Specifications Form  
January 2023

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied. RAILOADED FABRIC REQUIRES A PRODUCT MODIFICATION REQUEST DUE TO ADDITIONAL YARDAGE REQUIREMENTS

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54” wide. Fabrics less than 54” wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

**C.O.M. INCREASE MATRIX** (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7” REPEAT	8”–13” REPEAT	14”-21” REPEAT	22”-27” REPEAT	28”-33” REPEAT	34”-40” REPEAT	41”-48” REPEAT
54”	0	20%	25%	30%	45%	55%	70%	80%
51”-53”	15%	25%	30%	35%	50%	60%	80%	90%
48”-50”	20%	30%	35%	40%	55%	65%	85%	95%
45”-47”	30%	45%	50%	55%	60%	80%	90%	100%
36”-44”	50%	65%	70%	75%	80%	100%	110%	120%

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10” vertical with 14” horizontal would be 14+5=19.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M.

Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

TECHNICAL SPECIFICATIONS

Interior Frame Construction

The interior frame is constructed of <sup>23</sup>/<sub>32</sub>” thick hardwood plywood. The back is made from the same <sup>23</sup>/<sub>32</sub>” thick hardwood plywood. All components are CNC-machined (computer numerical control) to maintain accuracy of part dimensions and to ensure that all connection joints are engineered to interlink with other hardwood plywood components. All joints are glued with polyvinyl acetate adhesive and further secured with staples and wood screws.

Seat Construction

The seat utilizes upholstery webbing that is affixed to the machined frame construction. The seat cushion is 4” thick and consists of high-resilience contract grade 2.5-45 polyurethane foam.

Backrest Construction

The backrest of the lounge unit utilizes a high-resilience contract grade 2.5-45 polyurethane foam that provides a supporting comfortable sit. The outside portion of the unit utilizes the same contract grade 2.5-45 polyurethane foam to maintain a smooth consistent shape around the perimeter. Back foam thickness on the top and sides of the backrest is 2.5” thick.

Upholstery

Upholstery is available in non-contrasting, or contrasting upholstery options on low-back models. Upholstery is only non-contrasting on backless models. A variety of KI ingrades, Pallas and customer ordered materials/KI ordered materials (COM/KOM) have been approved for use on the Zeker product line. All seams are reinforced with a top stitch.

Base Options

Poly feet with adjustable glides.

Poly Feet

Poly feet are 1 1/2” high and contain an adjustable glide. Poly feet are mounted to the lounge frame underside using bolts. Poly feet are Black in color with five feet per half round (ZK092) and inside curve (ZK060), and four feet for the rest of the line. The adjustable-height glide bottom pad is of natural color poly, is impact resistant and threads into the nylon foot with a 1/4-20 threaded stem having 7/8” of leveling adjustability.

Ganging

Gangers consist of a hook latch with catch bracket. Ganger assemblies are made from 11-gauge steel (1/8” thick), with a zinc plated finish. Gangers are secured to the underside of any lounge using #14 x 1” wood screws.

Power Modules

Round Mini-Tap® Power Module with 3-Prong Plug

Certain Zeker modular seating units can be configured with optional Byrne Mini-Tap power modules with 3-prong plug (a self-contained, UL listed single Furniture Power Distribution Unit). One 15-amp, 125 volt AC simplex receptacle with one 2.1-amp, 5 volt DC USB-A port, and one USB-C port (2.0 and 3.0 compatible, no data), provide connection for device charging or direct AC power. Byrne Mini-Tap power module is standard with 72” long, 14 AWG, 15-amp NEMA rated 3-conductor SJT cord with a three-prong grounded plug. Modules are available in black, white, warm grey, and cool grey. Cord is black.

One Byrne round Mini-Tap® power module with 3-prong plug is available on lounge chair, 48” rectangle, 60” rectangle, 72” rectangle, inside curve, outside curve, and extended outside curve units. The round Mini-Tap power module is only available in the front center-facing location on lounge chair, 48” rectangle, inside curve and outside curve units. One round Mini-Tap power module is available in the front left-, right- and center-facing locations on 60” rectangle, 72” rectangle and extended outside curve units. See Zeker Modular Seating - Planning Guide (KI-PG-000043) for configurable power locations.

Compliance

This product has been tested according to the Business & institutional Furniture Manufacturers Association (BIFMA) voluntary standards known as ANSI/BIFMA X5.4-2020 for Public and Lounge Seating, meeting, or exceeding all applicable testing requirements of the standard.

This product meets third party certification for Indoor Air Quality as certified by SCS Global Services. This product meets all qualifications for Indoor Advantage Gold, the highest standard which conforms to the ANSI/BIFMA Furniture Emissions Standard (M7.1/X7.1-2011 R2021) and ANSI/BIFMA e3-2019 (Credits 7.6.1, 7.6.2, 7.63) for seating parameters.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See “How To Build a Model Number”.
- Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A**Select basic model.
- B**Select power & location.

NP

- No power

LP

- Left-facing power; add \$360

RP

- Right-facing power; add \$360

CP

- Center-facing power; add \$360
- C**Select power module color.

MBL

- Black module

MCG

- Cool Grey module

MWG

- Warm Grey module

MWH

- White Module
- D**Select non-contrast or fabric contrast 1.

Refer to [ki.com/fabrics](#)
- E**Select fabric contrast 2.

Refer to [ki.com/fabrics](#)
