

BERKSHIRE BRASS SATIN RIDGE™

GRANDEUR SERIES

CAMBRIA®

SLAB VIEW

DETAIL VIEW

Featuring subtly raised Satin Ridge™ alloy veins, this tactile design features brass veins and delicate gray accents that jet across a cool, marbled white background.

SLAB SIZE: JUMBO 132in x 65.5in

THICKNESS: 2cm, 3cm

Cambria's design samples are small selections cut from a slab and do not fully show all design characteristics of a slab or the final installed product. Prior to purchase, view a larger representation of a design at CambriaUSA.com. Variations in natural quartz stone color, pattern, size, shape, and shade are unique and inherent characteristics of Cambria products. Certain designs include natural free-flowing quartz crystals that may result in surface deviations to the touch and appearance. Color blotches are intended to enhance the natural beauty of many of Cambria's designs. These variations and characteristics do not affect performance and do not qualify for product replacement. Cambria is not a seamless product; seams are visible. Where there are seams, the product pattern and shade will change. Surface markings are more visible on monotone colors than multicolored surfaces. **This distinctive surface reflects a rich finish with a subtly raised texture, adding a powerful tactile dimension. Edges differ in look and feel from the top surface. Mitering extends the top surface to exterior edges.** Cambria is durable and resistant to surface damage. However, all stone can be damaged by force, and no stone is chip and scratch-proof. Objects hitting Cambria's surface, especially at edges near sinks or dishwashers, may chip the product. Sudden and/or rapid temperature change may damage the product. Direct or sustained heat transfer, for example, from pots, pans, and other cooking units such as griddles, slow cookers, and heat lamps, may damage Cambria's surface. Therefore the use of a solid trivet is always recommended. Cambria is not a structural support material and must be supported in every application.
