

# Wool Library

# Wool Library

Introducing Wool Library, four foundational textiles that deliver all the benefits of wool as a biobased material that are expertly woven in Italy to deliver high quality and performance paired with a soft, luxurious hand. These four weave constructions bring an abundant 190 color options, created to be a staple in style and durability for a long time to come, just like your favorite sweater.

# The Beauty of Wool

Known for its durability and longevity, wool fiber is biobased, biodegradable, and can also be recycled and reused in new products.

- Biobased
- Durable
- Renewable
- Biodegradable
- Postconsumer Recycled
- No added finishes
- No PFAS
- No Flame Retardants
- No Antimicrobials
- Naturally Fire Retardant
- Thermoregulating

Checker 8360-651, Micro Tweed 8250-756, Basket 8200-252

“Designtex has a legacy of bringing hard wearing natural fibers to the market. One of our very first materials (60 some years ago) was a Mohair Velvet that is still in the line today and wool has long been a staple fiber in our offering and industry. Wool is great because it’s natural and naturally hard wearing, thermoregulating, and renewable.”

– Catherine Stowell, VP Design, Designtex

Expertly woven in Italy.  
High quality and  
performance paired  
with a soft, luxurious  
hand.

The image shows three modern, curved armchairs arranged on a light-colored wooden floor. The chair in the foreground is a vibrant red with a fine, woven texture. Behind it, to the left, is a purple chair with a smooth, solid finish. To the right is a beige chair with a similar woven texture to the red one. The lighting is soft and even, highlighting the different materials and colors.

Three styles  
contain 70%  
postconsumer  
recycled wool.

# A Second Life for Wool

Checker, Basket, and Micro Tweed each contain a high content (70%) of postconsumer recycled material from the fashion industry. Reutilizing discarded wool garments to create new yarn preserves resources and places less stress on the environment.

These three products can contribute to the LEED Materials and Resources credit for recycled content and have been certified by the mill to GRS, the Global Recycled Standard 4.0. This collection is free of added chemistry including finishes, PFAS, flame retardants, and antimicrobials.

# Preparing wool for its next life involves a few steps:

Discarded, reclaimed, gathered clothing is sorted by fiber, color, content, and quality. The garments are broken back down into colorful fibers that are washed, blended together, and spun into a new yarn. These fiber blended yarns are woven and finely milled into soft, deeply colored new fabric for upholstery. For Wool Library, this process occurs in Prato, Italy, which has a long history of recycling clothing from the fashion industry dating back to the 12th century.

Micro Tweed 8250-151, 102.  
Basket 8200-101, 151

# 8200 Basket

Basket is a solid textile with a tactile basket texture and visible weave structure that delivers immense versatility and impact, available in 31 colorways.

- 31 colorways
- 70% Wool (Postconsumer Recycled) 20% Polyester, 5% Acrylic, 5% Nylon
- HPD, LEED
- Solvent (S)
- No Antimicrobials, No Flame Retardants, No PFAS
- 100,000 Martindale Cycles

Wool Library will become an essential part of your go-to working palette, bringing together sustainably sourced postconsumer recycled wool with an abundance of color and texture with which to mix, match, and experiment.
