

WaveWorks has been a foundation for creating inspiring spaces where connections happen. As workstyles have evolved, the WaveWorks portfolio has expanded and flexed to meet a spectrum of needs from individual workspaces to collaborative areas.

The portfolio now includes wall panels and shelves to increase storage and functionality. Smaller storage options and new configurations accommodate today's shrinking footprints. New trestle legs add an aesthetic appeal to conference and private office environments. Additional height adjust options have been included to accommodate ergonomic needs and personal well-being. Two styles of planters have been added, making it easier to add biophilia anywhere.

ENHANCEMENTS

- Wall panels in laminate, markerboard, or upholstered materials that accommodate:
 - Floating wall shelves, including biophilia inserts
 - TV mount
- Narrower width wardrobes and undersurface pedestals
- New wardrobe configurations including side entry and interior drawer options
- Contemporary style trestle legs in metal or wood
- Robust offering of height adjust desks, returns, bridges, and credenzas
- Wall mount storage pedestals
- Two styles of freestanding planters
- New pull styles (Motif and Signature) available in all paint colors

RETROFITTING ENHANCEMENTS INTO EXISTING WAVEWORKS

WaveWorks enhancements can blend with existing WaveWorks models to create a seamless vignette to improve ergonomics and add functionality while incorporating a fresh aesthetic that easily outfits smaller spaces.*

Integrate Ergonomics

Adjustable height desks and returns support natural movement throughout the day.

Add Function & Refreshed Aesthetic

New wall panels and shelves increase efficiency while fresh table base designs and planter options enhance environments.

Accommodate Shrinking Spaces

Smaller storage options and new configurations have been included to fit smaller footprints.

*Exclusions: New height adjust single ped desk cannot be attached to an existing static return. New static bridge cannot be attached to an existing height adjust single ped desk or credenza. New wall mount height adjust bridge and credenza cannot be used in freestanding applications.
