

DALLY

KEILHAUER

85000

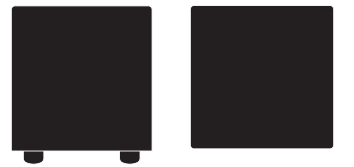

Dally ottoman upholstered
in California, Flagstone.

A beautiful yet reliable office staple, the Dally is an iconic cube-shaped ottoman that seamlessly combines function and thoughtful design. At the same height as a side chair, the Dally features premium saddle stitching and four rounded feet that make it perfect for moving from one space to the next.

The Dally ottoman is officially certified as a Carbonfree® product by Carbonfund.org. Keilhauer achieved this status by eliminating as much of Dally's environmental impact as possible throughout its design, through sustainably-sourced materials and responsible manufacturing practices. From there, Dally went through third-party Life Cycle Assessments to calculate and reduce the ottoman's carbon impact.

Once complete, Keilhauer eliminates any remaining carbon by investing in third-party offset programs. Design activists since 1981, Keilhauer firmly believes in harmoniously looking after our people through our products, continuously prioritizing innovative design that sustains.
