TAILORED SOLUTIONS ORDERING INFORMATION

PRODUCT MODIFICATIONS

Modifications include structural and dimensional modifications to existing product and Dual Fabric Applications, when standard model is not available.

The HON Company, at its own discretion, may modify standard products to meet specific needs. Product specials can be requested on HON brand product only.

List prices contained in published list pricers are for standard catalog items only. Changes or alterations to catalog items other than those listed as catalog options are subject to additional charges. Pricing will only be furnished upon approval of the special request.

Requests to have the product produced in more than one fabric (e.g., fabric on the seat is different than the fabric on the back), are considered a Dual Fabric Applications request and follow the Product Modification request process within the Community.

SPECIAL LAMINATES

Special laminates include requests for laminates not available as part of The HON Company's standard offering. Requests for special laminates are subject to manufacturing approval and minimum order quantities. The HON Company approved special laminates will be subject to a designated upcharge per unit.

Requests for special laminates should be submitted through the Community. Pricing will only be furnished upon approval of the special request.

SPECIAL PAINTS

- The HON Company's paint matching equipment can match almost any color, excluding some metallic and whites.
- Special paint requests must be submitted on the Community.
- In order to request a paint sample, the customer must have a minimum order of 10 like product units. Any requests with less than that amount will not be processed.
 - For each new paint request, there will be a \$250 net charge. A sample of the exact color desired is required for matching and approval. The HON Company will match the color and provide a production sample for the customer to review and approve.

- Once written approval is received by The HON Company, the request will be approved.
- Each unique color or finish combination incurs a designated upcharge per color per order (all standard discounts/competitive project pricing applies).

Special note: Some special colors could fall outside of this program due to production costs or not meeting The HON Company's quality standards. The HON Company may apply additional charges to some colors which are costly to apply, and refuse some orders on colors that cannot meet The HON Company's high-quality standards. The HON Company will notify the customer upon completion of The HON Company's evaluation if a change in price is required or rejection of the order.

DISCONTINUED PRODUCT

Requests for discontinued product require engineering evaluation, safety review, and testing to current standards prior to approval. Many discontinued products are not available for order. Requests for discontinued products should be submitted through the Community.

LEAD TIMES FOR SPECIALS PRODUCT

Lead times on orders containing specials are subject to production capacity and material availability. When possible, the customer should order special products separately to avoid extended lead times for standard products. Extended lead times will be noted on Compass.

CHANGES TO SPECIALS PRODUCT

A special model will be provided for each approved special item to process orders. Once an order is placed, no changes or cancellations can be made to the order without approval from Tailored Solutions.

CUSTOMER'S OWN MATERIAL ORDERING INFORMATION

CUSTOMER'S OWN MATERIAL (COM) PROGRAM

Customer's Own Material (COM) is a request to use fabrics not available as part of HON's standard fabric offering. Manufacture to Supply (MTS) and Dealer to Supply (DTS) are the two ordering methods. The HON Company has partnered with fabric manufacturers to provide competitive pricing and selection through the MTS program. MTS will be the standard offering unless The HON Company is unable to procure the fabric. If there is a DTS request submitted, The HON Company will advise at the time of the request if DTS is available.

CUSTOMER WARRANTY EXCLUSION

The HON Company shall have no responsibility for the condition, quality, value, performance, physical properties, or any other aspects of the COM.

The HON Company shall have no liability for any damages, injuries, or losses to the customer or to any third party that shall be caused by any COM or product modification, and the customer shall hold The HON Company harmless for all liability.

The HON Company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality of the COM or product modification after its application on a HON product beyond normal quality standards. The HON Company reserves the right to reject a COM fabric if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation of the issue.

The HON Company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to The HON Company from the COM supplier. The HON Company is not responsible for excess yardage created by DTS orders or yardage not attached to an order and reserves the right to dispose of the excess fabric.

As a standard HON does not pattern match any standard, partnership or COM fabric, therefore pattern match is not applicable under warranty. If pattern match is needed please submit a Tailored Solutions request or contact HON Customer Support/Tailored Solutions once your COM has been approved.

COM TESTING

As a result of recent legal requirements, The HON Company will need to obtain specific information from the fabric supplier about treatments and chemicals used in the fabric. To the extent the supplier is unwilling or unable to provide the necessary information, which could extend the testing lead time of the request.

To check if a COM has been tested previously, utilize the COM Search Tool on the Website > Design Resources > Textiles & Finishes section using the following information:

- COM Supplier's Name
- Fabric Pattern Name
- Color Name
- If the COM fabric has been tested and previously approved, the COM will not need to be re-tested unless testing standards have changed, fabric is to be used on a different series, or direction of the fabric has changed from what was previously approved. Please note that Panel product must be approved for each model and color.
- If the pattern has previously been tested and approved, but not in the specific requested color, the customer will need to request an order code for that color only. No further testing will be necessary since the pattern has already been approved.

If the fabric has not previously been tested, the customer must enter the COM request on the Website > Textiles & Finishes > COM Search Tool.

Complete the Supplier Name, Pattern, and Color drop-down fields. For quicker results in these fields, type the first letter of the (supplier, pattern, color) name and, when done, click Add and then Submit. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.)

An email will be sent to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: submitted, in testing, testing materials requested, and final approval/denial with price grade and fabric code. The testing process takes approximately 48 hours.

COM yardage in the pricer is shown as pattern cut only.

COM TESTING — FLAMMABILITY TESTING INFORMATION

The customer is responsible for ensuring that the COM fabric is certified to meet all flame-retardant requirements. All COM seating fabric must, at minimum, meet CAL 117 requirements. If the customer requires the chair be tested to meet the fire safety standards of CAL 133, additional testing and information is required.

MTS COM

As previously mentioned, MTS is the primary COM method.

If the COM fabric has not been tested, a COM request must be submitted on the Website.

For MTS orders, The HON Company will procure fabric needed for production. Should The HON Company not be able to obtain fabric yardage, the customer will be contacted.

CUSTOMER'S OWN MATERIAL ORDERING INFORMATION

When testing has been completed, the customer will be notified by the COM team of the test results. If the COM is approved, The HON Company will provide a COM tracking order code for MTS. That tracking code is required on the order in place of the standard fabric code.

If approved, MTS product will be assigned an appropriate fabric grade for pricing. The pricing can be found on the Website > Design Resources > Textiles & Finishes. (All standard discounts/competitive project pricing applies).

Written COM price quotes are valid for 90 days after the issue date.

DTS COM

DTS COM is only available if the COM fabric cannot be procured by The HON Company. If the fabric can be procured by The HON Company, the customer will be contacted to switch to MTS or cancel the request.

If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Complete the Supplier Name, Pattern, and Color drop-down fields. For quicker results in these fields, type the first letter of the (supplier, pattern, color) name and, when done, click Add and then Submit. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.)

An email will be sent to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: submitted, in testing, testing materials requested, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.

If the COM has not been tested, a COM request must be submitted on the Website > Design Resources > Textiles & Finishes.

When testing has been completed, the customer will be notified by the COM team of the test results. If the COM is approved, The HON Company will provide a COM tracking order code. That tracking code is required on the order in the place of the standard fabric code.

DTS product is priced at the following grades (all standard discounts/competitive project pricing applies):

- Chairs are a Grade 4
- Panel product is a Grade D

Written COM price quotes are valid for 90 days after the issue date.

COM LEAD TIME

Ship dates will be based on fabric receipt and The HON Company's standard lead time. All fabric must be properly tagged and shipped to the appropriate producing location (provided in the approval email).

- Specific to DTS orders, COM orders will not receive a ship (acknowledged) date until The HON Company has the fabric in its possession for production.
- Specific to DTS orders, the customer may send the required yardage for the order to the address listed on the approval email to arrive no sooner than 4 weeks in advance of the acknowledgment date.

HON will make every effort to locate mis-directed COM shipments on behalf of the customer. However, The HON Company will not be responsible for any COM received without a tracking number or incorrectly shipped by the fabric vendor to an incorrect producing facility.

COM ORDERING INFORMATION

The following information must appear on or accompany the product purchase order:

- Approval tracking number and the customer's purchase order number
- COM supplier, pattern, and color name/number

The packing list for the COM must include the following information when The HON Company receives the shipment for production:

- Dealer or Wholesaler Name
- Purchase order number submitted to The HON Company
- Fabric name
- Yardage shipped
- Approval ordering code

Specific to DTS orders; the customer should send only the amount needed for the order. Excess yardage or yardage not tied to an order will be disposed of at The HON Company.

CHANGES TO COM PRODUCT

Once a COM product is ordered, no changes or cancellations can be made to the COM product without approval from the HON COM team.

HON BRANDED, PARTNERSHIP AND COM PATTERN MATCH

- Pattern matching provides alignment of patterns or stripes across individual chair surfaces. Additional yardage may be required depending on pattern repeat. If Pattern Match is needed, please contact HON Customer Support/Tailored Solutions.
- Chair to Chair Pattern Match provides identical pattern alignment from unit to unit and is available with an upcharge. Chair to Chair Pattern Match is reviewed on a case by case basis as several factors are reviewed to determine additional yardage required, including repeat and pattern direction. If Chair to Chair Pattern Match is needed, please contact HON Customer Support/Tailored Solutions.

The HON Company has established paint grades to allow customers flexibility and ease in doing business with HON. HON has three paint grades P1, P2, and P3.

P1 PAINT COLORS

HON has established P1 paints which are available on a majority of core products.

P2 PAINT COLORS

Please see individual pricer pages for eligible series and upcharges for P2 paints. P2 paints are listed in the pricer pages under the column P2. Upcharges vary by product (all standard discounts/competitive project pricing applies). No minimum quantity required.

P3 PAINT COLORS

Please see individual pricer pages for eligible series and upcharges for P3 paints. P3 paints are listed in the pricer pages under the column P3. Upcharges vary by product (all standard discounts/competitive project pricing applies). No minimum quantity required.

SPECIAL PAINT COLORS (P4-P6)

With The HON Company's state of the art color matching equipment just about any color can be matched, excluding some metallic and whites. A sample of the exact color desired is required for matching and approval.

- For each newly requested paint, a net fee of \$250 will be charged to cover costs associated with the matching process.
- For existing, previously matched paints, there is no matching fee, however there is a \$100 net fee for sample panels required for the approval process. Refer to MyProjects on the HON Portal for a list of approved special paints.

For all special paint requests, HON will send a production sample for the customer to review and approve. Once the signed paint sample is received at HON the order can be entered. Upcharges vary by product (all standard discounts/competitive project pricing applies). A quantity of 10 like-model minimum order is required for special paints. For complete program details, access Tailored Solutions on the Website at hon.com.

Some special colors could fall outside of this program due to production costs or not meeting HON quality standards. The HON Company may apply additional charges to some colors which are costly to apply, and deny some orders on colors that cannot meet our high-quality standards. We will notify the customer upon completion of our evaluation if a change in price is required or if the request is denied.

HON OPEN LINE LAMINATE PROGRAM

The Open Line Laminate (OLL) program makes it even easier for a customer to tailor their HON product for a custom look. Select HON furniture products accommodate hundreds of graded-in high-pressure laminates (HPL) from the leading laminate manufacturers' open lines.

Laminates that are currently available in the program can be viewed in specification tools.

Requests to add laminates to the standard specials program can be submitted through the CET Specials Integration tool as well as Community.

Matching edge options are not available offered for laminates in the OLL program. When selecting a laminate please select an edge option from the HON standard offering. If a matching edge is required a modification request can be submitted through the CET Specials Integration tool as well as Community.

The OLL program is available with the following HON products and series:

- Abound® Hard-Surface Tiles
- Birk™ Tables
- Build™ Tables
- Coordinate™ Worksurfaces
- Gallery Panels
- Huddle Tables
- Preside® Tops
- Sculpt™/Occasional Tables
- SmartLink® Value Teacher Desk
- Systems Worksurfaces
- Tangram™

ENVIRONMENTAL STATEMENT

We continually reevaluate our purpose and processes, from fostering transparency and circularity in our supply chain to empowering our members to do and be better. We do it so the environments you create will be safer, more socially responsible, and more sustainable.

We've pursued product certifications to help communicate our commitment to developing sustainable products.

Clearing the air.

In 2006, The HON Company became one of the first office furniture manufacturer to have products certified under the Indoor Advantage™ program. Virtually all manufactured products emit chemical compounds into the air. Indoor Advantage™ certification helps assure customers that certified products will help improve the air quality within their offices and workspaces.

Developed by SCS Global Services, Indoor Advantage™ evaluates products against indoor air quality standards, like ANSI/BIFMA Furniture Emissions Standard, M7.1/X7.1 and CDPH Standard Method v1.1. The ANSI/BIFMA X7.1 standard allows manufacturers to test individual components, as well as complete products for emissions from volatile organic compounds (VOCs). This allows us to identify problematic materials and phase them out of our products.

Indoor Advantage™ certified products meet the LEED and WELL criteria for low-emitting materials.

Indoor Advantage™ offers two levels of certification, including Indoor Advantage™ and Indoor Advantage™ Gold.

On the LEVEL®.

LEVEL®, the certification program for the BIFMA e3 Sustainability Standard, was developed in response to increasing demand for proof that manufacturers were living up to their environmental claims. LEVEL® is a multi-attribute sustainability certification label for products that have met criteria in four categories of impact: Materials, Energy and Atmosphere, Human and Ecosystem Health, and Social Responsibility.

HON's products are certified to LEVEL 2 and LEVEL 3, the highest achievement. BIFMA LEVEL 2 and LEVEL 3 certified products can contribute to LEED and WELL projects.

Evaluating Our Impacts.

HON has begun studying the impacts our products have on the environment through lifecycle assessments and creating Environmental Product Declarations (EPDs). EPDs provide an understandable report of a product's environmental impact throughout its life cycle; including raw material extraction and processing, product assembly, distribution and use, and end-of-life.

Products that meet these specifications are identified throughout this publication with the following icons:

INTERLINK IQ ELECTRICAL

Specification guide for IQ Electrical on Huddle tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

Top Width	POWER ONE (1) PER TABLE 3" ROUND POWER GROMMET		POWER TWO (2) PER TABLE 3" ROUND POWER GROMMETS		POWER ONE (1) PER TABLE 4x8 POP-UP PORT

NOTES:

- Interlink IQ Electrical is a pluggable, single circuit electrical system.
- All electrical models include wire management clips and hardware.
- Interlink IQ Electrical is non-sequential/non-directional. It can be installed in any direction.
- Interlink IQ Electrical is UL Recognized as a Powered Table System and meets the requirements of UL 962.
- For compatible Interlink IQ Electrical solutions, see page 244.

⚠ 40' maximum run, or no more than 8 units, whichever comes first. Interlink IQ system will automatically shut off if maximum requirements are exceeded. Maximum run is based upon electrical harness width, not table width.

4-TRAC HARDWIRE ELECTRICAL SYSTEM

4-Trac Electrical System

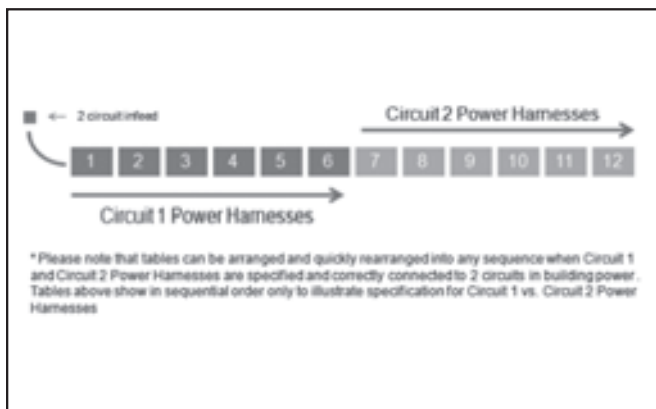

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together
- For compatible 4-Trac Electrical solutions, see page 246.

Steps for Electrical Specifications:

- Determine how many rows of tables are needed and order the following:
 - One HMAPLATE per row (or power in-feed)
 - One HMACABLE per row (or power in-feed)
- Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HMAPOWER60 and two sets of HMAPOWER602)
- Order one set of ganging hardware per table (ex. HMAGANG)
- Determine which accessories are needed:
 - Power Hub model HGRMTAC — to access power at worksurface.
 - Data Grommet model HGRMTDATA — to access data at worksurface.
 - Wire Management strips model HBTMS — for vertical and horizontal wire management.

4-TRAC HARDWIRE ELECTRICAL SYSTEM

4-Trac Electrical System

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together
- For compatible 4-Trac Electrical solutions, see page 246.

Steps for Electrical Specifications:

- Determine how many rows of tables are needed and order the following:
 - One HMAPLATE per row (or power in-feed)
 - One HMAPOWER482 per row (or power in-feed)
- Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HMAPOWER60 and two sets of HMAPOWER602)
- Order one set of ganging hardware per table (ex. HMAGANG)
- Determine which accessories are needed:
 - Power Hub model HGRMTAC — to access power at worksurface.
 - Data Grommet model HGRMTDATA — to access data at worksurface.
 - Wire Management strips model HBTMS — for vertical and horizontal wire management.

PRESIDE® SPECIFYING INFORMATION

Specify Preside tables with two steps—select a top and select a base.

1. Select desired top size, shape, and edge profile.

Multi-piece Tops:

Multi-piece tops are made of 108", 120", 144" and 168" two-piece "starter-sections" in rectangle, boat, arc end, or racetrack shapes in 42", 48", or 54" depths. For tables up to 20', models are preconfigured for you. If you need a table top longer than 20', add as many 72" adder sections as you need. The examples below illustrate preconfigured sizes as well as how starter section and adder section tops can be used to create tables in virtually any length. **Please note that 2-piece tops, in woodgrain colors, will not have exact grain alignment in the center where the two halves meet, a reasonable match can be expected. For tops utilizing an adder section, there will not be a grain match for those pieces.**

2. Select desired base style and identify model that coincides with top length.

Bases for Tops in Preconfigured Sizes

Bases include the appropriate number of supports for tables up to 20'. Simply identify the length of the table top in inches and specify the base with the same length in the model number. The example below illustrates how to select a base for a preconfigured size top.

Examples of Base for Preconfigured Top Size

SMARTLINK® SPECIFYING INFORMATION

WALL RAIL SYSTEM

The SmartLink® wall rail is a multi-layered, multi-functional system that can accommodate a variety of presentation boards and accessories. The multiple tracks allow boards to be easily positioned and changed to support today's interactive learning environments.

Planning Notes

- Installation of the wall rail system over existing white or chalkboards is not recommended.
- The rail and wall bracket provide three separate tracks for the Learning boards. The REAR or wall/bracket track is occupied by the fixed wall board. The MIDDLE and FRONT tracks are for sliding boards.
- To allow for greater utilization of the rear fixed board a maximum width of 96" of sliding boards on the middle or front track is recommended.

The illustration below shows the overall wall space requirements for the rail system and recommended mounting height for use in K-12 classroom applications.

Sliding boards are removable and reversible so a wide variety of layouts are possible. The following illustrations highlight a couple of the more common applications. Layouts 2A and 2B provide the greatest amount of board space and overall flexibility. When used with rail mounted worksurfaces, use 24"W boards on the front rail as shown in 2C in front of each worksurface to provide information specific to that work area. Boards could then be added to the middle rail for information/work to be shared between the stations.

Specification Notes

- Boards are specified individually.
- Hardware to mount to the wall brackets is not provided by HON and MUST BE SOURCED LOCALLY.
- Learning board only applications require two (2) HLWR-12 rails to be specified.
- REFER TO PRODUCT INSTALLATION INSTRUCTIONS FOR DETAILED INSTALLATION INFORMATION.

(user set desk height – top thickness – seat height = available kneespace)

(29"H – 1" thickness – 18" seat height = 10" available kneespace)

(available kneespace – book basket/box height = usable kneespace)

(10" available kneespace – 5" basket height = 5" usable kneespace)

ⓘ Field installed felt glide caps (HGDK3-F) are recommended for use on VCT flooring.

ⓘ All Student Desks are ordered and shipped two (2) desks per carton. Ordering two of any model will result in 2 cartons being shipped, giving you 4 desks.

INTERLINK IQ ELECTRICAL

Specification guide for IQ Electrical on Training tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

4-TRAC HARDWIRE ELECTRICAL SYSTEM

4-Trac Electrical System

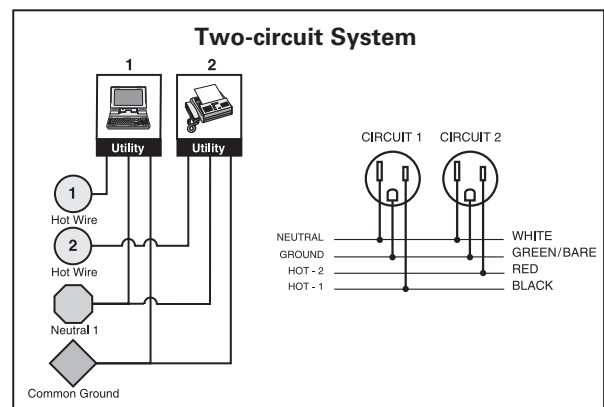

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together

Steps for Electrical Specifications:

- Determine how many rows of tables are needed and order the following:
 - One HMAPLATE per row (or power in-feed)
 - One HMAPOWER48 per row (or power in-feed)
- Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HMAPOWER60 and two sets of HMAPOWER602)
- Order one set of ganging hardware per table (ex. HMAGANG)
- Determine which accessories are needed:
 - Power Hub model HGRMTAC — to access power at worksurface.
 - Data Grommet model HGRMTDATA — to access data at worksurface.
 - Wire Management strips model HBTMS — for vertical and horizontal wire management.

SEATING FUNCTIONS

Work/task chairs need to be adjusted to deliver optimum support. Cross-reference the letter key below to identify the chairs in this section that best meet your needs.

PROPORTIONAL ADJUSTMENTS

These controls adapt the dimensions of the chair to fit the user.

A. Pneumatic seat height adjustment — Regulates height of chair relative to floor.

B. Back height adjustment — Positions lumbar support within a fixed range.

C. Seat depth adjustment — Positions chair back relative to seat.

D. Seat slide mechanism — Seat cushion travels forward and back, then locks into position.

ARM OPTIONS

These adjustments accommodate different sized users and support keyboarding.

Q. Adjustable height arms — Provide improved upper-torso support. Can be adjusted periodically to relieve strain and provide variety.

S. Height and width adjustable arms — Controls both height and width of arms for optimum comfort.

T. Loop arms — Largely specified for aesthetics. Frequently used in management settings.

B-A. All-adjustable arms — Arms adjust in height, width, and depth.

POSTURE CONTROLS

The controls modify the position and angle of the seat and back to respond to changing tasks.

E. 360° Swivel

F. Tilt — Pivot point located directly above center of chair base.

G. Mid-range knee tilt — Pivot point located slightly ahead of center of chair base. Allows user to recline at a slightly more relaxed angle than conventional tilt.

H. Knee tilt — Pivot point located near front edge of chair. Allows user to keep feet flat on floor while chair reclines.

I. Synchronized knee tilt — Back reclines at a 2-to-1 ratio to seat angle. Pivot point located near front edge of chair.

J. Synchro-tilt — Back reclines at a 2-to-1 ratio to seat angle. Allows user to recline while keeping seat cushion relatively level to floor.

K. Tilt tension — Controls rate and ease of recline.

L. Tilt lock — Locks out tilt function.

M. Posture mechanism/lock — Back angle adjusts independently of seat, and can be locked in an infinite number of positions within a fixed range.

N. Multi-task control — Adjusts seat and back angles independently with a single lever (infinite locking within a fixed range).

O. Asynchronous control — High performance system with three levers to modify: angle of back relative to seat, tilt (free float or infinite locking) and forward tilt.

P. Weight-activated synchro-tilt — Back reclines at a 2 to 1 ratio to seat angle. Tilt tension automatically adjusts to user's body weight as user reclines.

W. Integral lumbar support — Easily adjusts to enhance comfort.

X. Dual-clutch posture control — Adjusts seat and back angles independently with two levers (infinite locking within a fixed range).

A-C. Synchronized tilt — Back reclines at a 2.5 to 1 ratio to seat angle. Variable lock.

A-D. Side tilt tension — Controls rate and ease of recline. Conveniently located on the right side.

A-E. Back reclines at a 2 to 1 ratio to seat angle. Back angle adjusts independently of seat and can be locked in infinite number of positions within a fixed range.

FIRE CODE/COMPLIANT SEATING

FIRE SAFETY

Definitive Protection — CAL TB 117-2013

- TB 117-2013 — The State of California, Department of Consumer Affairs, Bureau of Electronic and Home Appliance Repair, Home Furnishings and Thermal Insulation (BEARHFTI) Technical Bulletin (TB) 117-2013 is the industry flammability standard for upholstered furniture, and provides methods for smolder resistance of cover fabrics, barrier materials, resilient filling materials, and decking materials for use in upholstered furniture.
- The fabrics and resilient filling materials used in upholstered seating manufactured by The HON Company meet or exceed the flame retardant requirements of State of California TB 117-2013. The label attached to the seat bottom indicates compliance with these requirements.

Elevate Fire Safety to a Higher Standard — CAL TB 133

- The State of California announced in January 2019 that Technical Bulletin (TB) 113, The Flammability Test Procedure for Seating Furniture for Use in Public Occupancies has been repealed effective January 22, 2019.
- While the CAL 133 standard has been repealed, a select subset of The HON Company's most popular chair models are still available in an array of fabrics that include an advanced barrier of fire protection to help comply with CAL 133 requirements.
- To ensure that the chairs you order comply with CAL 133, specify one of the fabrics listed below. Then simply add "FC" to the model number when ordering one of the select available models. A standard upcharge of \$90 will be applied per seat model for all single seat chairs.

Astir™ Collaborative Work Seating shown with Birk™ Tables and Acoustic Solutions by Unika Vaev.

ASTIR™

Astir™ Collaborative Work answers the call for soft seating solutions while providing separate work spaces and sturdy posture support for those looking to step away from their desks. The line provides a soft yet upright sit to keep employees engaged and working comfortably at a table setting. High-back and side options help keep private conversations private — so teams don't have to be confined in close quarters, such as a conference room. And a unique, single-seat style with high screens on three sides creates a quiet, secure, and comfortable space for individual focus.

FEATURES

- Seat height and back angle are scaled for more of an upright working posture.
- Choose from One+, Two-, or Three-Seat Lounges in low- or high-back options.
- High-back screens available in knit mesh or fabric options provide visual privacy on back and sides.
- Fabric high-back screen option available in cleanable fabrics (see HON's cleaning guide for instructions).
- Choose from three different leg styles to customize your look.
- Two- or Three-Seat Benches add extra seating for commons or reception areas.
- Pouf model functions as both impromptu seating and a place to kick up your feet.
- Replaceable seat cushion enhances comfort and cleanability, and allows for easy changing.
- With the multi-fabric options, seat cushion and frame can be specified in different fabrics for a modern aesthetic.
- Add an optional power module to route power directly underneath the seat.

SoCo™

Today's busy professionals are taking meetings and project planning in a variety of different ways and places. SoCo™ is an intuitive modular lounge series designed to encourage the ease of both collaborative and individual work while supporting how people like to sit and get comfortable. Multiple shapes come together to create a wide range of configuration possibilities, from understated and sophisticated to fun and playful. Power is cleanly integrated within the design and is located where multiple users can access and utilize its functionality to stay connected. SoCo™ offers soft, comfortable support and a tailored aesthetic in spaces that allow you to get away from the workstation throughout the day.

FEATURES

- SoCo™ supports dynamic collaboration and casual focused work with a soft, organic, tailored aesthetic that delivers comfort for a variety of sitting postures.
- Seven modular shapes work together to create unlimited linear and curvilinear configurations.
- A fully upholstered design with a multi-fabric seat/back option softens the corporate aesthetic.
- Optional plug-in or hardwire electrical is available on select shapes and supports both USB-A and USB-C compatibility.
- Dual-purpose glides allow two functions: without glide caps furniture stays in place; with glide caps furniture easily moves for reconfiguration.

Upholstery Expectations

! Solid, non-patterned fabrics are recommended due to SoCo's curvilinear profile. HON does not pattern match fabrics that have a distinct linear or repeating pattern. It is recommended to choose from one of HON's many standard non-patterned fabrics. For more details on Upholstery Pattern Match for this series, please see page 14.

*Due to the inherent characteristics of upholstery materials, such as coated textiles and stiffer fabrics, and the curved nature of SoCo™, fabric may show some wrinkles along seams and may become more relaxed to show additional wrinkles over time.

INFORMATION ON ORDERING PARTS

When parts are needed to repair HON products, the following guidelines should be followed to expedite the process.

1. Warranty orders are submitted on the Website at hon.com via the Quick Claim tool.
2. There are no discounts applied to parts. Pricing quoted is the net value. Parts pricing is subject to change without notice.
3. For a part not covered by warranty applicable shipping charges will apply.
4. All keys are \$6.00 each plus a shipping and handling fee of \$3.00 per shipping location.
5. Parts may be paid for with an approved credit card. Approved Cards: MasterCard, VISA and American Express.
6. Payment terms for invoiced parts are Net 30 days.
7. Due to short leadtimes on parts, no changes will be accepted after the order has been placed.
8. When placing a **warranty** parts order:

If the product is under warranty, the product serial number must be provided. Most finished goods products have a serial number placed on them at the factory. The label containing the serial number is located:

Vertical Files — right side of the uppermost drawer

Lateral Files — left side of the uppermost drawer or shelf

Desk Towers — outside of top drawer

Desks, Credenzas, & Returns — on the outside, kneespace side of the top drawer. Fully extend the drawer to find it.

Desks, Credenzas, Corner Units, Bridges, Peninsulas & Returns without drawers — underside of top

Tables and Stands — underside of the top

Table Trucks — underside of side rail

Cabinets & Bookcases — left inner side of the case

Modular Component Top and Backs — underside of top

Modular End Panels — top inside surface

Reception Stations — top inside surface of back panel

Organizers — top inside surface of left end panel near back panel

Vertical Paper Manager — back panel inside surface near top

Pedestals — bottom drawer right side exterior

Seating — underside of the seat

Panels — underside of the top cap

Hutches, Storage Units, Overhead Storage — underside of the shelf

Hanging Bookshelves — underside of shelf

NOTE: Removal of the serial number tag from the product voids the warranty.

An important note regarding Product Serial Numbers:

HON desks, tables, chairs, files and systems components are tagged with a serial number. This number helps us identify *when and where your product was made*, and to identify and correct the root causes for the problem. NEITHER THE DEALER NOR THE CONSUMER SHOULD REMOVE THIS TAG UNDER ANY CIRCUMSTANCES. To do so immediately voids your Warranty coverage for that particular item *and prevents us from further identifying it*. Instead, please transcribe the number and call your Dealer.
