FAB-MASTER

DUCT BOARD GROOVING HAND TOOLS

Simple, Accurate
and Ergonomic

Hand grooving fiberglass duct board has never been easier. The Fab-Master hand tools efficiently groove reliable and consistent duct sections.

The Fab-Master Square indicates precise cutting locations and then doubles as a straightedge cutting guide for the Fab-Master tools.

It adjusts quickly and easily to cut along 90°, 75°, 67.5°, 60° and 45° angles, locking in place in each position. The Fab-Master Square is fully reversible for left-handed operation.

FEATURES & BENEFITS

- Color-coded tools for 1", 1.5" and 2" board
- Easy-to-follow user's guide
- Lightweight, anodized aluminum tools
- Extremely comfortable handles
- Large sledding areas for smooth cuts
- Precision ground and heat treated blades
- Optional heavy-duty carrying case

Fab-Master Square

UNIQUE TIME-SAVING DESIGN

No marking or scribing is required for any cut. Simply reposition the Fab-Master Square's index along the edge of the last cut and you're in position for the next one. No add-on or compensating measurements for groove width.

OPTIONAL HAND TOOLS

- The #6 tool cuts both male and female shiplaps, producing stronger, more precise offsets.
- The V tool produces a standard 90° groove for simple closures.
