SPECIFICATIONS

Conference Table Top

Table tops are constructed of 1-1/8" thick, 45 lb density particleboard core, with a 1/32" veneer finished top surface and 1/32" thick phenolic backing. Serenade is available in four top shapes - rectangle, racetrack, boat and sight line. The top shape can be specified with one of six different styles of wood edging. Edging is present on all sides, with several selected edge styles providing radius or square corners.

Tops specified at 144" or longer require two piece construction using steel joinery for vertical and lateral joint strength along the entire width of the top. The veneer pattern is reverse slip matched. All joinery is hidden on the underside of the top. A flush mounted Vault power module is available.

Conference Table Base

Table bases are constructed of 5/8" thick particle board. The veneer one-sided finish width is 41/64".

Bases are offered in five styles:

- Panel base - 4" wide
- Column base - 12" wide, base is wide enough to cover a 4 receptacle floor outlet for power wiring
- Veneer drum - 18", 20", 23" and 33" diameter
- Veneer half drum - 18", 20", 23" and 33" diameter
- Metal drum - 18", 24" and 28" diameter; available in all KI standard powdercoats

All bases feature adjustable glides 1" in diameter, 5/16-18 threaded for level setup within 2" of adjustable height. Tables sized 168" or longer are configured with three bases; all other table sizes are configured with two bases. All enclosed bases are available with an access door for easy power source access.

Conference Table Modesty Panel

Modesty panel (base "stringer") is constructed of 5/8" thick particle board. The veneer one-sided finish width is 41/64". Modesty panel height is 12" x 10" wide. Power/data options and cables are routed and hidden within the modesty panel for an organized and clean appearance.

Conference Credenza

Credenza is offered in two heights: conference height (29") and buffet height (36"). Both heights feature standard adjustable shelves. The buffet height credenza offers two adjustable shelves per cabinet; conference height offers one adjustable shelf per cabinet.

The credenza top is constructed of 1-1/8" thick particle board, with 1/32" veneer finished, solid wood front edge and veneer finish on three sides. All credenza components are constructed of 5/8" thick particle board. The entire back of the credenza is finished in veneer. The veneer finish width is 21/32" for all 2-sided finished sides, doors, shelves and trim.

Door hinges are constructed of steel, spring loaded for soft-close, fully adjustable for gap and flush closure, hidden and flush mounted. Door pulls are offered in three styles: square bar, curved and straight. Curved pulls are available in black and silver, Straight and Square pulls are available in silver. Adjustable 1" diameter 5/16-18 threaded

floor glides provide level setup within 1-1/2" total adjustability.

Vault Module

Available on conference table tops only. The optional Vault Module is a power and data module constructed of stained aluminum, flush with the surface of the table top. Surface cutout needs to be 14.5" x 4.0125", overall size of the module is 15.875" x 4.375" x 4.375".

Standard configuration includes three power outlets, two data ports, one VGA connection, and one HDMI connection. The module is opened and closed by touching the red and green arrows on the surface of the module. The module also contains a photo-electronic eye that prevents closure when power, VGA, or HDMI cords are plugged in.

PRODUCT SPECIFICATIONS

Serenade™ Gathering Table

September 2022

TECHNICAL SPECIFICATIONS

Tabletop

Tabletops are constructed of 2" thick, 45 lb density particle board core with 1/32" laminate finished top surface and 1/32" thick phenolic backing.

End Panels

End panels are constructed of 2" thick, 45 lb density particle board core finished with 1/32" laminate on both the front and back surface. The ends are finished with 1/32" Self Edge or matching laminate. The bottom is finished with black laminate. Tables 108"-144" wide come with an inset support leg constructed of 2" thick, 45 lb density particle board core finished with 1/32" laminate on both the front and back surface. 24" deep tables contain a 12" wide inset leg which is centered at the rear of the table to allow more leg clearance on the user side of the table. 30"-48" deep tables contain an 18" wide leg that is placed directly in the middle of the table construction to allow user clearance on both sides of the table. Adjustable glides are 1" diameter, 5/16"-18 threaded floor glides and offer 1 1/2" of adjustability. These panel structures are secured to the tabletop with hardware and 9-gauge steel mounting plates.

Stringers and Modesty Panels

Tables are fitted with either 73/4" tall (on 29"H models) or 113/4" tall (on 42"H models) stringers or full-height modesty panels. These stringers and modesty panels are constructed of 1" thick, 45 lb density particle board core finished with 1/32" laminate on both the front and back surface. Power and data options and cables are routed and hidden within the stringers when specified. These panel structures are secured to the tabletop with hardware and 9-gauge steel mounting plates. On 18"-24" deep tables, the stringer or modesty panel is located to the rear of the tabletop allowing user seating or standing access from only one side of the table. On 30"-48" deep tables, the stringer or modesty panel is located along the center line of the tabletop, allowing user seating or standing access from both sides of the table.

Electrical (power module placement when specified)

Tables 60"-96" wide receive one power module, or grommet centered along the length of the tabletop. Tables 108"-144" wide receive two power modules, or grommets each centered between the center and end legs. Tables 18"-24" deep have the power module or modules to be 6" from the rear edge of the tabletop to the center of the module cutout. Tables 30"-48" deep have the power module or modules to be centered from the front edge to back on the tabletop.

PowerUp® Module with 3-Prong Plug

Tables are available with one or two PowerUp modules per table. Tables with widths of 84" or less always get one module while tables with widths of 96" or more always get two modules. The PowerUp module is a UL listed relocatable power tap, which is a surface-mounted power module with a plastic cover. When open, two simplex power receptacles and two data jack openings are exposed. The module is 3 1/4" wide x 7" long and 2 1/4" tall when opened and fits securely into a 6 1/4" x 3" cutout, still allowing removal without tools. It is provided with a 15 ft cord and 3-prong plug, rated 120VAC, 15A. The module is constructed of polycarbonate with a textured finish, meeting UL 94 V-0 Flame Class minimum requirements. The module has two simplex receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. The power receptacles open above the plane of the tabletop to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. Data connectors are not supplied with the module and are purchased separately.

TECHNICAL SPECIFICATIONS

Villa™ Power Module with 3-Prong Plug

Tables are available with one or two Villa power modules per table. Tables with widths of 84" or less always get one module while tables with widths of 96" or more always get two modules.

The Villa power module is an Interek ETL Listed Furniture Power Distribution Unit surface module that mounts below a 6 1/4" x 3" grommet cutout in the tabletop. The module is 3 1/2" wide x 6 3/4" long and 2" tall when opened. It is provided with a 15 ft cord and 3-prong plug, rated 120VAC, 15A. When open, two simplex power receptacles, two USB charging ports and one data jack opening are exposed. An additional simplex receptacle is located at the underside. The module can be modified to fit various brand jacks. Data connectors are not supplied with the module and are purchased by the customer. Metal grommet cover is included.

4-Port Power Module

The USB/AC power module houses two AC simplex receptacles (rated at 15 amps/125 volts), two USB-A ports and two USB-C ports (rated at 2.1-amps/5-volts per port) (2.0 & 3.0 compatible, no data). All circuitry is contained in an extruded aluminum housing and the entire electrical power module assembly is UL listed, having a UL spill test rating for protection against liquids. Modules come with a 15' power cord with a three prong grounded plug, specified 14AWG, 15-amp NEMA rated three conductor SJT. The power cord is strain relief mounted to the rear of the housing. The power module is available in three powder-coat colors (Black, White, Silver).

Integrated Leg Wireway

When power is specified, each end panel and middle leg comes standard with a vertical integrated wireway cavity that measures 1 3/8" x 3 1/4". This is designed for passing cords and cables through the leg. Access is through a 2 1/2" hole near the top, at the inside of the leg and a 2 1/2" hole near the bottom of the leg. Chrome finished covers are provided to cover the bottom access holes. Where center table legs are needed with power specifications the grommet access is on both sides of the leg at the top and bottom.

Velcro® Wire Management

The Velcro® wire manager is constructed of 2" x 4 1/2" Velcro® hook and loop material. Wire manager is provided with adhesive backing and screws for attachment to the underside of the top. Tops are not pre-drilled for locating wire manager, so the manager may be applied in any convenient location. One wire manager is included for each power module ordered. Field installed.

Accessories

Bag Hook

The hook is constructed of 1/4" steel rod with a Chrome finish. It is attached to the underside of the top with two screws (provided). On 18"-24" deep tabletops, coat hooks may only be used on the front, user side of the table. On 30"-48" deep tabletops, coat hooks may be used on both sides of the table. 60" & 72" wide tables may use up to two hooks per side. 84" & 96" wide tables may use up to three hooks per side. 108", 120" & 144" wide tables may use up to four hooks per side.

Footrest

The optional footrest is constructed of a 1 1/2" diameter, 12-gauge DOM steel tube, milled at each end, containing welded-in inserts with a tapered slot. #12 x 1" Phillips screws, installed into end leg panels at 6" from the edge of the leg panel and 6 1/2" up from the bottom of the panel capture the tapered slot in the insert at the outside ends of the footrest tubes and hold the footrest in place. In specific width conference tables (see below), a two-piece footrest design is required, utilizing a center foot support which connects the two outer footrest halves together using #10-24 x 1 1/2" Torque thread cutting screws. The foot support also mounts to the conference table's middle leg panel using a #12 x 1" Phillips screw with tapered insert design. The center foot support is of milled and welded construction and contains a 1" diameter, 5/16"-18 threaded floor glide offering 1 1/2" of adjustability. 60"-90" wide tables use the one-piece footrest. 108"-144" wide tables use the two-piece footrest construction, with the center foot support. On 18"-24" deep tabletops, the footrest may only be used on the front, user side of the table. On 30"-48" deep tables, footrests may be used on both sides of the table. The footrest and center foot support may be specified as bright nickel-chrome plated, or finished in either Starlight Silver, Black or Flannel powder-coat paint.
