A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

Product Information

Description

This tile attaches to 1 side of a frame and has a painted metal or tackable fabric surface. It is available with or without power and data access at the top and/or bottom power locations. Tile is UL listed and NFPA classified. Attachment hardware included.

Notes

Specify width of tile to match width of frame (FZ110.).

To access power and data, order power harness (FZ152.) separately.

For tackable fabric tile with cutouts for hardwired junction boxes (meets Chicago electrical code requirements), specify (O), (P), (Q), (S), (T), (U), (V), (W), or (X) cutout location options.

Painted metal tile with cutouts for hardwired junction boxes already meets Chicago electrical code requirements.

Tiles 24" wide and 30" wide do not support power and data access.

Tiles 36"-54" wide support power and data access at left-hand top and right-hand top of tile only.

Tiles 78" wide cover joined 48"- and 30"-wide frame pairs; power and data access is on 48"-wide frame side only.

Tiles 84" wide cover 2 42"-wide frames.

Tiles 96" wide cover 2 48"-wide frames.

When specifying tackable fabric, horizontal (R) option, fabric direction is horizontal (railroaded). Specify all tiles within the workstation to be the same fabric direction.

Fabric-covered tile accepts Customer's Own Material (COM). Yardage is estimated for directional, 54"-wide fabrics.

Height—Yardage

22"—0.70

29"—0.90

Product Information

Description

This steel frame defines space and channels power and data to the user. Frame holds individual tiles on both sides.

Notes

When finished with cladding, Channel structure is 3" thick.

With feet added, Channel frame sits 4" off the floor. Frame can be clad to have an open base or tiles to-the-floor.

24" and 30"-wide frames cannot support access to power.

Power can enter from bottom opening using an internal direct connect-floor (FZ144.), from a receptacle location using an external direct connect (FZ140.), or from the end of Channel using a ceiling power entry (FZ142.), ordered separately.

Frames of unequal height cannot connect to each other.

Order the following products separately:

- Frame-to-frame connection hardware (FZ128.)
- Structural and nonstructural feet (FZ119., or FZ117.)
- To-the-floor or open base tiles (FZ375., or FZ170.)
- Standard or architectural top cap (FZ112., or FZ11A.)
- Standard or architectural finished end (FZ160., or FZ16A.)
- Power harness (FZ150.)
- Power jumper (FZ154.)

For cable capacity information, see Cable Capacity Charts in Omni.

Product Information

Description

This tile attaches to 1 side of a frame and has a painted metal or tackable fabric surface. It is available with or without power and data access at the top power location. Tile is UL listed and NFPA classified. Attachment hardware included.

Notes

Specify width of tile to match width of frame (FZ110.).

To access power and data, order power harness (FZ152.) separately.

For tackable fabric tile with cutouts for hardwired junction boxes (meets Chicago electrical code requirements), specify (O), (P), or (Q) cutout location options.

Painted metal tile with cutouts for hardwired junction boxes already meets Chicago electrical code requirements.

Tiles 24" wide and 30" wide do not support power and data access.

Tiles 36"-54" wide support power and data access at left-hand top and right-hand top of tile only.

Tiles 78" wide cover joined 48"- and 30"-wide frame pairs; power and data access is on 48"-wide frame side only.

Tiles 84" wide cover 2 42"-wide frames.

Tiles 96" wide cover 2 48"-wide frames.

When specifying tackable fabric, horizontal (R) option, fabric direction is horizontal (railroaded). Specify all tiles within the workstation to be the same fabric direction.

Fabric-covered tile accepts Customer's Own Material (COM). Yardage is estimated for directional, 54"-wide fabrics.

Height—Yardage

22"—0.60

Stain-to-Match Program

Stain-to-Match Program

Program Overview

The Stain-to-Match program gives you the option of using veneer finishes that are not listed in the standard offering. The program allows Herman Miller to match a customer's existing recut or natural veneer, or create a new finish that is unique to an installation.

Specific information on approval, ordering, pricing, and warranty for the Stain-to-Match program is listed below. Questions and requests for assistance may be directed to Herman Miller Options at: (800) 654 3910

Stain-to-Match Process

1. Fill out the Options Stain-to-Match Request Form and send along with a color sample (2" x 3" minimum) to the Herman Miller Options Applications Team at the address provided on the form. The form can be found on Omni.
2. Within 7-10 working days, Herman Miller Options will send a sample of the color-matched stain on Herman Miller veneer to the requester for the customer's signed approval.
3. If the sample meets the customer's approval, sign the reverse side of the sample, scan and email the approval to: options@hermanmiller.com.
4. After the stain has been approved, a formal quotation with special number and pricing can be provided, or the product can be specified through the Vary Easy program, if available. Work with the Options team on final product needs and how to specify.
5. A purchase order can then be placed.

Stain-to-Match Warranty

Herman Miller warrants its products to be free from defects in craftsmanship from the date of delivery for the applicable warranty period. Herman Miller is responsible for the physical properties of the veneers available through the Stain-to-Match program, which include:

- STA: Stain-to-Match on Recut Ash
- STC: Stain-to-Match on Cherry
- STD: Stain-to-Match on Oak
- STK: Stain-to-Match on Reltech Anigre (Geiger)
- STP: Stain-to-Match on Maple

Program Overview

The Customer's Own Material (COM) program gives you the option of using textiles other than those listed. Herman Miller will test textiles for application to Herman Miller products and will process orders for those with approved COM textiles only. COM textiles are on assigned lead times.

Omni lists an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for COM is listed below. Questions about the COM program and requests for assistance may be directed to your COM representative at:

(616) 654 3400

(866) 854 3048 ext 6543400

Customer's Own Material Warranty

Herman Miller does not warrant COM textiles. COM textiles are tested for application only; they are not tested for performance. The Herman Miller warranty does apply to the underlying products.

Suppliers of COM textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

Customer's Own Material Pricing

COM is a Category 1 fabric. There are no application charges for COM fabrics.

Ordering and payment for COM textile yardage are the responsibility of the customer and the textile supplier.

If desired, Herman Miller will purchase COM textiles directly from Maharam, Camira, C.F. Stinson, Guilford of Maine, Luna Textiles, Momentum Textiles and Ultrafabrics to simplify ordering and shipment. For this service, refer to the Supplier Connection program in Omni.

Application Note

Herman Miller does not guarantee that Customer's Own Material (COM) fabric patterns will align across panels/tiles or from one screen to the next. We also do not guarantee that COM fabric designs will be positioned consistently in the same location across several panels, tiles, or screens.

Textile Approval

1. Select a COM textile and a Herman Miller product.
2. If your textile does not show as tested in Omni, submit a request. You will be required to select a specific color of the textile and feature of the product to test, i.e., seat, back, etc.
3. Herman Miller will notify you of approval or disapproval within 4 days from receipt of the test yardage.

Ordering Products with COM

1. Refer to the specific products to determine the yardage required for COM textiles.
Note: Yardage requirements are based on nondirectional, 54"-wide textiles. 66"-wide textiles are needed for application on 60"-wide products. Additional yardage may be needed due to the unique characteristics of a textile.
2. Obtain the COM ID# in Omni. If the color you are ordering does not have a COM ID# assigned, click "Create ID".
3. Enter your order on Order Manager in Omni.
4. Upon receipt of your purchase order, Herman Miller will send you a PO acknowledgment.
5. Arrangements must be made for the textiles to be shipped from the supplier to Herman Miller for application to the Herman Miller products. Textiles must be tagged with the assigned identification number and the roll yardage quantity. See Omni for shipping procedures and current shipping addresses or contact a COM representative at (616) 654 3400 or (866) 854 3048 ext 6543400.

Products will be scheduled for production when COM textiles are received at Herman Miller. Standard lead times in effect at that time will apply.

Note: If textiles are to be purchased directly by Herman Miller through the Supplier Connection program, Herman Miller will handle the ordering and shipping process and will schedule your order for production upon receipt of your purchase order (dependent on textile availability). Refer to the Supplier Connection program for more information.

Supplier Connection

Program Overview

The Supplier Connection program is a service offered by Herman Miller to purchase approved COM textiles directly from Maharam, Camira, C.F. Stinson, Guilford of Maine, Luna Textiles, Momentum Textiles and Ultrafabrics. When you select a textile through this program, Herman Miller will facilitate the ordering, scheduling, and shipment of the textile directly with the supplier.

Suppliers included in the Supplier Connection program keep an active inventory of textiles that are pre-approved for application to Herman Miller products. Pre-approval applies only to the suitability of a textile for manufacturing and application to a Herman Miller product. Omni provides an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for the Supplier Connection program is listed below. Questions and requests for assistance may be directed to your COM representative at:

(616) 654 3400

Supplier Connection Pricing

Textiles purchased by Herman Miller through the Supplier Connection program are COM. COM is a Category 1 fabric. There are no application charges for COM fabrics.

Payment for textiles purchased by Herman Miller through the Supplier Connection program is the responsibility of the customer or dealer. Herman Miller will invoice the order at a total product cost based on the supplier's price published at the time of the order.

Textile Approval

1. Select a COM textile and a Herman Miller product.
2. If your textile does not show as tested in Omni, submit a request. You will be required to select a specific color of the textile and feature of the product to test, i.e., seat, back, etc.
