

# POLLACK

## CLEANING + MAINTENANCE FOR:

### Dash Around 2543 = WSBC

May be cleaned with 4:1 water to bleach solution.

## GENERAL CLEANING + MAINTENANCE FOR POLLACK FABRICS:

### General Maintenance

---

To prevent build up of dirt and dust particles, it is important to vacuum upholstered pieces often with a soft brush attachment. Regular rotation of loose cushions will equalize the wear and prolong the life of your fabric.

If pilling occurs, use a fabric shaver to easily remove.

### Fabric Cleaning Codes

---

The appropriate Cleaning Code for each fabric is listed on the pattern's specification page. For upholstered pieces, these codes apply only to the outer fabric covering.

S	Solvent-based cleaning agents only (water-free, dry cleaning).
W	Water-based cleaning agents only (solvent-free cleaners, shampoos or foams).
WS	Water-based cleaning agents should be used for water-based stains; use solvent cleaners (dry cleaning) for oil-based stains.
WBC	Can be cleaned with bleach, in addition to water-based agents. These fabrics will have specific recommendations on their specification page.
WSBC	Can be cleaned with bleach, in addition to water and solvent-based agents. These fabrics will have specific recommendations on their specification page.
X	Do not clean with water or solvent-based agents. Use only vacuuming and light brushing.

## GENERAL CLEANING + MAINTENANCE (CONTINUED ON PAGE 2):

### Spot Cleaning

---

- Immediately blot the affected area lightly with a clean, dry cloth.
- It is best to consult a professional home furnishings cleaning service, advising them of the type of stain and the fiber content of the fabric to be treated.
- Work in a well ventilated area, away from open flames.
- Always pre-test any recommended cleaning agent on a small, inconspicuous area of the fabric to make sure there are no problems with colorfastness, shrinkage or spotting.
- Do not apply any solvent directly to the stain; moisten a clean cloth with the solvent and gently blot the stain.
- Work from the outer edge of the stain to the center.
- Do not rub the stain; this could damage the fabric.
- Do not over-saturate the fabric; this could damage the upholstery's filling material.
- Allow the fabric to dry completely after testing.
- After cleaning, pile fabrics may need to be brushed with a non-metallic bristle brush to restore their appearance.

### Steaming / Ironing

---

Care should be taken to use the proper temperature settings for each fiber when steaming or ironing.

### Dry Cleaning

---

Dry cleaning is recommended for most fabrics, except where noted, and should be done at regular intervals by a reputable professional cleaner specializing in home furnishings. Always advise the dry cleaner of the fiber content of the fabric prior to any treatment.
