

Tarkett FloorprintSM

ETHOS MODULAR

From the time our materials
touch the factory floor
to the moment you walk
through your door, there's

Proof in Every Step

With Tarkett FloorprintSM, our commitment is your empowerment.

Tarkett Floorprint provides a holistic review of each of our products, showing how your selection contributes to the health and well-being of people and planet, while taking action on climate change.

- Manufactured in Georgia
- Zero waste to landfill
- Closed-loop water system
- Carbon neutral upon request

Driving Circular Economy

- 34% Post-consumer recycled content*
- 23% Pre-consumer recycled content*
- Part of ReStart® program for recycling and landfill diversion

*Based on 20 lb face weight. Values will vary depending on pattern face weight.

Transparency in Our Products

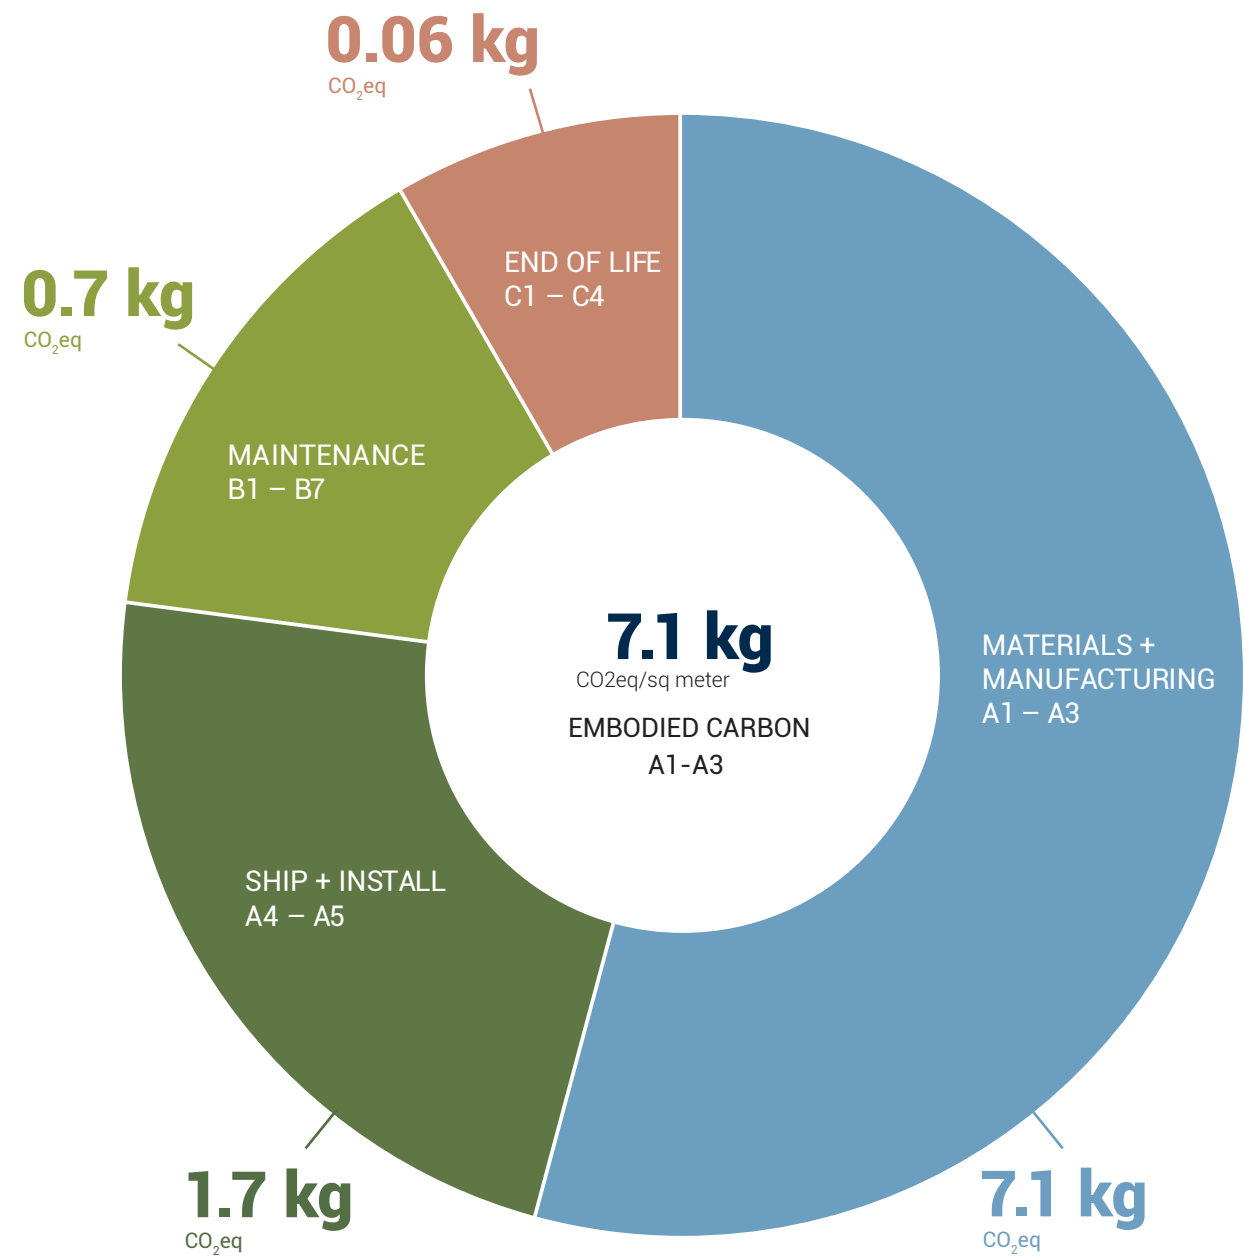

- Product-specific EPD
- Material Health Statement
- Declare®
- NSF 140 Gold
- Buy American Act (BAA) compliant

Indoor Air Quality for Better Health

- Green Label Plus: Meets CA DPH Section 01350

Life Cycle Assessment: ETHOS Modular

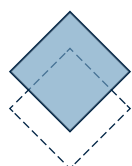

Mindfully manufactured flooring solutions that build in human-centered design and conscious resource use is a driving factor of Tarkett's commitment to people and planet. That's why 95% of the raw materials we use are assessed against Cradle to Cradle principles for human and environmental health.

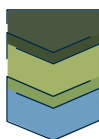

Setting tomorrow's standards for transparency, sustainable manufacturing, and human health

At Tarkett, a world leader in innovative flooring and sports surface solutions, social and environmental responsibility aren't add-ons. They've been woven, stamped and sealed into everything we do for more than 140 years. More importantly, we don't just say this, we prove it by implementing ESG initiatives across our global operations. Proof in Every Step is the three-tiered philosophy that guides how we design floors to create healthy, safe spaces for all who set foot there, inside our walls and out.

Our core values

Setting New
Transparency
Standards

Empowering the
Next Step in the
Value Chain

Creating Healthier
Futures

The global impact of Proof in Every Step

Setting New Transparency Standards

- 43% of total energy consumption comes from renewable energies
- 69% closed-loop recycled water process
- 69% renewable, abundant, or recycled materials
- 41% reduction in Scope 1 & 2 greenhouse gas emissions versus 2019

Discover how we're measuring progress towards our global ESG initiatives and working to mitigate climate change in our 2022 CSR Report.

Empowering the Next Step in the Value Chain

- EcoVadis Gold sustainability rating
- Material Health Statements since 2013
- 17% of raw materials are recycled materials.
- Awarded A- score for "Management level" by CDP climate rating platform
- First flooring manufacturer to join United Nations Global Compact in 2010

BY 2030

Reduce carbon emissions by

30%

Recycled content in product manufacturing

Creating a Healthier Future

We're committed to the climate and the circular economy. We have a climate roadmap and Science Based Target initiative (SBTi) goals. By 2030, we will reduce carbon emissions across our value chain by 30% compared to 2019 numbers, and include 30% recycled content in our product manufacturing.
