## SOLUTIONS FOR PRIVACY AND COLLABORATION

Paradolia screens and suspension panels offer a contemporary solution that creates privacy and reduces acoustical distractions. Its soft contours contribute to a warm atmosphere while providing a tackable surface. Options with magnetic markerboards, mobility, and shelves add even more utility and versatility.

## VERSATILE, BEAUTIFUL, AND HIGHLY FUNCTIONAL

A-frame screens divide space while serving as a collaboration tool and are easily nested for storage. Softened floor screens, with and without a glass magnetic markerboard accent, are a mobile option that effortlessly move from space to space. Angled leg floor screens are available in three sizes and provide a large tackable space with solid hardwood legs. The dual-sided floor screen, featuring a pass-through shelf and storage system, is a mobile unit that has tackable fabric and magnetic markerboard surfaces. The wall panels attach to a suspension rod with leather straps, providing functional sound absorption for walled environments.
