

Assembly Instructions

Table Ganging Hardware

July 2013

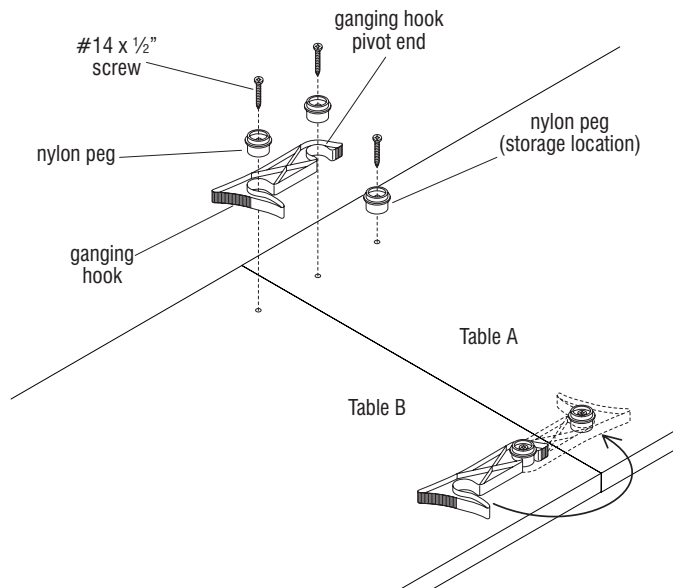

Figure 1

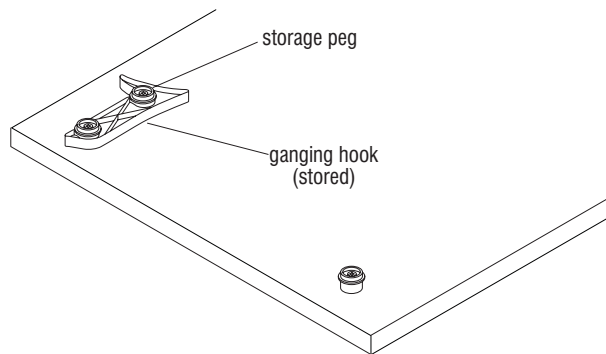

Figure 2

Assemble Ganger to Table

1. Locate pre-drilled holes for nylon pegs under tables A & B. At each hole location, insert a #14 x 1/2" screw through a nylon peg and tighten pegs to tables as illustrated. Do not exceed 50 in/lbs of torque (Figure 1).
2. To gang tables together, snap the pivot end of the ganging hook onto the peg closest to the table end of either table. Then rotate the ganging hook to engage onto the nylon peg on the adjoining table (Figure 1).
3. To store ganging hook, move table sections apart and rotate hook end of ganger onto the storage peg as shown (Figures 1 & 2).
