

VAGABOND

KEILHAUER

Introducing the world's first carbon neutral ottoman: The Vagabond. Designed by Andrew Jones, Vagabond's whimsical shape and sophisticated design make it a versatile ottoman that is a staple for every office - equally as beautiful as it is functional. Boasting a reinforced black leather handle and a durable HDPE bottom, you can count on the Vagabond to be the ultimate office traveler. Available in all Keilhauer textiles.

As a company, Keilhauer believes that good business prioritizes environmental sustainability. With this in mind, Keilhauer continues to expand their carbon neutral product offerings. The world's first carbon neutral ottoman, Vagabond is officially certified as Carbonfree® by Carbonfund.org. This ottoman was purposefully designed and crafted to eliminate as much of its environmental impact as possible, through sustainably-sourced materials and responsible manufacturing practices. From there, Vagabond went through third-party Life Cycle Assessments to calculate and reduce the ottoman's carbon impact. Keilhauer eliminates any remaining carbon by investing in third-party offset programs, ensuring that Vagabond is an office staple that everyone can feel good about.
