

Trek Tables

Discover a fresh perspective on table design with Trek® tables. The angled profile of the leg is a significant departure from traditional "floor-hugging" bases. This new design direction extends to more edge selections and design options, too.

Dynamic Table Solution

Trek tables exemplify excellent design and exceptional functionality. With a contemporary aesthetic suitable for various settings, these tables introduce a modern appeal. The inclined Trek leg design deviates from the usual floor-bound bases, and the tables offered in several versions, ensure versatility across diverse environments.

Features

- Offer an attractive, angled leg base profile, which allows ample leg clearance on all sides
- Optional quick-release modesty panels enhance Trek's sleek, contemporary design
- Easily adapt to a wide range of applications, including training environments, large or small group interaction, and collaborative spaces
- Available as fixed or flip-top models
- Select either standard or lightweight top
- Optional PowerUp modules provide convenient power and data access
- Offered in a variety of sizes and table top shapes
- Trek Plus options create varied configurations, with an easy-to-use, quick-connect ganger to lock tables together
- Choose glides, casters, or a mix of both for varying levels of mobility

Construction

- Trek employs heavy-gauge tubular steel components in fixed or flip-top models
- Includes T, TT and X base configurations
- Tables with casters will include two locking and two non-locking casters
- Casters and glides available in black only
- Ganging mechanism does not require tools when joining tables and is self-storing under tabletop
- Lightweight folding mechanism easily releases and folds leg tightly to table bottom and securely locks with two polypropylene clips
- Standard flip-top table does not have a detachable top
