A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

General Information

This book is effective February 3, 2025, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www.HermanMiller.com.

All prices are list prices. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest 1/8". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

Description

This frame holds individual tiles on both sides. Each frame has a standard top cap, cable management side covers, and adjustable glides. Cable management side covers are made of fire-retardant polyvinyl chloride (PVC). The powered frame has a factory-installed electrical harness that distributes double-sided, 4-circuit power within a cable management raceway. Electrical components are UL listed and CSA certified.

The nonpowered, hard-wired frame has cable management side covers with access holes on 1 side that accept standard-size rectangular receptacles. It also has predrilled holes at the top of the frame for countertop supports (38"-high frame only).

Notes

Order draw rod (E1120.) separately.

When connecting 2 frames of unequal heights, order the following separately:

- Change-of-height finished end (E1251.)
- Draw rod (E1120.) to match height of lower frame

For information, see Ethospace® Planning Guide.

When connecting 2 frames to a 2-way connector, order 1 additional draw rod (E1120.) separately; 2-way connectors include 1 draw rod.

For veneer, architectural, or monorail frame top cap, or for workstation countertop, specify "NN" for top cap finish; order top cap (E1260.) or monorail (E1267.) separately.

For powered frame, order 4-circuit receptacle (E1311.) separately.

For metal barrier between electrical wires and voice/data cables, order cable/energy barrier (E1380.) separately.

For nonpowered hard-wired workstations with 2 receptacle locations per interior side (power option H), 2 different base covers are included: 1 with 2 receptacle openings and 1 with no receptacle openings. If access to power on both sides is required, 1 additional base cover with receptacle openings must be ordered from service parts.

When plastic wire management clip is needed, order service part (232776 (set of 100)) separately.

For workstation with option 2 electrical, specify hard-wired frame.

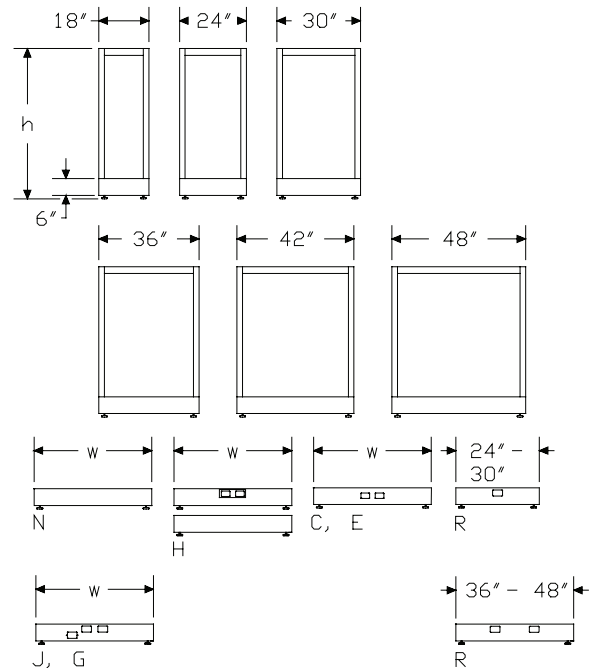

Hard-wired frame can be used with older R-style frame.

**Product Information****Description**

This structural panel stands on the floor and attaches to an Ethospace® frame to provide end of run support and privacy. It is 1¼" thick and has a laminate or veneer surface. Leveling glides and attachment hardware included.

Notes

Gallery panels 24"-72" wide are a single panel; 84"-144" wide are a 3 panel construction.

Maximum frame height is 62" and maximum gallery panel change of height is 24" (example: 62"-high frame with minimum of 32"-high gallery panel).

Minimum length of run is 6' and maximum length of run is 10'. When using components, gallery panel must match or exceed depth of worksurface; when using no components, gallery panel must be a minimum of 48" wide.

Maximum number of components per side is 1 worksurface and 1 overhead.

Attachment direction is determined by facing the gallery panel from outside the workstation. Left attachment (L) connects the left side of a gallery panel to the end of a frame. Right attachment (R) connects the right side of a gallery panel to the end of a frame. Mid attachment (M) connects the middle of a gallery panel to the end of a frame.

Mid-attached gallery panels are 3½" wider than nominal dimensions.

29" high gallery panel cannot be used with a 30" frame.

When connecting a 29"-high gallery panel to a 38"-high frame, order a Finished End, for use with Gallery Panel (E1251G.09) separately; when connecting a 29"-high gallery panel to a 46"-high frame, order a Finished End, for use with Gallery Panel (E1251G.17) separately.

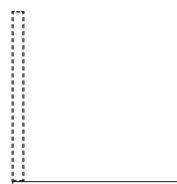

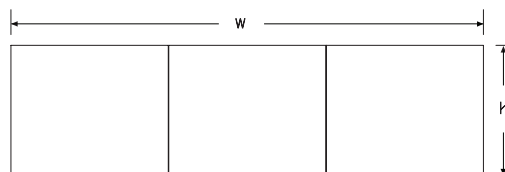

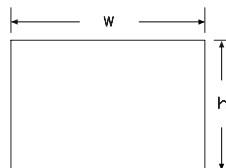

When connecting a 30", 38", or 46"-high gallery panel to a taller frame, order a Finished End, Change of Height (E1251.) separately.

Leveling glides provide 2" of adjustment.

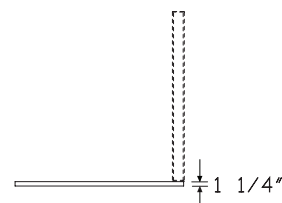

Grain direction is vertical on veneer, wood-grain and directional laminates.

Wood-grain and directional laminates are not available on 60"-72" wide gallery panels and are not a recommended application when using ZZ open line wood-grain or directional laminates.

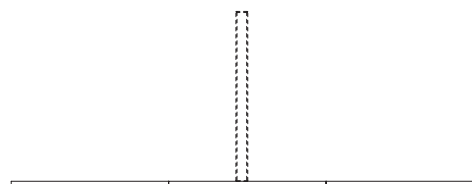

For additional product options, see Vary Easy Program in appendices.

Ethospace® Walls

Product Information

Description

This sliding door provides enclosure and added privacy to a workstation. It has an aluminum frame, urethane wheels, and a fabric or plastic infill. The door attaches to an equal-height frame and is specified to close to the left or right. The lock option locks the door from outside the workstation; a built-in safety feature allows the door to be unlocked from the inside. The floor track minimizes wear on carpet and ensures proper alignment to locking post. Floor track finish is anodized aluminum.

Door handle and lock assembly conform to the Americans with Disabilities Act (ADA) guidelines.

Notes

- Door and adjacent frames must be the same height.
- Door attachment is identified when facing the door from outside the station.
- A left (L6) door attaches to a frame on the left. A right (R6) door attaches to a frame on the right.
- Door direction cannot be reversed in the field.
- Fluted translucent infill option (FW) has a Class A fire-retardant rating.
- For fluted translucent infill option (FW), flute direction is vertical.
- For appropriate planning guidelines, see Ethospace Privacy Door Planning Guide.
- For keyed-alike locks, order lock plugs separately. See Keyed-Alike Information in Appendices.

Product Information

Description

This spacer joins 2 frames of equal or unequal heights in a straight line and compensates for dimensional gain in a wall run. It has 2 cable management side covers and includes attachment hardware. The spacer has vinyl, vinyl/fabric, fabric, or veneer surfaces; the vinyl/fabric-covered spacer has vinyl on one side and fabric on the other side. Vinyl-, vinyl/fabric-, and fabric-covered connectors have a standard top cap, and the veneer connector has a veneer top cap. The veneer spacer is 1" higher than the vinyl- or fabric-covered spacer.

Notes

When connecting frames of unequal heights, specify spacer height to match height of higher frame.

When frame is not same height as spacer, order change-of-height finished end (E1251.) separately.

To pass power through connector at beltline, order connector pass-through harness (E1356.) separately.

For metal barrier between electrical wires and voice/data cables, order cable/energy barrier (E1381.) separately.

To order veneer squared radius top cap for vinyl-, vinyl/fabric-, or fabric-covered spacer, specify "NN" for top cap finish; order top cap (E1261.1V) separately.

Veneer squared radius spacer has a veneer top cap. When using veneer spacer, order veneer squared radius frame top cap (E1260.V) separately for adjacent frame.

When using architectural trim, order bare connector (E1219.).

Vinyl/fabric- and fabric-covered spacers accept Customer's Own Material (COM). Yardage is estimated for nondirectional, 54"-wide fabrics and for 1 to 4 units.

This harness is used with 1 or 2 cable access or cable channel tiles. It distributes up to 4 20-amp circuits, provides 2 receptacle access locations on each side of a frame, and includes a support bar for attaching the harness to a frame. The harness is UL listed and CSA certified.

Notes

To extend power through a 135° corner connector, specify power connection with 1 extended end (E1).

To extend power through 2 135° corner connectors and a 48"-wide frame, specify power connection with 2 extended ends (E2).

Order 4-circuit receptacle (E1311.) separately.

For power harness at first 8"-high tile location above powered base, use 4-circuit tile-height harness (E1357.). 4-circuit beltline harness (E1353.) is not recommended for first 8"-high tile location on powered base; E1353. may be used on nonpowered base.

To connect power from 1 harness to another harness within the same frame, order 4-circuit power jumper (E1341.) separately.

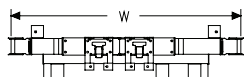

For receptacle access, order cable access tile (E1436.) separately.

When receptacle access is not needed, order cable channel tile (E1433.) separately.

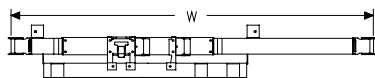

To provide barrier between electrical wires and voice/data cables routed through frame, order cable/energy barrier (E1380.) separately.

An open tile or glass tile cannot be placed directly below this harness.

Floor-Length Face TileE1420.

Ethospace® Walls

Product Information

Description

This monolithic tile attaches to 1 side of a frame or to wall strips. It extends to the floor and replaces the side cover. The tile has a painted or fabric surface.

Notes

Larger width tiles can span 2 smaller width frames.

Floor-length face tile is designed for use with bare frames. If used on standard frame, base hinge plates may need to be removed or field modified. A power harness will not fit in frame locations that have a floor-length face tile on the same side.

Power cannot be accessed or distributed in a frame when floor-length face tiles are used on both sides and the tile size matches frame size. When tile height is less than frame height, power can be placed above floor-length face tile.

Power can be distributed through a frame location on the opposite side of the floor-length face tile using a power harness or a pass-through harness (E1342.).

Floor-length face tiles cannot be used adjacent to a powered connector at the inside corner.

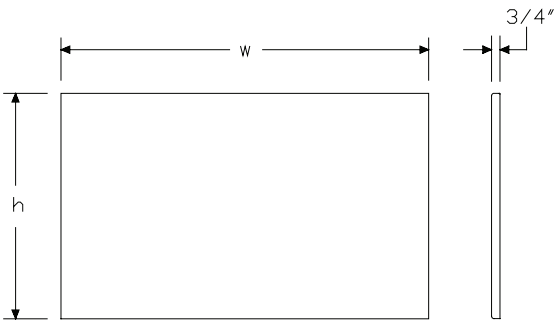

Fabric-covered tile accepts Customer's Own Material (COM). Yardage is estimated for nondirectional, 54"-wide fabrics.

Laminate and veneer surfaces are 1 1/4" thick. Painted Formcoat® surfaces are 1" thick. There is a 1" gap at the back of the surface for standard plug head and cord passage.

Notes

For additional size, shape, cable management, and finish options, see Vary Easy Program in Appendices.

For surface attachment bracket (D) option:

Ganging brackets are included for using the surface as a bridge. Surface will only attach to front edge of squared edge surface.

For Ethospace® frame attached surface (F) option:

Order appropriate supports separately; 2 supports are required for each surface (left and right side):

- Work surface support panel, end, glides (E2290.)
- Work surface support panel, mid run, glides (E2291.)
- Open return work surface support (E1142.)
- Work surface support, single (E2393.)
- Surface support rail (E2395.)
- Work surface bracket (E2931.)

• Support pedestal

To hang work surface from frame or wall strips, specify on-module (SM) work surface support (E2393.); to hang work surface from off-module lower tile, specify off-module (OM) work surface support (E2393.).

Center supports are included for surfaces 54" wide and wider.

24"- and 30"-deep laminate and veneer squared-edge surfaces have pre-drilled holes for a pencil drawer or suspended pedestals. 24"- and 30"-deep painted formcoat surfaces have pre-drilled holes for pencil drawers.

Suspended pedestals cannot attach to painted formcoat surfaces.

Storage products, except pencil drawer, cannot mount under work surface in off-module application.

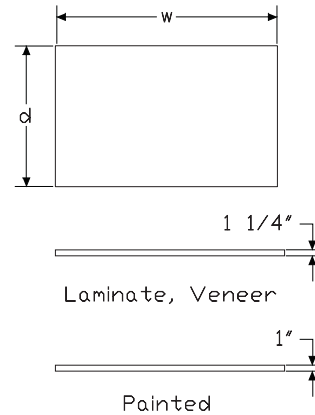

Stiffener (FV696.) is required for any laminate or veneer surface 54" wide or wider and painted formcoat surfaces 48" wide or wider that cannot use a center cantilever.

See Ethospace work surface planning guide for specific guidelines.

Open Return, Work Surface/ Understructure Support

E1142.

Product Information

Description

This metal open return attaches to a work surface and a frame or wall strip. It provides support and eliminates the need for a return frame, tiles, finished end, and connector. The open return has preset locations to adjust the work surface height from 27 1/2" to 31 1/2" and has 1 1/2" adjustable glides. Attachment hardware is included.

The work surface or on-module peninsula without cable management trough (A) attaches under a work surface at mid-run or at the left or right end of a frame; it includes 4 support brackets. The work surface or on-module peninsula with cable management trough (C) attaches under a work surface at mid-run or at the left or right end of a frame; it includes 5 support brackets. The 24" and 30" deep open returns can also be used with a work surface support understructure and a corner work surface, extended corner work surface, or peninsula in a wall-supporting application.

Ethospace® Work Surfaces

Open Support, Architectural Foot, Frame Attached

E2387.

Product Information

Description

This support leg attaches to a surface and a frame to provide surface support and end or mid-run support to a frame run. The fixed-height leg has a 2" leveling range allowing a surface height of 28 1/2" - 30 1/2". The adjustable-height leg adjusts over a 6" range allowing a surface height of 25 1/2" - 31 1/2". Attachment hardware included.

Notes

Maximum frame height is 62".

Maximum number of components per side is 1 worksurface and 1 overhead.

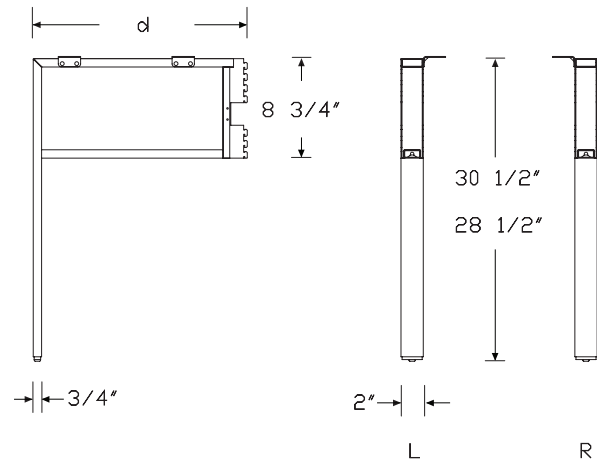

For end-of-run support, match depth of open support to depth of surface.

36" deep leg supports a bowtie rectangular surface (EWx18.) only.

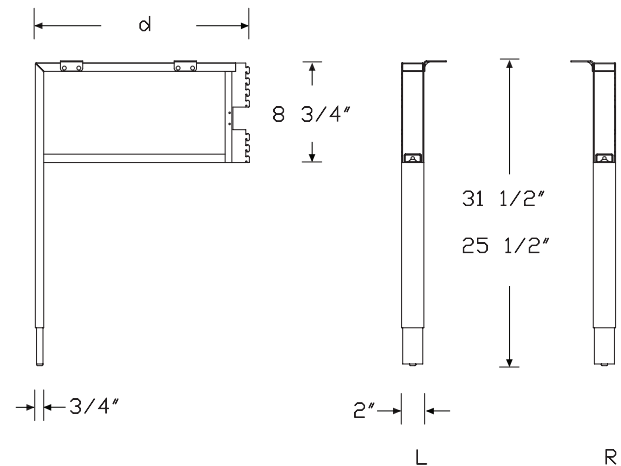

Minimum length of run is 6' and maximum length of run is 10'. When using 20" deep (20) or 24" deep (24) open supports at the end of a run, the application must be a back-to-back application. 30" deep (30) and 36" deep (36) will support a single-side application.

To extend the length of a run beyond 10', open supports can be used between end supports for frame runs 10' 6" or longer. Specify 20" deep (20) support for 24"-deep surface and 24" deep (24) support for 30"-deep surface.

Notes

Counter top attaches to frame with standard or veneer top cap.

To finish rectangular end of counter top, order 1 or more of the following counter tops separately:

- Corian counter top: round/rectangular end (E2841.) or double rectangular end (E2844.)
- Corian corner counter top, round/rectangular end: 90° corner (E2843.) or 135° corner (E2842.)
- Corian corner counter top, double rectangular end: 90° corner (E2846.) or 135° corner (E2845.)

Surfaces with rectangular ends (E2841., E2842., E2843., E2844., E2845., and E2846.) have unfinished ends and should not be used as stand-alone tops.

When using architectural trim top caps, order the following Service Part hardware packs to stabilize the counter top:

- Part #UEY42X for painted architectural top cap
- Part #UEY42W for veneer architectural top cap

For E2841/E2844:

- 27"-33" wide counter tops require 2 hardware packs
- 36"-57" wide counter tops require 3 hardware packs
- 60"-75" wide counter tops require 4 hardware packs
- 78"-96" wide counter tops require 5 hardware packs

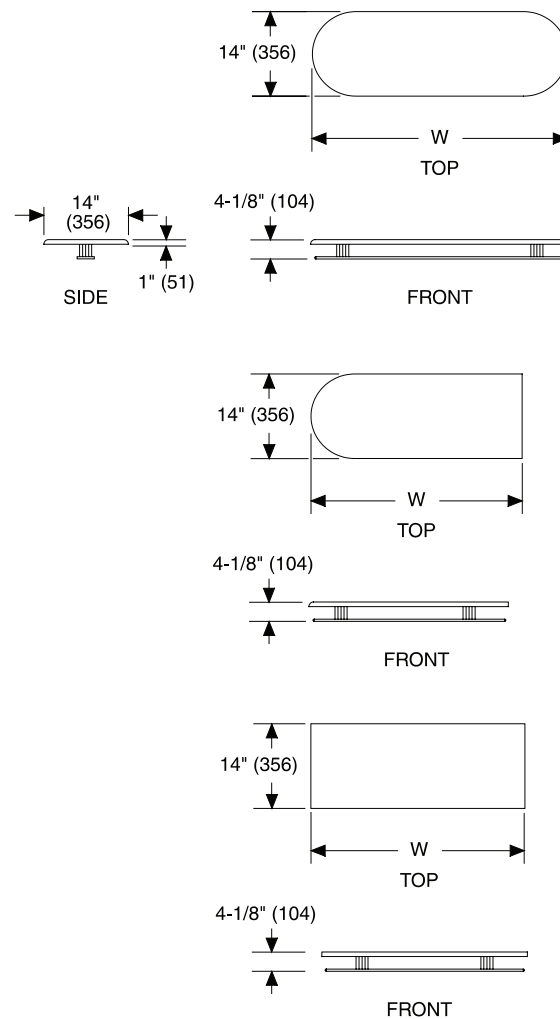

For E2840:

- 24"-36" wide counter tops require 2 hardware packs
- 42"-60" wide counter tops require 3 hardware packs
- 66"-78" wide counter tops require 4 hardware packs

Field seaming of Corian countertops must be done by trained Corian installer.

Rectangular Corian ends are unfinished in order to be seamed in the field.

Vary Easy Program

Program Overview

The Vary Easy program offers expanded product selections beyond what is available through our standard offering. From expanded material and finish lists, to size availability, to completely new product configurations, the Vary Easy program offers it all at standard pricing, warranty, and lead-time.

Specifying Vary Easy using Made-to-Measure Plus

Vary Easy products are now available by clicking the Vary Easy/Options tile in the Made-to-Measure Plus tool.

Made-to-Measure Plus is a web-based tool available through Omni that takes the guesswork out of specifying products and service parts. It's quickly evolving to become your one-stop shop for specifying Herman Miller products and service parts, particularly customized product like Vary Easy and HM Options.

Vary Easy products are no longer published in marketing SIF for importing into specIT and other third-party specifiers. Specifying through the Made-to-Measure Plus tool allows us to make frequent updates and offer more complex products. It allows you to easily specify and price products and download SIF files to import into your specification tool. The acknowledgement process for Vary Easy products is the same as for any standard order. Vary Easy products ship with a standardized lead-time and are competitively priced.

For step-by-step instructions, reference the Made-to-Measure Plus page under Tools & Resources on Omni to watch the how-to video and to see how easy it is to specify Vary Easy products in Made-to-Measure Plus.

For Vary Easy product and specification questions, contact Product Services at 866 854 3048 (ext #1).

For technical questions about the Made-to-Measure Plus tool, contact Sales Technology Support at 866 854 3048 (ext #4) or sts@hermanmiller.com.

Stain-to-Match Program

Program Overview

The Stain-to-Match program gives you the option of using veneer finishes that are not listed in the standard offering. The program allows Herman Miller to match a customer's existing recut or natural veneer, or create a new finish that is unique to an installation.

Specific information on approval, ordering, pricing, and warranty for the Stain-to-Match program is listed below. Questions and requests for assistance may be directed to Herman Miller Options at:
(800) 654 3910

Ordering Products with Stain-to-Match Veneers

1. Fill out the Options Stain-to-Match Request Form and send along with a color sample (2" x 3" minimum) to the Herman Miller Options Applications Team at the address provided on the form. The form can be found on Omni.
2. Within 7-10 working days, Herman Miller Options will send a sample of the color-matched stain on Herman Miller veneer to the requester for the customer's signed approval.
3. If the sample meets the customer's approval, sign the reverse side of the sample, scan and email the approval to:
options@hermanmiller.com.
4. After the stain has been approved, a formal quotation with special number and pricing can be provided, or the product can be specified through the Vary Easy program, if available. Work with the Options team on final product needs and how to specify.
5. A purchase order can then be placed.

Stain-to-Match Warranty

Herman Miller warrants its products to be free from defects in craftsmanship from the date of delivery for the applicable warranty period. Herman Miller is responsible for the physical properties of the veneers available through the Stain-to-Match program, which include:

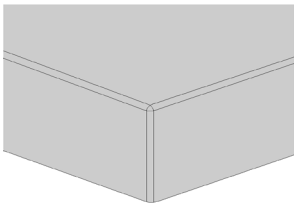

- STA: Stain-to-Match on Recut Ash
- STC: Stain-to-Match on Cherry
- STD: Stain-to-Match on Oak
- STK: Stain-to-Match on Reltech Anigre (Geiger)
- STP: Stain-to-Match on Maple
- STU: Stain-to-Match on Walnut (Geiger)

Customer's Own Material

Program Overview

The Customer's Own Material (COM) program gives you the option of using textiles other than those listed. Herman Miller will test textiles for application to Herman Miller products and will process orders for those with approved COM textiles only. COM textiles are on assigned lead times.

Omni lists an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for COM is listed below. Questions about the COM program and requests for assistance may be directed to your COM representative at:

(616) 654 3400

(866) 854 3048 ext 6543400

Customer's Own Material Warranty

Herman Miller does not warrant COM textiles. COM textiles are tested for application only; they are not tested for performance. The Herman Miller warranty does apply to the underlying products.

Suppliers of COM textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

Customer's Own Material Pricing

COM is a Category 1 fabric. There are no application charges for COM fabrics.

Ordering and payment for COM textile yardage are the responsibility of the customer and the textile supplier.

If desired, Herman Miller will purchase COM textiles directly from Maharam, Camira, C.F. Stinson, Guilford of Maine, Luna Textiles, Momentum Textiles and Ultrafabrics to simplify ordering and shipment. For this service, refer to the Supplier Connection program in Omni.

Application Note

Herman Miller does not guarantee that Customer's Own Material (COM) fabric patterns will align across panels/tiles or from one screen to the next. We also do not guarantee that COM fabric designs will be positioned consistently in the same location across several panels, tiles, or screens.

Textile Approval

1. Select a COM textile and a Herman Miller product.
2. If your textile does not show as tested in Omni, submit a request. You will be required to select a specific color of the textile and feature of the product to test, i.e., seat, back, etc.
3. Herman Miller will notify you of approval or disapproval within 4 days from receipt of the test yardage.

Ordering Products with COM

1. Refer to the specific products to determine the yardage required for COM textiles.
Note: Yardage requirements are based on nondirectional, 54"-wide textiles. 66"-wide textiles are needed for application on 60"-wide products. Additional yardage may be needed due to the unique characteristics of a textile.
2. Obtain the COM ID# in Omni. If the color you are ordering does not have a COM ID# assigned, click "Create ID".
3. Enter your order on Order Manager in Omni.
4. Upon receipt of your purchase order, Herman Miller will send you a PO acknowledgment.
5. Arrangements must be made for the textiles to be shipped from the supplier to Herman Miller for application to the Herman Miller products. Textiles must be tagged with the assigned identification number and the roll yardage quantity. See Omni for shipping procedures and current shipping addresses or contact a COM representative at (616) 654 3400 or (866) 854 3048 ext 6543400.
Products will be scheduled for production when COM textiles are received at Herman Miller. Standard lead times in effect at that time will apply.

Note: If textiles are to be purchased directly by Herman Miller through the Supplier Connection program, Herman Miller will handle the ordering and shipping process and will schedule your order for production upon receipt of your purchase order (dependent on textile availability). Refer to the Supplier Connection program for more information.

Customer's Own Image (COI) Order Information

Customer's Own Image

Program Overview

The Customer's Own Image (COI) program allows designers to develop customized images that are digitally printed on Ethospace® fabric screens. Examples of COI design applications are available through the Ethospace brochure, HermanMiller.com, or Omni.

Specific information on the terms and conditions, warranties, and order processes for COI is listed below.

Textile

The textile is 100% polyester. The base fabric color is white.

Warranty

Herman Miller warrants the base textile for a period of one year. COI textiles are not warranted for color consistency. Consistency will be maintained within commercial tolerance, UV stability, and resistance to soiling.

Visual color range is determined by multiple factors including lighting, application process, and image files.

Application Note

Herman Miller does not guarantee that images will be positioned the same across multiple screens or that images will align from one screen to the next.

Material Pricing

COI upcharges are listed with each product.

Customer's Own Image (COI)

For COI information, contact the Herman Miller COM Department at (866) 854 3048 ext 6543400. COI design specifications and ordering information can be found on HermanMiller.com or Omni. Orders are processed through Vary Easy. See Vary Easy Program in Appendices.
