

## Kolo Pods + Om Pods in Healthcare

Designed to offer flexibility and accessibility to quiet in an open environment, our pods offer a fresh perspective on private respite areas within healthcare spaces. The Anti-Eavesdrop design reduces speech intelligibility and dampens sound, providing a quiet space for patients and their loved ones to make a personal phone call, rest, or be able to focus in an otherwise challenging environment. The ADA-compliant model features an automatic door assist, T-shaped turnaround, and fold-down worksurface and benches so that privacy can be accessible to all.

The flexibility of our Kolo Pods and Om Pods enable healthcare providers to pivot from respite spaces to impromptu huddle areas. The pods provide private environments for physicians, patients, and family members. For additional visual privacy, partial frost and full frost privacy decals can be applied to the glass walls or doors. Custom decals can also be used to reinforce healthcare facility branding.

Kolo Pods received a Silver Nightingale Award and an Innovation Award at the 2023 Healthcare Design Conference + Expo (HCD). These awards were presented to Kolo Pods for its contribution to a healing environment, functionality, quality and durability, aesthetics and style, pricing, and innovation.

Kolo Pods were also recognized by the International Board of Credentialing and Continuing Education Standards (IBCCES) as a Certified Autism Resource (CAR). IBCCES, an independent credentialing and certification board with a focus on cognitive disorders, reviewed our Kolo Pods and determined that they can help improve the lives of individuals with autism.
