COMFORT WITHOUT COMPLICATION

Sleek, versatile, and lightweight, the Foryu office chair simplifies seating while elevating comfort. Its innovative self-weighted mechanism is seamlessly integrated into its design, adapting according to body weight to find every user's comfort zone.

96010QS

White mid back office chair with self-weighted mechanism and nylon base.

SELF-WEIGHTED RECLINE

Lean back, and relax. The Foryu's innovative design automatically adjusts to the user's body weight to offer the ideal angle for reclining for everyone, in any work environment.

with self-weighted mechanism
and nylon base.

INTELLIGENT CROSSBAR MECHANISM

With comfort engineered by design, the Foryu replaces the metal springs featured in most traditional office chairs with a patented intelligent crossbar. Instead of springs that always try to return the user from recline to an upright position, the Foryu's lower crossbar acts as a torsional force that enables users to find and maintain their most comfortable sitting position. Take a seat and it automatically calibrates and it conforms to the body, ensuring comfort across a complete range of motion – no manual adjustment needed.

with self-weighted mechanism
and nylon base.

TWO DIFFERENT CONTOURED BACKREST OPTIONS

Distinctive and lightweight, the Foryu's uniquely contoured backrest is designed for ergonomic support and allows invigorating airflow to keep users comfortable and cool. Foryu is also available with a sleek upholstered back option for enhanced comfort and style.
