Product Data Sheet

This is a reinforced cast stone bench with a radial biomorphic design in two formats installed to create a subtle play of similarities and differences. The design enables users to sit in pairs to engage socially or alone to preserve intimacy. This large, visually arresting bench is ideal for installation in entrance courtyards, open plazas and other places where people meet.

Flor

- Flor is a backless stone freestanding element, cast in small or large units.
- Its weight allows freestanding installation.
- Flor is made of Cast Stone, is offered in acid-etched/waterproofed finish, and comes in Grey, Black, White, and Beige.

Material

- Reinforced Cast Stone is cast stone that is poured and cast over an iron re-bar cage built to fit within the walls of the mold.
- Reinforced Cast Stone makes it possible to cast thinner, irregularly shaped forms while retaining appropriate strength.
- The colors of Escofet cast stone products are neutral, muted and earth-toned and are derived from the aggregates used in casting.
- No color is added in manufacture and no color is applied to finished products.
- The color range of every Escofet cast stone product is pre-determined by the formulation used in its manufacture.
- Cast stone products do not require any specific maintenance during their estimated lifespan of more than 30 years.
- Water absorption and freeze-thaw cycles can cause weathering, a reproduction of the process that takes place in natural rock.
- Escofet applies a waterproof finish to its products to protect against this process.
- Escofet cast stone products are large and heavy.
- Shipping, receiving, staging and installing these pieces is more akin to handling large statuary or pre-fabricated architectural elements.
- See installation guide for important information.
