# what is community table

what is community table

Designed for Teknion by Michael Vanderbyl, the Community Table is a model of simple, straightforward design, with substantial proportions to act as a focus for the space. It is an architectural anchor that invites people to gather and indulge in deeper social and work interactions.

Access to power/data is transparent, provided via a central trough. The finishes and dimensions of the table can be customized to meet clients' exact requirements. Minimal and yet warm, this well-crafted wood table is ideal for the new human-centered workplace, one that references the domestic environment; one that is informal and collaborative.

A model of simple design, that is about people.

TV LIFT OPTION

The TV Lift option seamlessly hides a TV in the table when not in use, but provides convenient access to technology when collaborating

• Installed at one end of the table and will add 10" to the overall table width

• Includes an access panel in the base

• Available on 48' and 60" deep tables only

• Does not include the TV or TV mounting hardware

• The recommended TV dimension should not exceed:
  - 25 1/2" high
  - 41" wide on 48" deep tables
  - 43 1/2" wide on 60" deep tables

• Includes an HDMI Connector in one of the electrical outlet locations
