Buncha

Introducing Buncha™, the new collection from Keilhauer. Combining clean, mobile design with safe, sustainable materials, Buncha provides easy solutions for environmentally conscious work spaces.

Building healthy environments

At Keilhauer, we believe that the health of people is directly related to the health of the product, which is why our designers, engineers and sustainability experts work closely to ensure that our products are developed with the utmost care for our employees, our customers and the environment. All of the ingredients we use in our products are assessed against a number of rigorous hazard lists to ensure that they only include benign, healthy, materials that are safe to the consumer.

The Buncha collection is manufactured without the use of PVC, Red List chemicals and flame retardants that produce off-gassing and are a contributing factor to poor air quality. The products are also manufactured using recycled material and Forest Stewardship Council® (FSC®C117042) Certified wood, ensuring that the materials we use contribute to the sustainable management of our world's forests.

Like all Keilhauer products, the Buncha collection is built with the highest quality materials and manufactured to last. The collection is also designed to ensure the highest recovery of materials, meaning the products can be disassembled and recycled with ease to support the conservation of natural resources, save energy and contribute to a sustainable economy.
