FEATURE SPOTLIGHT

AMPLIFY UPHOLSTERED HIGHBACK: Uncommonly comfortable.

Adjustable lumbar support in an upholstered back is a rarity. It's even more uncommon to find this feature in a thin – yet comfortable – profile.

The upholstered highback introduces Dynamic Lumbar, a patent-pending integrated adjustable lumbar positioned within the padding for matchless comfort and maximum ergonomics.

THIN IS IN.

In keeping with the aerodynamic design of the Amplify mesh model, the upholstered chair's sleek and slender profile proves that this is a chair that delivers style as well as substance. The thin back conceals the mechanism that delivers 3.75" of lumbar support, with two symmetrical sliders the only visible indication of the superb ergonomics that lie within. Lumbar adjustment can be accomplished while seated.

Amplify highback upholstered is available in thousands of textiles, from fabric/vinyl grade 1 to leather grade 5. The durable polyurethane back/back support is available in black and fog, with an eye-catching fog/silver option to match silver arms and base. A polished aluminum base is an option.

Cast aside those standard bulky, upholstered task chairs for the thin profile, attractive aesthetics and comfort of Amplify highback upholstered back.

Amplify upholstered with black back, back support, arms and base.

Amplify upholstered with fog back, back support, fixed arm and base.

Amplify upholstered with fog back and arms, silver back support and base.
