

Assembly Instructions ■

Likha Caseloads

End Bookcases

August 2021

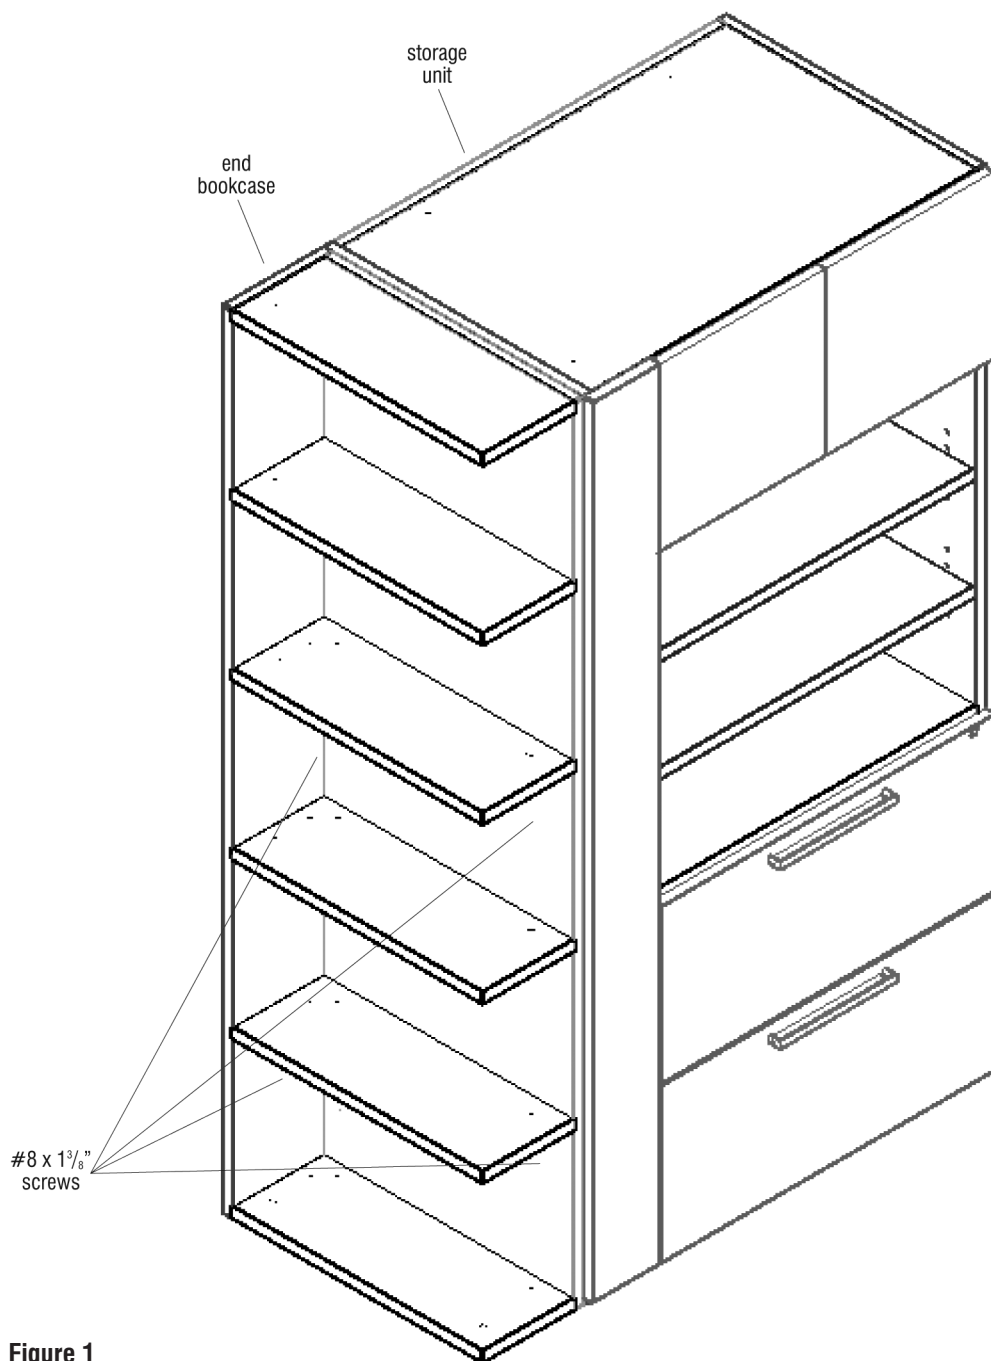

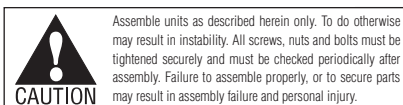

Figure 1

Parts List

- #8 x 1 3/8" screws (qty 4)

Note: The Likha end bookcases are available in left- or right-hand unit orientations. Although the figure in this instruction illustrates the assembly of a left-hand bookcase to a wardrobe storage unit, the instructions apply to both bookcase orientations and also to various storage units. Your configuration may vary.

1. Position the back of the end bookcase unit against the appropriate side of the storage unit the bookcase will install to (Figure 1).

Note: Bookcase mounting holes are under shelves to help conceal their locations.

2. One at a time, while tightly holding the units aligned, use an end bookcase mounting hole as a template to carefully bore a 1/8" deep pilot hole at the center of the mounting hole. Take care to not drill too deep, piercing the storage unit. Then secure the units together at that location using a #8 x 1 3/8" screw and repeat the process above the remaining mounting holes (Figure 1).
