

13EIGHTY

PRODUCT FACT SHEET

13EIGHTY

DESIGN BY SCHOLTEN & BAIJINGS, 2014

HAY's 13Eighty chair designed by Dutch designers Scholten & Baijings is aptly named after the number of tiny holes in the molded polypropylene shell. These perforations create a characteristic aesthetic, where transparency and a play of light and shadows add to the chair's expression, while the variations in the sizes of the holes bring a sense of movement to the visual appearance. They also have a functional use in draining rainwater off when the chairs are used outdoors. Available with or without armrests in a stackable design that features steel legs with a weather-resistant coating to make it suitable for outdoor use.

HIGHLIGHTS

- Molded plastic shell with steel legs.
- Available with or without armrest.
- The base has a two-component primer coating and outdoor powder finish that provide a protective barrier against corrosive elements, making it ideal for both private and public environments.
- Variability of shell colors and base finishes.
- Stackable up to 10 pcs.
- Suitable for a wide variety of private and public environments.
- Qualified for contract use.
