office

For a quick overview of the collection's scope, review the Visual Index on pages 6. If you're looking for pieces by a specific designer, try the Designer Index on page 5.

Leathers, Textiles, and Finishes
Pages 22-23 explains the broad selection of Spinneybeck leathers available for KnollStudio furniture.

Additional upholstery notes and Customer's Own Material (COM) information are available on page 23.

For detailed explanations of the many materials used in constructing KnollStudio furniture, consult page 28. A cross-reference of KnollStudio veneer or lumber finishes with standard Knoll Office veneers is provided on page 27. Easy-care maintenance information is also provided on pages 29-30.

Placing Your KnollStudio Order
For information about where to send your order and key terms and conditions, see page 32.
The complete Knoll Selling Policy is available on pages 682-683.

General Ordering Information and Knoll's Sustainability Statement is available on page 684

Product Information On Each Page
On each page, the following features will assist you:

Description provides both the pattern number and a basic description of the product.

Dimensions provide the overall space the product will require. Statistics are based on the maximum width, depth, and height of the product.

Weight is based on the product itself. It does not include packaging. Weights are rounded to the nearest pound.

Weights of upholstered items do not include weight of textile/leather. To calculate total weight, multiply covering requirements by textile/leather weight, and add to product weight.

Pattern Number provides both the product identification number and all additional selections required for ordering. Finish options are enclosed in parentheses. Finish suffix descriptions are found under Finishes on the bottom portion of the page.

Order Code/Ordering Information outlines exactly how to specify KnollStudio product and the full scope of finishes and other options. The Order Code provides an example of how one pattern number on the page is specified.

Construction provides specific materials and finishes employed, as well as specific construction details.

Textiles and Leather Grades list by price group all KnollTextiles and Spinneybeck Leathers approved for each seating piece. This list is derived through careful examination of the textile or leather's distinctive upholstery characteristics and the form and structure of each piece of furniture. KnollTextiles or Spinneybeck leathers that are not listed have been rejected because Knoll cannot ensure their performance on that product. To view the full range of colorways available for each fabric or leather, consult any Knoll or Spinneybeck representative.

Cal 133 Technical Bulletin
Many KnollStudio products meet California Technical Bulletin 133. Information for specifying these items is on page 24. Applicable upcharge will be listed on the respective price list page.

Intertek Clean Air Certification
Intertek's Clean Air Certification validates the level of volatile organic compound (VOC) emissions from products. VOCs are gases emitted from products and include a variety of chemicals that may affect consumers' health in the short- and long-term. Both Intertek Clean Air GOLD and SILVER certifications ensure the user-health, safety and sustainability of KnollStudio products. A selection of Knoll Office and KnollStudio products are Intertek certified Clean Air, most of which are certified GOLD, which imposes more rigorous standards than certified SILVER.

Note to Knoll Dealer Sellers:
The products contained in this price list are also available through the Knoll Essentials program, with limited exceptions. For additional information, please contact your customer service representative or visit Knoll Exchange.

For More Information
For more information, contact your KnollStudio representative, a Knoll Space reailer or e-tailer, or telephone Customer Services at 800 343-KNOLL. To find the retailer or showroom nearest you, visit www.knoll.com.

For the ultimate in comfort, durability, and prestige, many KnollStudio products can be upholstered in Spinneybeck leathers.

Spinneybeck leathers are made from the top 2% of the world's finest hides, inspected numerous times during production to ensure evenness of grain, surface, color and the absence of scars.

After tanning, all Spinneybeck leathers are drum-dyed, a time-consuming procedure which ensures color penetration throughout the hide. Each hide is then finished in the manner which will best bring out its individual character.

Spinneybeck leathers are all full-grain aniline drum-dyed products imported from Italy.

The following Spinneybeck leathers are approved for application on KnollStudio products. Leathers are grouped into five price categories referred to as "grades." The selection of approved leathers varies by product. Please refer to the pricing page of each product line for more information.

Square footage requirements for Customer's Own Leather (COL) are listed on the left side of the pricing page. Please refer to Upholstery Notes on page 23 and The Knoll Selling Policy on pages 682-683 for further information regarding COL.

For further information call Spinneybeck at 1-800-482-7777.

Textile and Leather Notes
All seating in this price list includes the cost of applied fabric or leather. To simplify ordering, the seating is arranged into specific upholstery grades and priced accordingly. Samples and prices of cut textiles are available on request. For a full list of the Spinneybeck leathers available, see page 21.

Leather
The Natural Qualities of Leather
Natural leather is unique. Because every animal is different, each hide has its own individual color, texture, and life-marks. In fact, our leathers are painstakingly treated to retain their natural appearance and hand. Range marks are not camouflaged. Colors and texture vary, and will do so more with age as the leather mellows and takes on a rich patina.

Spinneybeck Leathers
Spinneybeck offers full-grain Italian leathers.

Spinneybeck features three different tanning processes which preserve the leather. The first is mineral tannage, in which chromium salts are used; the second is vegetable tannage, in which bark tanning is used; and the third is a combination of the first two processes. Each leather is tanned in the manner which will best accentuate its unique characteristics.

Spinneybeck leathers are drum-dyed which tumbles the leather over and over for smooth, even coloring absorbed directly into the leather. This aniline-dying process enhances the natural qualities of leather grain. Many competitors use vat-dying. This does not dye the leather in an even manner.

If you have further questions on Spinneybeck leathers, contact your Knoll representative or telephone Spinneybeck Customer Service at 1-800 482-7777.

Below are additional details on the three major types of Spinneybeck leathers.

Naked Leather (Capri, Copenhagen, Distressed, Maremma, Saddle) Naked leather contains no foreign substances which would affect the superbly soft, mellow hand of this most luxurious of upholstery leathers. Natural markings are accentuated. Since there are no barriers against spillage or staining, naked leathers should be carefully specified. However, scratches and marks will dissipate in time as the leather develops a beautiful patina.

Leathers with Protective Finishes: (Acqua, Alaska, Amazon, Andes, Antique, Derby, Ducale, España, Forte, Hand Tipped, Lucente, Montalcino, Portofino, Riva, Sabrina, Velluto Pelle, Volo)
For high traffic areas, protective finishes allow leather to be not only practical, but easy to maintain.

Grain Sueded Leathers (Ducale Velour, Marissa)
Full grain leathers that have been lightly buffed to raise the nap of the surface are referred to as "grain sueded" leathers. This produces the soft hand of sueded leathers. For maximum soil resistance and durability, these leathers have received an impregnated soil resistance treatment during the drum-dye process which permeates the leather, making it repellent to liquid and dirt.

Textile
Classic Boucle
Classic Boucle is with spun Boucle yarn that is a blend of wool and nylon that is piece dyed. Color can vary from lot-to-lot and it is important to use the same lot for multiple piece orders. Please notate sales order when items must match. Classic Boucle, Pearl contains natural, un-dyed wool and will have darker hairs woven within the textile.

Knoll Upholstery Restrictions
Every Knoll leather and fabric is exhaustively tested on each Knoll upholstered item. This is done in addition to the most extensive program of independent fabric testing in the industry. On furniture, testing ensures precise fit and appearance, without stretch, puddling, telegraphing or other common problems frequently experienced when careful factory pre-qualification is eliminated.

When Knoll suggests that a particular leather or fabric not be used on an object, this does not mean the material is defective in any way; it only implies less than perfect performance with the form and structure of a specific item on furniture.

Instructions for Ordering Nano-Tex
The minimum for Nano-Tex on KnollStudio orders is 1-lot $250 net for up to 70 yards. Nano-Tex orders of 71+ yards is $3.25 net/yard.

Dealer instructions for ordering Nano-Tex:
1) Visit knolltextiles.com/technical documents and open the Nano-Tex specifications to see if the fabric is approved with the finish.
2) If approved, check the seating matrix at knolltextiles.com to see if the fabric alone is approved on the chair. (If yes, proceed to #3).
3) Contact your account manager with the fabric name, treatment required, and name and pattern number of desired chair. They will see if Knoll has tested this fabric with finish/treatment on said chair. In most cases, application testing has not been done and they will contact the appropriate parties to initiate approval and determine leadtime for testing.
4) If approved, book order with a suffix of N (for Nano-Tex) after the fabric pattern number.
5) The fabric grade will remain the same. Add line item for finish/treatment required and multiply the finish cost by the number of yards required.

Customer's Own Material (COM)
Customer's Own Leather (COL)
While Knoll is pleased to cooperate with COM/COL selections, an extra charge is required to help offset receiving and handling costs. Such charges are included under the COM/COL title of the price columns in this price list. Prior to order placement, a sample cutting of actual COM/COL must be submitted to Knoll in East Greenville or through your regional Knoll office for preliminary approval of intended item (8″ x 8″ minimum memo sample if solid; if COM has a repeat, the sample must be large enough to show the repeat).

Even after such preliminary approval, Knoll reserves the right to reject COM/COL, including, if necessary, the item intended for use with COM/COL, if Knoll considers the customer-supplied material inadequate for any reason. When COM/COL is accepted, KnollStudio assumes no responsibility for its appearance, durability, color fastness or any other quality after upholstered on a Knoll product.

Published yardage requirements are based upon Knoll 52″ width material unless specified otherwise. Leather requirements are based on whole hides with a minimum of 50 square feet per hide. However, in some cases, the nature or pattern of COM/COL will require additional yardage/square feet and/or additional labor charges. When this is necessary, the customer will be notified at the same time that the preliminary sample is approved.

If your COM/COL is approved, you may send the required amount for the product to:

Knoll, Inc.
1235 Water St
East Greenville, PA 18041
Attn: Customer Resources

COM/COL must be marked with designated approval number and customer's name.

For additional information, see Customer's Own Material (COM) under Selling Policy on pages 682-683.

Test Objective
California Technical Bulletin 133 (Cal 133) is a full-scale seating test, not a component test. Testing must be performed on the designated seating unit and textile together. Component data alone cannot be used to certify compliance with the regulation. Under Cal 133 you cannot assume that seating or textiles that have passed individually will pass together.

Test Procedure
The seating unit is exposed to a square open flame gas burner for 80 seconds, positioned at the center of the seating unit, two inches from the back and one inch from the seat.

Scope
Cal 133 only applies to seating units. The bulletin is designed for high risk public areas:

Nursing homes
Health care facilities
Public auditoriums
Hotels (more than 10 seating units in one room)
Motels (more than 10 seating units in one room)
Jails and prisons

Tables and desks are not covered by the bulletin. Variations may occur in individual states with regards to specific application. In California only, compliance is at the discretion of the fire marshall in any building which is fully sprinklered.

KnollStudio Approvals
Tested seating units have been tested in a worst case scenario thus covering other fabrics of lighter weight and same construction. When specifying Cal 133, the seating unit may be constructed with a fire resistant foam and a fire blocker will be laminated to the textile.

How To Specify
It is easy to specify Cal 133 on KnollStudio seating. Simply add the suffix "C" to the end of the pattern number prior to the textile selection. Approved textile selections must have the suffix 133 added to the end of the pattern number.

Example: Bertoia side chair, chrome, seat pad in Common Ground/Basalt 420C-C-K-C-K448/12-133

Testing Additional Product
If you would like to test a specific product:

Specify chair and textile desired - adding appropriate C and 133 codes as explained.

Testing lead time will be the standard lead time of the chair plus 4 - 6 weeks for testing procedure.

Test cost will be the regular price of the chair plus $520 for the testing procedures.

All prices below are list.

Intertek Clean Air Certification

Intertek's Clean Air Certification validates the level of volatile organic compound (VOC) emissions from products. VOCs are gases emitted from products and include a variety of chemicals that may affect consumers' health in the short- and long-term. Both Intertek Clean Air GOLD and SILVER certifications ensure the user-health, safety and sustainability of Knoll products. A selection of Knoll Office and Studio products are Intertek certified Clean Air, most of which are certified GOLD, which imposes more rigorous standards than certified SILVER.

Certified Clean Air GOLD

- USGBC LEED credits
- California 01350 Special Environmental Requirements (CDPH).
- California Department of General Service (DGS) Indoor Air Quality Specifications for Open Panel Office Furniture
- Compliant to BIFMA e3 standard credit 7.6.2 and 7.6.3.

KnollStudio Natural Materials
Wood, marble, granite, and slate are natural materials that vary. Use material samples and printed sample materials as reference only. KnollStudio printed and finish samples offer an example of what an "average" natural material may look like, within a range of acceptance carefully delineated by Knoll. Because of the breadth of variations possible with any natural material, Knoll specialists select these materials with stringent criteria, accepting only the top 3 - 5% of what is available.

Wood

Knoll Natural Veneers
All natural finishes are selected from the finest hardwoods available around the world. Veneers are flat cut and carefully matched so that cathedral or heart patterns are perfectly balanced. Natural veneers also are cut to allow a generous margin of quarter-grain figuring ensuring invisible splicing.

Finishes
Most finishes are designed to coordinate with standard Morrison and Reff. For reference, consult the matrix on page 26.

Marble, Granite and Slate
Knoll selects the highest quality, structurally sound marble, granite and slate available, through a host of quarries in the United States, Turkey, Spain, Slovenia and Italy. Because each mountain range and quarry have their own signature, every marble piece - even within a single quarry - is unique. Hues, veins, crystals, fossils, clouds, and distinctive marks will vary from piece to piece. This is the extraordinary character of stone as a material. Its high quality and its unique nature give Knoll tables a feel of incredible sculptural beauty. The following list are the marbles, granites, travertines, and slates that KnollStudio offers:

Coated Marbles
Coated Marbles
Coated marbles have transparent, high-polish, acrylic coating to prevent use-associated stains. Even with this protection, coated marbles should not be used outdoors. Stains should be wiped immediately. Coating will yellow over time.

Satin Coated Marble
Satin coated marbles have transparent satin acrylic coating to prevent use-associated stains. This satin finish gives the stone a natural, honed appearance while providing the same protective qualities as the Coated Marbles. Even with this protection, satin coated marbles should not be used outdoors. Stains should be wiped immediately. Coating will yellow over time.

Arabescato
Ivory white with dark grey veining. May contain random green veins.

Calacatta
Ivory white. Gold and beige random veins with additional veins varying from cream to green and grey.

Carrara
White background with grey veining.

Espresso Marble
Light and dark brown with white and beige veining.

Grey Marble
Grey with black and white veins. Hues vary in tone and intensity.

Grigio Marquina
Dark warm grey with thin black veining and characterized by white linear veins.

Portoro Marble
Deep black background with large striking white and silver veining. Some gold veining may be present.

Rosso Rubino
Rich red with hues that can vary from violet to green with white and green veins. Hues vary in tone and in intensity.

Verde Alpi
Green. Black and white veins. Hues vary in tone and intensity.

Natural Marbles
Natural marbles have a protective sealer to protect the stone from aging and staining. Sealer has to be renewed periodically (see product maintenance on page 29). Natural marbles are not suitable for outdoor use.

Carrara
White background with grey veining.

Calacatta
Ivory white. Gold and beige random veins with additional veins varying from cream to green and grey.

Natural Granites
Natural granites have a sealer to protect the stone from aging and staining. Sealer has to be renewed periodically (see product maintenance on page 30). Because of its non-porous density, granite does not require protective acrylic coatings.

Black Andes Granite
Black with reflective mica crystallines.

Slate
Natural cleft slate is available on SM Tables, and Saarinen Tables.

Please refer to respective product pages for recommended outdoor finish combinations.

Cane
Cane is a natural material that might present slight variations in color and texture. For more detail, visit the Cesca price list pages.

With proper care, your KnollStudio furniture should last for years to come. To help ensure the longevity of your purchase, below are helpful hints on routine cleaning for your KnollStudio piece. Most basic maintenance can be performed with common household cleaning products.

Textiles
See KnollTextiles website for detailed cleaning and care instructions. Wipe all spills immediately. Brush and vacuum every three to four months. Use a foam upholstery cleaner as directed semi-annually, or more frequently if necessary. Try a hidden area to test for color fastness.

Spinneybeck Leathers
Leather is hardy and will adjust to its environment. It mellows gracefully with age. Leather is expected to change; even the oils from our hands help to develop the patina.

Full grain, aniline leather is undemanding. It breathes, has a life of its own, and requires little care. It should not be abused by harsh cleaners, or substances such as wax or mink oils which will clog the pores. A periodic wipe with a damp cloth is a sufficient means of cleaning under normal conditions.

Spinneybeck now offers a leather maintenance kit specifically designed for the 28 quantities offered. The kit includes a cleaner, conditioner and ink-remover and can be ordered by calling 1 800 482-7777. There are three types of kits:
- finished products
- full aniline products
- brush-sueded products

The following guidelines will help you to maintain the beauty of the leather without destroying any of its natural characteristics.

Naked Leather (Capri, Cervo, Copenhagen, Cordovan, Distressed, Prima, Saddle)
Naked leathers contain no foreign substances that act as a barrier against spillage or staining. They should be selected with this in mind.

The only recommended cleaning method for naked leather is to wipe the entire surface with a soft woolen cloth and water. Do not spot rub for it will darken only that area. The idea is to even out any abrasions or stains.

With use, naked leather develops a beautiful patina that removes many small scratches and abrasions as body oils moisturize and revitalize the leather. Substantial body oil marks will also dissipate over time, particularly if rubbed down with cool water.

Protective Finished Leathers (Acqua, Alaska, Amazon, Andes, Antique, Arizona, Derby, Ducale, España, Forte, Hand Tipped, Portofino, Riva, Sabrina, Salon, Torello, Velluto Pelle, Vicenza, Volo)
For high traffic use, breathable protective finish allows leather not only to be practical but also easy to maintain. It can be cleaned by wiping the entire surface with a soft cloth and a very mild solution of Ivory Flakes and cold water, followed by wiping the entire surface with water alone.

Grain Sueded Leather (Ducale Velour, Marissa)
For maximum soil resistance and durability these leathers have received an impregnated soil resistant treatment in the drum which permeates the leather making it repellent to liquid and dirt.

Grain sueded leather can be maintained with moderate care because spillage will bead and roll off. However, spillage should not be allowed to puddle, and should be blotted dry immediately. For normal care, leather should be brushed occasionally, with a sueded cleaning block to help remove general soilage.

If you have further questions about the care and maintenance of Spinneybeck leather, call Spinneybeck Customer Service at 800 482-7777.

Cowhide Slings, Belting Leather
For normal cleaning, use a soft cloth dampened with a solution of mild soap or detergent (Ivory Flakes) well dissolved in water. Rub very lightly, never pressing hard. Do not use solvents because dye may run. For scratches, use liquid shoe polish and buff when dry. Any liquids spilled on leather should be mopped up as soon as possible in order to avoid being absorbed by the leather.

Cane
Use water and glycerin every three months to keep cane from drying out.

Vinyl
Clean frequently with a mild detergent and water. Use leather or plastic cleaners for unusually heavy use. Do not use solvents such as gasoline because plastic surface will gum and deteriorate.

Wood
Clean with a commercial brand of liquid furniture polish twice a month. For stubborn dirt or light scratches, rub lightly with very fine steel wool before using furniture polish. To rejuvenate luster, apply a furniture cream as a last step. Do not use water or household solvents: they will destroy the protective finish.

Lacquer Finishes on Wood (Florence Knoll credenza)
Frequent cleaning recommended: once per week with heavy use or once per month with light use. Clean with ordinary household soaps or detergents, well dissolved in water. Polish with lemon oil using a very soft cloth. For stubborn dirt or light scratches, uniformly apply Cleanbright Liquid Ebony or Guardsman liquid furniture polish with cheesecloth. Allow ten minutes to dry and wipe with a clean, dry cloth. For nicks, chips, and deep scratches, contact a professional refinisher. Never use abrasives.

Teak
Do not apply teak oil if you are using your furniture outdoors. For teak furniture used outdoors, clean with soapy water and allow to dry. Note that teak exposed to the sun will patina to a silvery grey color. For teak furniture used indoors, wipe surface with soft cloth to remove dust. Apply thin layer of teak oil using a paint brush and wipe excess using a soft cloth. Oil can be applied every 3 months to maintain rich color.

Wood Frame Chairs
Clean with dry and soft cloth. Rub smoothly with damp, lukewarm cloth. Treat stubborn stains with household soap solution or a solution with dishwashing liquid. Wipe off with clean, dry cloth. Do not use acid or abrasive detergents.

Marble with Acrylic Coating
Wash with lukewarm water. Wash more thoroughly with Windex, Fantastik, Ivory Flakes in warm water, or other non-abrasive solutions. Rinse with warm water and dry with a soft cloth.

Natural Marbles/Marbles without Acrylic Coating
Cleaning: Wipe off stains and liquid spills immediately with water and soft cloth. Never use steel wool or other abrasives on marble.

Maintenance: The mineral surface of marble is very porous and easily absorbs moisture and fluids causing staining and discoloring. If applied on a yearly basis, impregnators or penetrating sealers protect the interior of the stone, inhibit discoloration and allow the stone to breathe and release water vapor.

To restore a uniform luster, clean surface from any grit or debris, then remove all topical coatings with Stoneguard Stripper. Use Marbalex to rinse surface, then let top dry for twelve hours before applying stone impregnator. Apply SCI Impregnator using a clean and dry applicator brush. After five minutes, wipe off the excess with soft, white terry cloth. If impregnator is absorbed within five minutes apply second coat at least twelve hours later.

Never use steel wool or other abrasives on marble.

Slate
Apply a generous amount of soap solution (1:5) to the table top with a hard brush. Wipe off the top with a clean, damp cloth. Repeat as often as required. Apply mineral oil or lemon oil as needed to protect surface and maintain color.

Granite
Clean with Windex, Fantastik, or other non-abrasive solutions on a regular basis. Apply a marble wax to improve luster and protect finish. Routine maintenance will prevent the stone from darkening with use from body oils, and will help maintain an evenness of color.

Vetro Bianco
Wash surface with lukewarm water. Clean more thoroughly with a non-abrasive solution such as Windex or Fantastik. Rinse with warm water and dry with a soft cloth. Wipe off stains immediately with water and a soft cloth. Never use steel wool or other abrasives on surface.

Glass/Acrylic Polycarbonate
Clean with Windex, Fantastik or other non-abrasive cleaning solutions. Wipe dry with a clean cloth.

Laminate/Melamine
Scrub with Windex, Fantastik, Mr. Clean, or other household soaps or detergents well dissolved in water, or with a very soft cloth dampened with alcohol or a synthetic thinner. For a dull finish, rub with jeweler's rouge as a polishing agent and finish with paste wax. Never use abrasives. Remove stubborn stains with Soft Scrub.

Stainless Steel
Use Windex, Fantastik, or other non-abrasive household cleaners. For small scratches, rub with Comet, Ajax, or other mild abrasives in the direction of the grain. Apply a coat of auto wax to maintain beauty.

Chrome/Satin Chrome
Clean with Windex or an automotive chrome cleaner such as Semi-Chrome twice a month. Apply a coat of hard paste wax to protect against moisture.

Nickel
Clean with Windex, Fantastik, or other non-abrasive cleaning solutions. If discoloration occurs, rub lightly with a fine steel wool to restore luster. Steel wool Grade #0000 is recommended. Touch-up with a clear lacquer to prevent oxidation.

Copper (uncoated)
Polish using a soft cloth and metal polish cream such as BlueMagic®. Do not use harsh abrasive or steel wool.

Polished Aluminum
Clean with Windex, Fantastik, or other non-abrasive cleaning solutions. Coat with a hard paste wax semi-annually to maintain luster and prevent discoloration.

Anodized Aluminum
Clean with mild soaps, detergents, or other non-abrasive cleaning agents. Apply paste wax or DuPont non-abrasive car polish #7 twice a year to prevent oxidation.

For stubborn stains or discolorations, apply navel jelly aluminum cleaner.

Urethane Edge
Clean with household soaps and detergents well dissolved in water. Do not use abrasive cleaning solutions.

Epoxy
Clean with Windex, Fantastik, or other ordinary non-abrasive household soaps, detergents, or ammonia at least once a month to prevent yellowing. For scratches and chips, rub with Comet, Ajax, or other mild abrasives. For deeper scratches, contact Knoll Customer Service for touch-up paint. Shine with a high grade auto polish. Never use harsh abrasives or steel wool.

Rilsan©
Clean with Windex, Fantastik, or other ordinary non-abrasive household soaps or detergents. For ink stains on white surfaces, use Soft Scrub. For scratches and chips, rub with Comet, Ajax, or other mild abrasives. For deeper scratches, use a good grade automotive acrylic-lacquer touch-up paint. Shine with a high grade auto polish. Never use harsh abrasives or steel wool.

Porcelain
Clean with damp cloth using water or Windex. Do not use any abrasive detergent.

Powder Coat Paint
Clean with Windex or Endust using a soft cloth. Remove stubborn stains with Soft Scrub.

Polyester Shell
Clean with Windex or soap and water. Do not use any abrasive detergent.

Plastic Seat Shells
Clean with damp cloth with diluted soap. Wipe dry with clean cloth. Do not use any abrasive or acid detergents.

Cotton Webbing
Use damp cloth to clean. Do not use detergent or soap or any abrasive detergent.

Cotton/Nylon Webbing
Use damp cloth to wipe off stains.

Moving Parts
Lubricate moving parts every six months.

Swivel Mechanism
Apply a paste-type grease to swivel mechanism once a year.

Plastic/Polyethelene
Clean using a soft rag, either dry or wet. When needed, use mild pH-balanced soap diluted in water. Do not use abrasives sponges, acidic products or solvents containing ammonia.

To remove scuff marks, lightly rub scuff mark with a dry, non-scratch scour pad, like Scotch-Brite.

Knoll outdoor furniture is designed to withstand years of normal use with proper care and maintenance. By following the basic precautions below, you can be sure that your furniture will be enjoyed for many years to come.

Cleaning

- Do not use a power washer as a method of cleaning as it may abrade the finish.
- Surfaces, painted frames, fabrics, mesh, and teak should be cleaned regularly with mild soap and water to prevent the build-up of dirt, pollen, mildew, and mold. Harsh abrasives should not be used.
- If furniture is used near the ocean or indoor pool area, rinsing, and wiping down your furniture regularly will prevent the formation of salt and chloride residues, which can corrode finishes.
- It is recommended that towels or other coverings are used to protect vinyl strapping and mesh when body oils, sunscreens, suntan lotions are being used, as some of these products may stain. If diret contact occurs clean promptly.

Sun Protection

- No material is fade-proof under years of exposure to the sun's UV rays and elements. To minimize possible fading, keep products covered when not in use and limit exposure to direct sunlight when possible.

Extreme Weather

- Extreme conditions in summer and winter will cause materials to expand and contract. Always cover furniture when not in use, and when possible, bring indoors during the off-season.
- Do not store product upside down as water could accumulate in the frames causing corrosion and potentially damage, in freezing temperatures.

Note:
The original Maya Lin Coffee Table (85T42) is no longer available and has been replaced by a modified version (85T32). Please note the new dimensions and weight.

Outdoor application note:
With proper care and limited exposure to the elements, Stones tables and seats without seat pads are suitable for outdoor use. Polyethylene stones in all colors can be used outdoors. See pages 28-29.

Note:
The Maya Lin Seat and Coffee Table are certified Clean Air GOLD.

Construction

Molded Polyethylene Stones:
Polyethylene stones have integral color with a light texture and a low gloss finish, available in one color.

Recycled Molded Polyethylene Stones:

Weighted Polyethylene Stones:
Large and small stones in molded poyethylene can be specified with or without weight. For stones with weight, sand is added at the factory. Weight can be adjusted in the field through access on underside of the stones. There is no option for a sand kit if the Stones are ordered without weight. The coffee table can only be specified without weight.

Seat cushions (seats only):
Seat cushions are 2¼″ thick, solid foam piece with tapered edge and fabric or leather zip-lock cover. Seat cushions are fully upholstered on top and bottom. Seat cushions are not attached to Stone.

Construction

Top:
Thick polished plate glass or coated marble with transparent acrylic coating in polished or satin finish to help eliminate use-associated stains. Marble tops arrive with a 1/8″ thick black high density particle board spacer glued underneath the perimeter and rests on the table frame with double sided adhesive.

Note:
Marbles with a coating will yellow over time giving the marble a warmer tone.

Base:
Legs are made of solid steel bars and connected to horizontal steel tube rails using steel connectors.

Substructure:
Larger tables, 2523T and 2524T, include an added cross bar between the rails and feature a tension rod substructure to help support the weight of the marble top. Four steel rods connected to the top corners of the table base converge into a chrome box attached to the cross bar. This hidden structure prevents any deflection of the marble.

Mounting and Application Information

See page 464 for comprehensive mounting, application and construction information.

Mounting and Application Information:

A larger size (e.g., 24″ widescreen) does not necessarily equate to a higher weight monitor. It is key to understand the application to know if a certain size monitor will fit within a space and/or if there are multiple monitors. Also, it is important to note weight limitations vary by application.

Weight Limits:
Weight limitations for individual mounting options are outlined below. Taken together (both the mounting option weight limit and the individual arm limit) you can determine the best mounting approach for your client given the number of monitors they desire to mount and the weight of those monitors. Weight limits are outlined by mounting option on page 468.

Size Limits:

Monitor Size
There is no specific maximum size for a single arm solution (outside the limitations of the space in which you are trying to put it). When mounting two monitors, the maximum outer horizontal width per monitor is 31.8″ for a cockpit solution or 33.9″ for a flat positioning flush next to each other.

Double Cockpit

Double Flat

KEY NOTE: Flat panel monitor manufacturers refer to their products by diagonal screen measurements. So a 19″ widescreen monitor has a 19″ screen measured diagonally, but is not necessarily 19″ in horizontal width (refer to manufacturers specifications for specific overall height and width).

Monitor Mounting:
All Sapper monitor arms are compatible with the international Video Electronics Standard Association (VESA) industry interface standard (75 mm x 75 mm and 100 mm x 100 mm hole patterns or 2.95″ x 2.95″ and 3.94″ x 3.94″) adopted by most panel manufacturers. VESA compliancy is a requirement to mount any monitor to a monitor arm. Please note our monitor plates come standard with both 75 mm x 75 mm and 100 mm x 100 mm holes. If your customer has a recessed monitor back with only 75 mm x 75 mm holes, additional spacers will be needed to ensure proper fit. Contact Customer Service for more details including part and pricing information.

Some larger (over 22″ wide) widescreen monitors now come with the larger VESA standard (200 mm x 100 mm or 200 mm x 200 mm) which can be accommodated by ordering the VESA Plate Adaptors in the price list.

Knoll and its dealers will not take the responsibility for mounting the monitor to the arm. The end user's IT department must confirm VESA mounting compliance and mount the monitor to the arm using customer's own screws. The most common screws are M5 x 8mm and M5 x 10mm.

Please follow installation instructions closely (available in each kit box shipped as well as on Knoll Exchange).

Apple Computer Note:
Apple iMacs are not VESA compliant. To mount an iMac or LED Cinema Display to a Sapper arm requires a customer to purchase a Cinema Display VESA Mount Adapter Kit from Apple. The adapter kit comes standard with a 100 mm x 100 mm hole pattern and can be purchased online at apple.com

Clamp Mounting:

Two-Piece Table Clamp Mounting:

The standard two-piece table clamp is easy to install or retrofit and works on most worksurfaces or desks that are a minimum of 1⅛″ thick solid core. The maximum worksurface thickness is 2¾″. There are four settings to accommodate a range of worksurface thicknesses. For the fourth setting to accommodate the thickest worksurfaces you must invert the lower mounting plate to allow the mount to clamp the maximum 2¾″. It is important to mock up the table clamp, particularly on competitive product to ensure a proper fit. The clamp is not compatible with Morrison Network.

Deep Table Clamp Mounting:

This clamp is one piece and works on most surfaces. The deep table clamp mount is intended to clear most knife-edge (45 degree angle) desks or worksurfaces.

Heavy-Duty Table Clamp Mounting:

This clamp is intended for heavier weight applications. Please note that individual monitor arm weight limitations still apply.

Direct Wall Mast Mounting:

For single monitor mounting, you can use either the direct wall mast mount or direct wall mount. For double monitor mounting, you must use the wall mast mount.

For use on architectural walls only as outlined further on this page. Knoll cannot be held responsible for the structural integrity of a wall so please work with clients to ensure their wall is structurally sound to hold the arm configuration and the monitor weight. See above for weight limits if mounting slat wall to an architectural wall.

Direct Wall Mounting (for both standard and compact arm):

For single monitor mounting, you can use either the direct wall mast mount or direct wall mount. For double or triple monitor mounting, you must use the wall mast mount. The direct wall mount cannot be used for multiple monitors.

Please note that the Compact Arm Direct Wall Mount is specific to the compact arm. You cannot use the standard mount with the compact arm or a standard arm with the compact mount.

For use on architectural walls only as outlined further on this page. Knoll cannot be held responsible for the structural integrity of a wall so please work with clients to ensure their wall is structurally sound to hold the arm configuration and the monitor weight. See above for weight limits if mounting slat wall to an architectural wall.

Sapper 50 Direct Wall Mounting (for Sapper 50 monitor arm):

For single monitor mounting, you can use either the direct wall mast mount or direct wall mount.

Please note that the Sapper 50 Direct Wall Mount is specific to the Sapper 50 arm. You cannot use the standard mount with the Sapper 50 arm or a standard arm with the Sapper 50 mount.

For use on architectural walls only as outlined further on this page. Knoll cannot be held responsible for the structural integrity of a wall so please work with clients to ensure their wall is structurally sound to hold the arm configuration and the monitor weight.

Cable Management:

Monitor Arms
External cable management allows for easy installation and removal of monitors. There are gates under the arm that will contain wires from the monitor to plastic cable management clips that go on the mast to keep wires tidy to the electrical socket.

Adjustment:
The Sapper monitor arm collection offers intuitive adjustment. To adjust the height, you simply manually lift the arm and twist the adjustment knob like a screw up or down the mast to a comfortable setting. The easiest way to lift the monitor is to fold it in before making the adjustment. To adjust the depth, you can move the arm in or out. You can also rotate the monitor 360 degrees for landscape or portrait viewing and adjust the swivel back and forth 180 degrees and tilt up and down 165 degrees. The arm folds in and out from 2⅞″ fully compressed to approximately 17″ when fully extended.

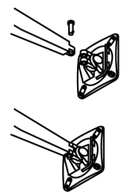
Fast Release:

Monitor Arms
Allows for swift installation and removal of flat panel monitors by merely popping the quick release pin up to remove monitor with movement joint/back plate attached.

Fast Release



Theft Deterrence:
All movement joints come with a set screw within the fast release pin, to prevent fast release if so desired. Also there is a set screw at the top of the mast to deter removal of the entire arm and monitor from the mast.

Deactivate Fast Release with Set Screw

Set Screw to Prevent Arm Removal

Mounting and Application Information

See page 480 for comprehensive mounting, application and construction information.

The movement joint for Sapper XYZ 30 only has one hole pattern and will work only with monitors that have a 100 x 100 mm VESA mounting pattern.

Size Limits:

Monitor Arms
There is no specific maximum size for a Sapper XYZ monitor arm (outside the limitations of the space in which you are trying to put it).

Flat panel monitor manufacturers refer to their products by diagonal screen measurements. So a 19″ widescreen monitor has a 19″ screen measured diagonally, but is not necessarily 19″ in horizontal width (refer to manufacturer's specifications for specific overall height and width).

Monitor Mounting:

All Sapper XYZ monitor arms are compatible with the international Video Electronics Standard Association (VESA) industry interface standard (75 mm x 75 mm and 100 mm x 100 mm hole patterns or 2.95″ x 2.95″ and 3.94″ x 3.94″) adopted by most panel manufacturers. VESA compliancy is a requirement to mount any monitor to a monitor arm. If your customer has a recessed monitor back with only 75 mm x 75 mm holes, additional spacers may be needed to ensure proper fit. Contact Customer Service for more details including part and pricing information.

Knoll movement joints do not ship with screws and are designed to accept an M4 or M5 screw. M5 x 8mm and M5 x 10mm are the most common screw lengths but length is dependent on the specific monitor or television and screw should be tested prior to installation to ensure correct length. Knoll is not responsible for use of incorrect screws.

A VESA plate adaptor may be necessary for larger monitors and televisions and can be ordered separately in the sizes of 100 mm x 200mm (M5 screws), 200mm x 200mm (M6 screws), 300mm x 300mm (M8 screws) and 400mm x 400mm/400mm x 600mm (M8 screws). Adaptors ship with separate installation instructions and may require spacers. Knoll VESA plate adaptors ship with screws to attach the adaptor to the Knoll VESA plate but do not ship with screws to attach the adaptor to the monitor or television (see screw sizes listed above, English size equivalents may be needed instead); screw length is dependent on the specific monitor or television and screw should be tested prior to installation to ensure correct length. Knoll is not responsible for use of incorrect screws.

Knoll and its dealers will not take the responsibility for mounting the monitor to the arm. The end user's IT department must confirm VESA mounting compliance and mount the monitor to the arm using customer's own screws.

Please follow installation instructions closely (available in each kit box shipped as well as on Knoll Exchange).

Apple Computer Note:

Apple iMacs are not VESA compliant. To mount an iMac or LED Cinema Display to a Sapper arm requires a customer to purchase a Cinema Display VESA Mount Adapter Kit from Apple. The adapter kit comes standard with a 100 mm x 100 mm hole pattern and can be purchased online at apple.com.

Clamp Mounting:

Two-Piece Table Clamp Mounting:

The standard two-piece table clamp is easy to install or retrofit and works on most worksurfaces or desks that are a minimum of 1 ⅛″ thick solid core. The maximum worksurface thickness is 2 ¾″. There are four settings to accommodate a range of worksurface thicknesses. It is important to mock up the table clamp, particularly on competitive product to ensure a proper fit. The clamp is not compatible with Morrison Network.

Deep Table Clamp Mounting:

This clamp is one piece and works on most surfaces. The deep table clamp mount is intended to clear most knife-edge (45 degree angle) desks or worksurfaces.

Cable Management:

External cable management allows for easy installation and removal of monitors. There is a cable management block in the channel under the arm that will contain wires from the monitor to plastic cable management clips that go on the post to keep wires tidy to the electrical socket.

Arm Adjustment:

The Sapper XYZ monitor arm collection offers intuitive one touch adjustment. To adjust the height, you simply lift the monitor to the desired position. To adjust the depth, you simply pull or push the monitor in or out. You can also rotate the monitor 360 degrees for landscape or portrait viewing, adjust the swivel back and forth 180 degrees and tilt up and down 153 degrees. The arm folds in and out from 2″ fully compressed to approximately 21″ when fully extended.

Weight Adjustment:

The Sapper XYZ monitor arm is preset for a 10 lb monitor. Other monitor weights up to 20 lbs can be accommodated by adjusting the weight adjustment nut to the proper weight using the Allen key wrench on the back of the movement joint. Note that the 20 lb setting is not visible on the scale. Turn clockwise to decrease weight or counterclockwise to increase weight to appropriate level. The arm should be held in a downward position if increasing the weight and in an upward position if decreasing the weight. When proper weight is set, the arm should stay exactly where you place it.

Fast Release:

Allows for swift installation and removal of flat panel monitors by merely popping the quick release pin up to remove monitor with movement joint/back plate attached. Be sure to lift the arm to the highest position before removing monitor, or the arm will quickly move upwards.

Theft Deterrence:

All movement joints come with a set screw within the fast release pin, to prevent fast release if so desired.

Compatibility:

The Sapper XYZ monitor arm is not compatible with the Sapper Monitor Arm Collection. It has been designed independently and as such, parts from one system cannot be used with the other, with the exception of the movement joint. Finish colors are consistent across the Sapper XYZ and Sapper Monitor Arm Collection portfolios.

Comprehensive installation instructions will be shipped with product and are also available on Knoll Exchange for easy reference.

Construction

COM/COL Approval Procedure
Prior to order placement a sample* of the actual COM/COL must be submitted to Knoll East Greenville, with completed Knoll COM/COL Approval Request Form. Even after such preliminary approval, Knoll reserves the right to reject COM, including, if necessary, the item intended for use with COM, if Knoll considers the customer-supplied material inadequate for any reason. When specifying suede and shrunken cowhide, add 10% to the square footage requirement. When specifying calfskin, add 15% to the square footage requirement.
COM is graded at Life KST base grade and COL is grade U.

*Sample Requirement: 8″ x 8″ minimum memo sample if solid; if COM has a repeat, the sample must be large enough to show the repeat.

Call Customer Service at 800-343-5665 to obtain a copy of the COM/COL Approval Request Form.

Cleaning Note:
Life BSF is cleaning code W, meaning water-based cleaning agents or foam may be used.

Life KST is cleaning code W-S, meaning water-based cleaning agents and foam or mild water-free solvents may be used.

Both BSF and KST can be cleaned with low environmental impact cleaning fluids, including GS-37 certified products.

See KnollTextiles.com for further details on cleaning codes.

Back:
Glass filled nylon frame. Polyester multi-filament yarn with co-polymer polyester elastomeric knit back suspension fabric.

Upholstery toppers:
High density urethane foam material
¾″ foam - back thickness
1 ¾″ foam - seat thickness
2 ¼″ foam - ultra seat thickness

Flexing Seat Pan:
Glass filled nylon seat structure.

Fixed Aluminum Arms:
Aluminum armpost with soft integrally colored self-skinning urethane pad and integrally molded thermoplastic glass-filled nylon support.

Height Adjustable and High Performance Arms:
Aluminum armpost with soft integrally colored self-skinning urethane pad and integrally molded thermoplastic glass-filled nylon support.

Black and Grey Plastic Base:
Glass filled nylon.

Polished and painted matte aluminum base:
Aluminum

Optional Lumbar:
Slow recovery urethane foam with KnollTextiles Vibe fabric cover. Attaches with neodymium magnets in TPU back frame.

Casters:
Nylon 6 hard caster.
Nylon 6 soft caster with urethane overmolding.

Visual impression and scale:
Doesn't dominate the look of the work environment, it complements it. Translucent back, sculpted mechanism and thin profile integrate Life into the landscape. Generous scale and features accommodate all size users.

Synchronized recline with auto-balanced tension:
Utilizes user's body weight for resistance and recline. Allows for constant sightline — no need to refocus. Promotes movement and balance. Preference control accommodates a wider range of users.

Dynamic seat pan with forward flex:
Unique cut-out pattern with ribbed understructure provides dynamic movement and structural stability. Cradles and accommodates ischials (sit bones) without pressure points. Automatic flex responds to user's every move. Flex front automatically supports perching and enables a balanced posture.
Flex front includes waterfall edge (gradual radius at the front edge that does not cause pressure under the knee). Ribs prevent "hammocking" or sagging and allow for easier movement.

Back flex:
The back frame is also a flexible plane like the seat that moves with you as you recline in the chair.

Life Back Suspension Fabric (BSF):
Exclusive elastomeric knit has built in lumbar support and is available in 14 color options. Has a soft feel that is not harsh to skin or clothing.

Arms:
Soft armpads alleviate pressure points. Types available: fixed, height adjustable, high performance (includes height adjustment and armpad positioning). Retrofittable or changeable.

High performance arms:
One-hand operation. Armposts are set toward the rear of the seat for a better fit. Soft armpads float in an orbital motion with locked stops. A great deal of adjustment in a surprisingly slim package.

Optional lumbar attachment:
Made of slow recovery foam, it magnetically attaches anywhere on the Life Back Suspension Fabric (BSF), and is covered in Vibe by KnollTextiles.

Low profile base and casters:
Feet can rest on the base comfortably. Low profile enables easier foot movement. Caster ribs absorb energy, flex and spread the static load for easier rolling.

Controls:
Adjustable from the seated position. Easy, obvious and labeled. Automated where possible.

Environmental:
SMaRT© Sustainable Gold certified.
Life was the first product in the industry to be SMaRT© certified. SMaRT© Consensus Sustainable Product Standard is a comprehensive, transparent, sustainable product standard that measures a product's environmental, economic and social benefits over its life and throughout its global supply chain, from raw materials through reclamation or re-use. Life can contribute to achieving a LEED® Innovation in Design Credit.

BIFMA level® certified BIFMA has established level® as a common framework against which to evaluate the environmental and social responsibility of a variety of products. level® is part of BIFMA's ongoing development of voluntary product and industry standards that support safe, healthy and sustainable workplaces. Warranty:
Life is warranted for 24-hour, 7 days a week, multi shift use: 12 years parts and labor to repair; 3 years seating upholstery, textiles and leathers, and finishes. See Knoll Selling Policy for further details, conditions and exclusions.

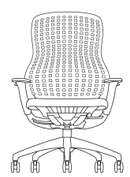
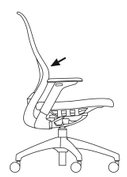
ReGeneration by Knoll® Features and Operating Instructions

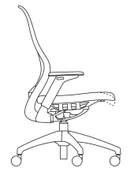
No Adjustment Necessary



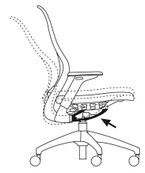
Flex Back Net
Sit back and the Flex Back Net cradles your back, providing integral lumbar support. Optional fully upholstered back provides the additional comfort of foam and fabric over the Flex Back Net.



Slim profile back
The contoured frame provides continuous support, following the curves of your shoulders, back and lumbar.

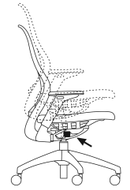


Flex Seat
Sit in any position–forward, sideways or perched–and the Flex Seat supports you with 270° of seat edge flex.

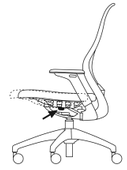


Dynamic Suspension control
The synchronized recline counterbalances your body weight for a smooth and effortless ride. Four independent flexors act as suspension devices that respond to your multidirectional movements–forward, backward and side-to-side.

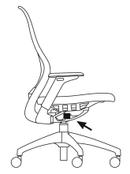
Intuitive Adjustments (Standard)



Seat height
Lift the right lever. Sit down to lower the seat or remove your weight to raise it. Release the lever to lock.

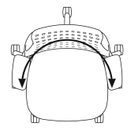


Seat depth
To adjust the seat depth while sitting on the chair, lift the left lever and slide the seat to the desired location. Release the lever to lock.



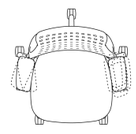
Recline resistance
Sit fully upright. Push the right lever backward for the full range of recline, or pull it forward for upright support.

Performance Options

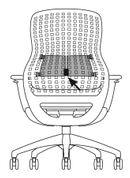


Arm options
Set-back arm supports provide clearance for your legs and feature Continuous Lumbar, so your back is supported when side sitting.

Height adjustable arm
To adjust the height, push the button on the arm. Slide the arm to the desired position and release the button to lock.



High performance arm
To adjust the height, lift the lever on the arm. Slide the arm to the desired position and release the lever to lock. Free float arm pads easily move in width and depth and pivot.



Adjustable lumbar
(Flex Back Net model only)
Grasp the lever at the center of the outer back and slide it to the desired position.

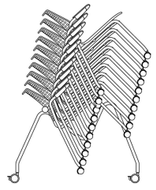
Stacking Instructions

Stacking chairs—with or without fixed arms and with or without casters— stack up to 6 units high on the floor.
Stacked 6 high on the floor measures 41.8” high non-upholstered or 42.6” high upholstered.

To stack chairs, place the rear legs of the top chair in front of
the rear legs of the bottom chair and set the top chair down on the bottom chair.

To transport a stack of chairs, use the MultiGeneration by Knoll dolly.
Stacking chairs stack up to 10 units high on the dolly.
The dolly stacked with 10 non-upholstered stacking chairs measures
53.5” high and with 10 upholstered seat stacking chairs, measures 55” high.



Non-upholstered stacking chairs

Non-upholstered stacking chairs feature bumpers to protect the seat finish of the chair below and prevent chairs from slipping. Do not stack non-upholstered chairs on upholstered chairs, as the bumpers could damage the upholstery of the chair below.

Upholstered stacking chairs

Upholstered stacking chairs feature a stacking shield on the underside of the seat to protect the upholstery of the chair below. Do not stack upholstered chairs on non-upholstered chairs, as the stacking shield could damage the seat finish of the chair below.

Hybrid chairs and stacking chairs with book basket and/or tablet arm

Hybrid chairs and stacking chairs with book basket and/or tablet arm do not stack.

MultiGeneration Stacking Chair Ganging Instructions

The MultiGeneration ganging clip adjoins the back legs of the armless stacking chairs. Contoured Seat

Selling Policy

This Selling Policy supersedes all previous selling policies and is inclusive of Knoll, KnollStudio and Muuto. Prices, discounts and product offerings are subject to change without notice.

Terms & Conditions of Sales

Sales by Knoll, Inc. or Knoll North America Corp. ("Seller") of Knoll Product Lines (hereinafter "Products") within the United States and Canada are made only on the terms which are contained in this Selling Policy. Seller hereby gives notice of its objection to any different or additional terms and conditions. This sale is expressly conditional upon Purchaser's assent to the terms and conditions set forth below. Additional terms and conditions may apply to KnollStudio and KnollTextiles orders. These terms and conditions may be modified or supplemented only by a written document signed by an authorized representative of Seller. These terms and conditions supersede any prior and/or contemporaneous agreements or correspondence between Purchaser and Seller. Written quotations expire thirty (30) days from the date of issuance and can be withdrawn by written notice anytime during that period. Where Purchaser and Seller have entered into the Knoll Electronic Terms and Conditions, all orders, acknowledgements, invoices and other business communications placed or transmitted in accordance with the Knoll Electronic Terms and Conditions shall be deemed to be in writing and signed and shall be valid for all purposes as if they were originated and maintained in documentary form.

Ordering Information

All orders must be in writing. The product pattern number(s) contained on Seller's order acknowledgement shall be the final expression of the order.

Order Confirmation

A purchase order is not binding on Seller until Purchaser has received Seller's order confirmation or acknowledgment.

Pricing Policies

List prices are subject to change without notice.

List prices shall be those prices in effect on the date of receipt of a complete purchase order unless shipment is requested more than ninety (90) days after order entry in which case prices in effect on the date of shipment apply. List prices include specified freight costs. Unless specified in writing by Seller, no other charges are included in Seller's list prices.

Taxes

All sales, use, excise and other taxes applicable to the sale of the Products shall be paid by Purchaser. If Purchaser claims an exemption from any tax, Purchaser shall submit to Seller the appropriate exemption certificates.

Terms of Payment

Payment for one hundred percent (100%) of the net order amount (including any applicable shipping and handling fee) is due within thirty (30) days of the date of invoice, which is generally issued upon shipment. In case of any discrepancies, such as shortages, and Seller is notified in writing within ten (10) days of receipt of Product, only that portion may be deducted and the balance paid. For orders greater than $100,000 net, a fifty percent (50%) deposit is due at the time of order placement, with the remainder due within thirty (30) days of the date of invoice.

KnollStudio orders less than $2,000 require payment for one hundred percent (100%) of the net order amount (including any applicable sales tax and charges for inside delivery, special packaging, etc.), due at time of order placement. For KnollStudio orders greater than $2,000, a one-half (50%) deposit is due at time of order placement with the remainder (including any applicable sales tax and charges for inside delivery, special packaging, etc.) due prior to shipment.

If, in the judgment of Seller, Purchaser's financial condition does not justify the terms of the payment, Seller may require full or partial payment in advance.

Past due accounts shall be charged one and one-half percent (1.5%) per month, or the highest rate permitted by law, whichever is less, and will be added to the outstanding balance. In the event Purchaser defaults on payment, Purchaser shall be liable for all collection costs, including reasonable attorney's fees and costs.

Changes and Cancellation

Standard purchase orders may not be changed or cancelled, in whole or in part, without prior written consent of Seller. Changes may effect delivery dates. Expenses incurred because of changes shall be charged to Purchaser. In the event of cancellations, Purchaser will be liable for reasonable cancellation charges established by Seller. Orders for special Product, orders including "COM" (hereinafter defined) material and orders pursuant to expedited delivery programs, may not be canceled.

QuickShip orders may not be changed or canceled without Knoll's authorization. In the event of Muuto order changes, 25% payment of original net order amount is required for changes incurring the week the order was entered. 100% payment of original net order amount is required for changes incurring the week the order is scheduled to ship. If Muuto is ordered on QuickShip, the QuikShip policy supersedes.

Freight Prepaid

For standard orders, freight is prepaid and included in the price of all Knoll Office and KnollStudio Products, except KnollTextiles and Muuto, within the 48 contiguous United States for orders placed with Knoll, Inc. and within Canada, excluding the Yukon, Northwest Territories, Nunavut and Newfoundland for orders placed with Knoll North America Corp. Packing is tested for rigorous motion and transportation but is not guaranteed to protect furniture from all conditions. If special packaging is required for any reason, please consult with your sales representative or dealer. Seller shall select the method of shipment and routing. Freight for all KnollTextiles orders is prepaid and added to the invoice.

Freight for all Muuto orders must be specified at time of order placement and added to the PO.

Delivery/Freight Charges

Shipments outside the contiguous 48 United States and Canada shall be shipped F.O.B. Origin.

For shipments outside the contiguous United States and Canada, Purchaser is responsible for the cost of freight from point of embarkation, including any handling and transportation charges incidental to loading at the point of departure and unloading at the final destination.

Conditions beyond the control of Seller, including weather, available facilities and traffic conditions, may affect exact time of delivery. Seller shall not be responsible for specific carrier delivery date or time unless it has made a specific delivery commitment, in writing.

Nonstandard methods of shipment and/or additional services are available upon request. Orders for QuickShip product shipping direct parcel or White Glove are subject to additional shipping and handling charges and must be paid by Purchaser. Purchaser will be billed for the differential cost of any special services in excess of standard surface carrier freight costs. Premium charges, at Purchaser's request, will be added for airfreight, exclusive use of vehicle and extra, export or special packaging. Accessorial charges will be added for inside delivery, extra labor, reconsignment and redelivery.

Partial shipments may be made and invoiced by Seller.

Claims

All shipments for Knoll Products within the contiguous United States and Canada are F.O.B. Origin. All risk of loss passes to Purchaser at time of delivery to carrier. Purchaser shall inspect all Products upon receipt and notify Seller within ten (10) working days after receipt of any damage or defects which are, or should be, apparent from an inspection of the Product and its packaging. Failure of Purchaser to notify Seller during the ten (10) working day period shall constitute acceptance of the Products and waiver of any apparent defects, errors or shortages. For all claims relating to Product damaged in transit or for any other claims relating to or arising out of the transportation of the Product, Purchaser must seek recovery from the carrier and Seller has no liability to Purchaser for such claims. Seller may, upon request, assist Purchaser with filing of such claims with the carrier, but Seller will not be liable for any of these transportation related claims.

Seller's Security Interest

Until Seller receives the full payment for the Product, Seller shall have a security interest in the Product. Purchaser agrees to perform all acts, including but not limited to the execution and filing of documentation, which may be necessary to perfect and assure the security interest of Seller.

Returns

The return of Products without a written authorization by Seller shall not be accepted. To receive authorization for Product return, please call Customer Service. All Products that are returned pursuant to a valid authorization shall be subject to a twenty-five percent (25%) of list restocking charge. Products not currently offered for sale by Seller (including COM) shall not be authorized for return. All returned Products must be unused, in original condition and in the original Seller packing cartons. No refund or credit shall be given for damaged Products.

Held Orders/Storage

If Purchaser requests that an order be held or delayed, prices and terms and conditions in effect at the time of shipment shall apply. If Purchaser requests a delay after the time when Seller can defer production, Purchaser will be invoiced for the Product, payable in accordance with standard terms, when the order is ready for shipment. Seller may transfer the Product to storage, in which case all expenses incurred in connection with storage, including demurrage, preparation for storage, storage charges and handling shall be payable by Purchaser upon submission of invoices by Seller. Risk of loss to the Product shall pass to the Purchaser upon delivery of the Product into storage.

Customer's Own Material

A Purchaser who requests a fabric or other surface material not standard to Seller's line of Products ("COM") must submit samples of the requested material to Seller prior to entry of a purchaser order. Seller shall determine if the material is suitable to its manufacturing processes and meets any requirements of Underwriters Laboratories. If the COM is acceptable, Seller will then establish a price for using the COM or the Product in question. For a description of the procedures for submitting samples and testing, contact customer resources or your sales representative. Seller shall have no responsibility for the appearance, condition, performance, durability, colorfastness or any other physical attribute of the COM. Purchaser shall indemnify and hold Seller harmless for any damages, injuries or losses arising out of or related to use of the COM on the Product.

Delay/Force Majeure

Seller shall not be liable for failure to perform or for delay in performance due to fire, flood, strike or other labor difficulty, act of God, act of war or terrorism, act of any governmental authority or of the Purchaser, riot, embargo, fuel or energy shortage, wrecks or delay in transportation, inability to obtain necessary labor, materials or manufacturing facilities from usual sources or failure of suppliers to meet their contractual obligations, or due to any cause beyond its reasonable control. If any such event occurs, Seller may extend delivery dates by a period of time necessary to overcome the effect of such delay, allocate available Product or cancel any purchase order.

Compliance with Law

PURCHASER IS SOLELY RESPONSIBLE FOR COMPLIANCE WITH ALL APPLICABLE FEDERAL, STATE AND LOCAL LAWS, ORDINANCES, REGULATIONS, RULES AND STANDARDS RELATING TO THE INSTALLATION, MAINTENANCE, USE AND OPERATION OF THE PRODUCTS.

Patents

Subject to the following provisions, Seller shall, at its own expense, defend or, at its option, settle any claim, suit or proceeding brought against the Purchaser, and/or its vendees, mediate and immediate, so far as based on an allegation that any Product or any part thereof furnished hereunder constitutes a direct or a contributory infringement of any claim of any patent of the United States or Canada. This obligation shall be effective only if Purchaser shall have made all payments then due hereunder and if Seller is notified promptly in writing and given authority, information and assistance for the defense of said claim, suit or proceeding. Seller shall pay all damages and costs awarded in such suit or proceedings so defended.

The foregoing indemnity does not apply to the following:

- Products supplied according to a design other than that of Seller, and which is required by the Purchaser.
- Combination of the Product with another product not furnished hereunder unless Seller is a contributory infringer.
- Any settlements of a suit or proceeding made without Seller's written consent.

Limitations of Liability

SELLER, ITS CONTRACTORS, AUTHORIZED DEALERS AND SUBCONTRACTORS OR SUPPLIERS OF ANY TIER SHALL NOT BE LIABLE TO PURCHASER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING FROM A BREACH OF THIS AGREEMENT.

Purchaser's remedies set forth herein are exclusive and the liability of Seller with respect to the breach of this agreement or any contract entered into between the parties pursuant hereto shall not exceed the price of the Product or part on which such liability is based.
