A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

Receptacle, 20 Amp

FG153.

Product Information

Description

Notes

Dimensions

This receptacle locks into the power harness of the harness with power + data cover under the chase. It provides power to equipment with a 20-amp standard plug head or cap. It also accepts 15-amp standard plug heads or caps. It is UL Listed and Canadian UL Listed. Package contains 1 receptacle.

Avoid overloading circuit by ensuring total connected load does not exceed 16 amps. If 1 piece of equipment requires all available power, do not use receptacle's second outlet or install additional receptacles on that circuit. In many cases, equipment requiring this receptacle will use all available power. Harness with power + data cover (FG150.) has knockouts above each receptacle location that will need to be removed for proper cover assembly over the 20-amp receptacles.

Canvas Vista™ Accessories

Motia® Vista™ Rectangular Table with DV6GTS T-Foot

Product Information

Description

This rectangular height adjustable table has a T-leg configuration and laminate top with square thermoplastic edge, laminate top with thermoplastic backed plywood edge or veneer top and edge. Multiple height adjustment options come with a simple up/down touch switch, simple up/down paddle switch or with no switch to accommodate adding Live Platform™ to the table. Glides have 1/2" leveling range. Work surface stiffener included for surfaces wider than 54". Shipped knocked down. Product is UL Listed.

Notes

Floor to top-of-surface height adjustment ranges are 27"-46" for the electric standard range (E) option, and 22"-48" for the electric extended range (D) option.

Sizes listed for table depth and width are nominal. Depth of surface is reduced by 1" for cord management. Width of surface is reduced 2" to minimize possible pinch point hazards.

When no under-surface mounted storage (L2SCF., L2SDF.) is used, specify legs outbound (1) location.

To use under-surface mounted storage (L2SCF., L2SDF.) on both ends of the surface, specify legs inbound for under surface storage on both ends (2) location.

To use under-surface mounted storage (L2SCF., L2SDF.) on the right- or left-hand end of the surface, specify legs inbound for under surface storage on left or right end (3) location. This will make the table handed. Surface will come with inbound leg holes; the outbound leg holes will need to be field drilled.

When specifying cable trough (2, 3), trough finish will match table base finish.

When specifying a power access cutout (RC, LC, CC), Logic Mini unit (Y1414.) and grommet (Y1412.) must be ordered separately.

When specifying a 24"D×54"W table with legs inbound for under surface storage on both ends (2) option, the hinged cable trough option is not available. It is recommended to use the (Y1200.48N) cable trough, ordered separately.

If a stiffener is desired for surface widths less than or equal to 54", order work surface stiffener (FV696.) separately.

Order the following optional products separately:

- Vista modesty + privacy screen-double sided, height adjustable table (Y1130.)
- Vista modesty screen-double sided, height adjustable table (Y1131.)
- Suspended cubby (L2SCF.)
- Suspended drawer (L2SDF.)

For additional planning information, see planning guide.

For additional product options, see Vary Easy Program in appendices.

Motia® Vista™ Adjustable Base Kit with T-Foot

DV7GT.

Product Information

Description

This independent 2-leg kit converts existing work surfaces into height adjustable tables. Legs come in 2 depths and multiple widths with a choice of switch type. Glides have 1/2" of leveling range. Kit includes work surface stiffener. Shipped knocked down. Product is UL Recognized.

Notes

With standard 1 1/8" thick work surface, floor to top-of-surface height adjustment ranges are 27"-46" for the electric standard range (E) option, and 22"-48" for the electric extended range (D) option.

Sizes listed for foot depth and base width are nominal. Depth of foot is reduced 1" for cord management when paired with equal depth work surface. Width of base is reduced 2" to minimize possible pinch point hazards when paired with equal width work surface.

To accommodate adding Live Platform™ to the table, specify no switch - LO100 (SMT) option.

For proper installation of leg kit and design information, see planning guide.

Canvas Vista™ Height Adjustable Table

Product Information

Description

This screen attaches to an individual height adjustable work surface. It has a laminate surface with frameless design and comes in privacy and modesty sizes. Attachment hardware included.

Notes

Privacy and modesty panel actual width is 2" less than specified width.

Privacy screen (13A) top edge aligns with the 42"-high Canvas datum line; bottom edge is 4" below work surface.

Privacy & modesty screen (13B) top edge aligns with the 42"-high Canvas datum line; bottom edge is 11 1/8" below work surface.

Screens 54" wide and wider include an additional 1"-wide center mounting bracket.

Recommended mounting creates a 1" gap between back edge of surface and the screen to accommodate cable routing and the attachment or clamp-mounting of other hardware to the surface.

Optional cable management trough is only available when specifying privacy & modesty height option (13B). Trough finish is graphite.

Attachment brackets are inset from edge of screen by approximately 8" and require 2 1/2" of work surface for attachment.

Attachment bracket finish is painted graphite.

Vary Easy Program

Program Overview

The Vary Easy program offers expanded product selections beyond what is available through our standard offering. From expanded material and finish lists, to size availability, to completely new product configurations, the Vary Easy program offers it all at standard pricing, warranty, and lead-time.

Specifying Vary Easy using Made-to-Measure Plus

Vary Easy products are now available by clicking the Vary Easy/Options tile in the Made-to-Measure Plus tool.

Made-to-Measure Plus is a web-based tool available through Omni that takes the guesswork out of specifying products and service parts. It's quickly evolving to become your one-stop shop for specifying Herman Miller products and service parts, particularly customized product like Vary Easy and HM Options.

Vary Easy products are no longer published in marketing SIF for importing into specIT and other third-party specifiers. Specifying through the Made-to-Measure Plus tool allows us to make frequent updates and offer more complex products. It allows you to easily specify and price products and download SIF files to import into your specification tool. The acknowledgement process for Vary Easy products is the same as for any standard order. Vary Easy products ship with a standardized lead-time and are competitively priced.

For step-by-step instructions, reference the Made-to-Measure Plus page under Tools & Resources on Omni to watch the how-to video and to see how easy it is to specify Vary Easy products in Made-to-Measure Plus.

For Vary Easy product and specification questions, contact Product Services at 866 854 3048 (ext #1).

For technical questions about the Made-to-Measure Plus tool, contact Sales Technology Support at 866 854 3048 (ext #4) or sts@hermanmiller.com.
