

Kolo Pods + Om Pods in Education

Fluid spaces that adapt to changing ideas are the hallmark of learning environments. Today's schools and universities are evolving at a rapid pace. Library spaces encompass more than books. Student centers support individuals and multi-person gatherings. And students aren't the only ones who may need a break during the day. Faculty and staff in K-12 and Higher Education have the highest rate of burnout in the U.S.*

Designed to offer the choice of peace and quiet in an open environment, Our pods are an ideal solution for students and faculty that need quick access to privacy. Our Kolo Pods and Om Pods offer flexibility and the Anti-Eavesdrop design reduces speech intelligibility and dampens sound, providing a space for confidential conversations or quiet respite.

Education facilities of all levels have realized the importance of mental health. Use our pods to create specific places that students and staff can use to destress and have a calm moment. By providing a place for mental relief and comfort, facilities can help mitigate burnout and retain faculty. For additional visual privacy, partial frost and full frost privacy decals can be applied to the glass walls or doors. Custom decals can be used to boost school spirit or reinforce branding.

*U.S. Workers' Burnout Rates by Industry, 2022; Gallup Poll

Kolo Pods have been recognized by the International Board of Credentialing and Continuing Education Standards (IBCCES) as a Certified Autism Resource (CAR). IBCCES, an independent credentialing and certification board with a focus on cognitive disorders, reviewed our Kolo Pods and determined that they can help improve the lives of individuals with autism.
