voilà

This knit back chair is the first of its kind to offer a full range of ergonomic options: two back heights, three seat sizes, six mechanisms and a myriad of arms, seat, and base options. Shown here is an aluminum finish, it is also available in black. The chair is equipped with the renowned ADI Suspension seat and a unique three dimensional tensioned knit back on a cast aluminum frame, all combined in a clean, sleek design. What else can be said but... **Voilà.**

With its choice of multi-function or synchro-tilt mechanisms and five-way adjustable arms, the Voilà is well suited to ergonomic applications. The three dimensional knit back distributes weight evenly in all directions. This allows the knit back to self-adjust and take the shape of the users back, providing optimal lumbar support.

The Voilà is available in a conference room version with a choice of two back heights, swivel-tilt or knee-tilt mechanism. It's slim design will lighten the décor and fit perfectly in confined spaces.

The Voilà side chair is a great complement to your working environment, as a waiting room or companion chair. It is also available with casters on all four legs to fill your meeting room requirements.
