

# Learn2<sup>®</sup> Junior

*Adept, flexible and student-focused seating, scaled down for smaller learners*

With Learn2 Junior, the focus shifts to younger students. The smaller scale provides better comfort and easier movement so that a “little” can go a long way.

**Transform Learning Spaces** – Learn2 Junior seating can be moved wherever needed and arranged in any configuration imaginable. Mobile, adaptable Learn2 Junior facilitates individual work or small to large group teaming. It's an ideal solution for younger students within interactive learning spaces.

**Ergonomic Comfort** – A smaller size delivers greater comfort for younger learners. The Intellect Wave shell has curves in all the right places with a passive flexing back, making Learn2 Junior a comfortable learning tool. The dual-handed worksurface is fully adjustable (including belly room adjustment) for personalized comfort.
