

# Calma Lounge

Benjamin Hubert

Calma Lounge is a line of reclinable lounge chairs for home and corporate spaces with a cozy design available with an optional wider headrest to create a sense of privacy.

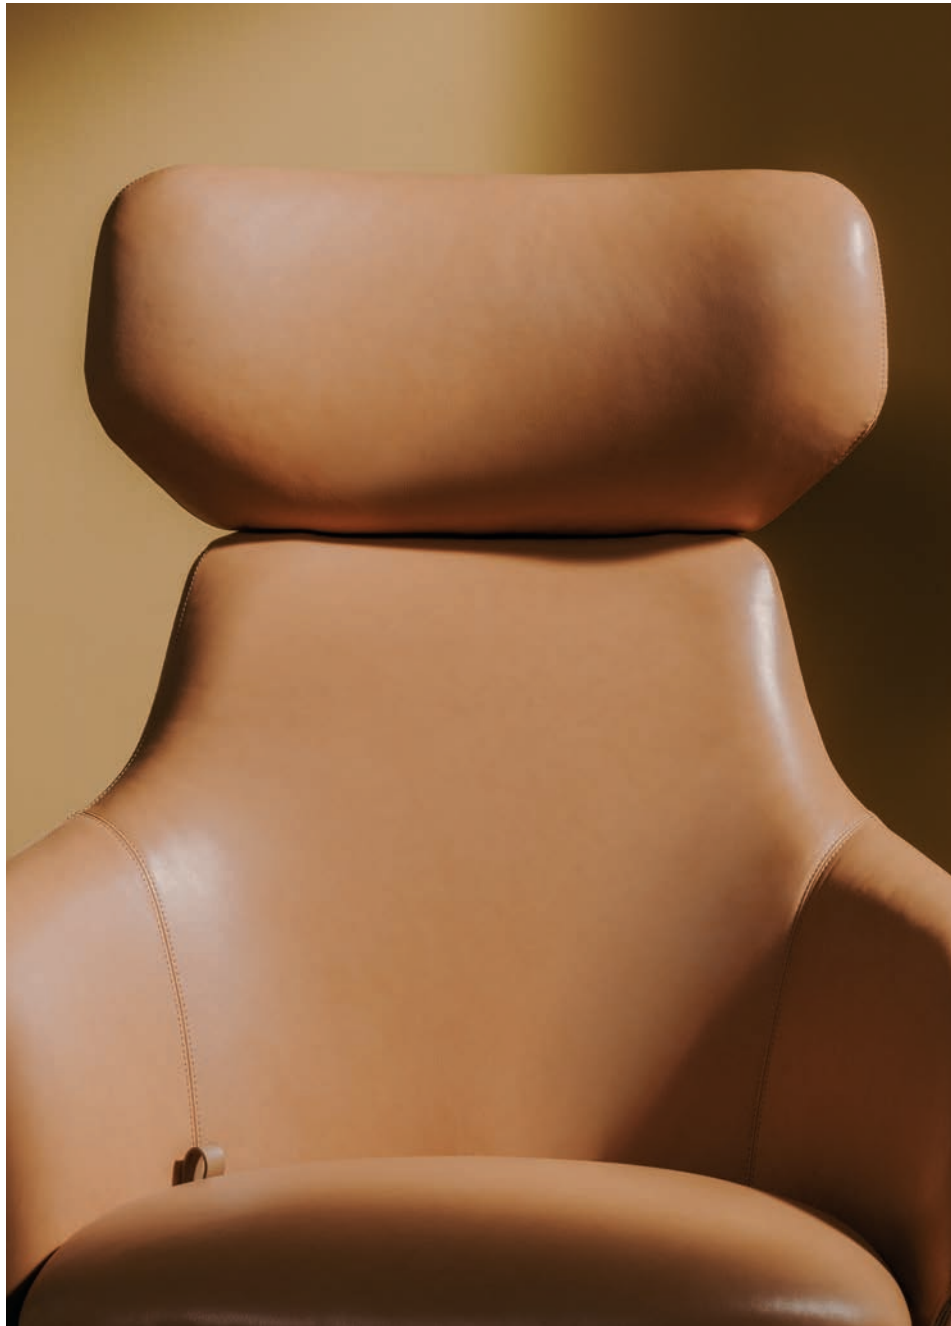

With its softly cushioned interior that wraps around the sitter, this lounge chair elevates waiting spaces and lobbies into havens of tranquility. Its enveloping arms embrace the user, emphasizing whole-body comfort.

With a 4-blade aluminum swivel base, Calma Lounge includes a synchronized reclining system that allows it to lock into any position to respond to ergonomic considerations, being compatible with the whole body regardless of how it is reclined.

The backrest is divided into two parts and it is possible to line the exterior of its backrest in walnut plywood to create a beautiful composition. This chair features an exterior that stands out for its thoughtful and finely worked upholstery coupled with a soft and comfortable interior seat.

Calma Lounge can work individually or together in a wide variety of environments, from residential to corporate, commercial, hospitality or public spaces. This type of quiet space is ideal for reading, watching media, relaxing or working on your laptop. It's like stepping into your own little world.

**BU2330**

Low backed lounge chair with upholstered shell and central aluminum 4-blade swivel base with return system, available finished in polished aluminum, white or black. Walnut wood backrest option.

**BU2331**

High backed lounge chair with upholstered shell and central aluminum 4-blade swivel base with return system, available finished in polished aluminum, white or black. Walnut wood backrest option.

**BU2332**

High backed wing chair with upholstered shell and central 4-blade aluminum swivel base with return system, available in polished aluminum, white or black finish. Walnut wood backrest option.

The seat features a synchronized reclining mechanism that elevates the seat and reclines the backrest for greater comfort. This system can be locked in any position using a leather tab between the cushion and the armrest, allowing the angle of inclination to be adjusted by pulling it.
