Calida™ Lounge Chair, Stool & Occasional Table

January 2025

TECHNICAL SPECIFICATIONS

Upholstered Seat & Backrest

Upholstered Seat & Back - Lounge Chair & High Back Lounge Chair

Backrest foam is $1\frac{3}{16}$ " thick, is glued to a continuous curved Birch plywood structure, then upholstered using glue. Seat foam is $2\frac{1}{2}$ " thick, is glued to the seat structure, then upholstered using heat activated glue.

Upholstered Seat & Backrest - Stool

Foam is 2" thick single piece of polyurethane injection molded over a curved metal structure, then upholstered using heat activated glue.

Frames

Swivel Frame (with glides or casters)

Swivel frame bases are made of cast aluminum. A formed steel plate attaches to the underside of the seat using four fasteners. A metal support column connects the seat plate and the aluminum base, allowing for free rotation, utilizing a plastic bushing at the support column and base.

Swivel frame with casters includes an additional black, plastic cap covering the support column.

Swivel frames with glides and swivel frames with casters are geometrically different and not interchangeable without additional parts. Casters cannot be interchanged with felt glides or nylon glides and glides cannot be interchanged with casters on swivel frames.

Swivel Frame Finishes

Cast aluminum frames are either polished or finished with baked-on powder-coat paint in select KI standard finishes.

Wood Leg Frame

Plywood frame legs are made of $1\frac{3}{16}$ " Birch plywood and are finished with a poly-based clear coated or stained in select KI colors to customer specification then clear coated. See Product Color Options in the Calida Lounge Furniture Pricelist. A steel plate connects to the chair and is welded to curved metal wire, which is then inserted, glued and fastened to the plywood legs.

Sled Base Frame

Frame is formed from a $\frac{5}{8}$ " square steel tubing and welded. Frames are finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint in select KI colors to customer specification. See Product Color Options in the Calida Lounge Furniture Pricelist. Sled bases come equipped with nylon glides. Sled base chairs do not stack.

4-Leg Stool Frame

4-Leg Stool frames are available in 24" and 30" seat heights. Frames are made from 25 mm thick tubular steel with a reinforcing footring made of 12 mm steel wire welded to the tubular frame. Frames are finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat paint in select KI colors to customer specification. See Product Color Options in the Calida Lounge Furniture Pricelist. Stool frames come equipped with either nylon or felt glides. Stools do not stack.

Glides

Swivel frame option is available with white felt glides or black nylon glides. Wood frame option includes black nylon glides. Stool is available with either black nylon or black felt glides. Sled base frame option includes black nylon glides.

Casters

Swivel frame option is available with 50 mm hooded casters. Casters are always soft-wheeled (for hard floors), are field-replaceable and only available in Black.

TECHNICAL SPECIFICATIONS

Table Frame

Plywood frame legs are made of $1\frac{3}{16}$ " Birch plywood and are finished with a poly-based clear coated, or stained in select KI colors to customer specification then clear coated. See Product Color Options in the Calida Lounge Furniture Pricelist. A steel plate connects to the table underside and is welded to curved metal wire, which is then inserted, glued and fastened to the plywood legs.

Table Surface

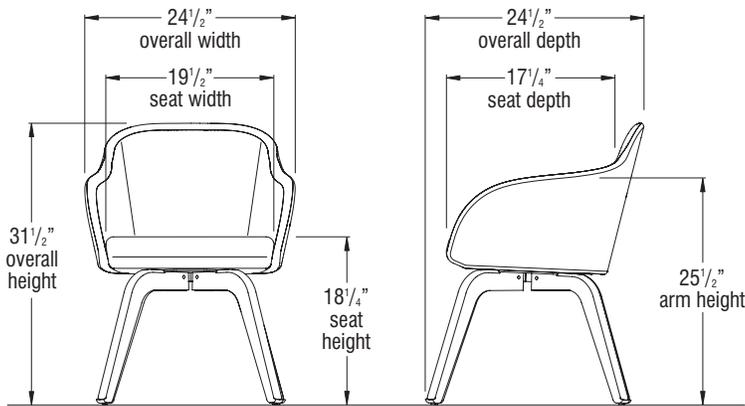

Tables are offered in $\frac{3}{4}$ " thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Total thickness of top is $\frac{7}{8}$ ". Tops are available with a 2 mm (73P) edge.

Compliance

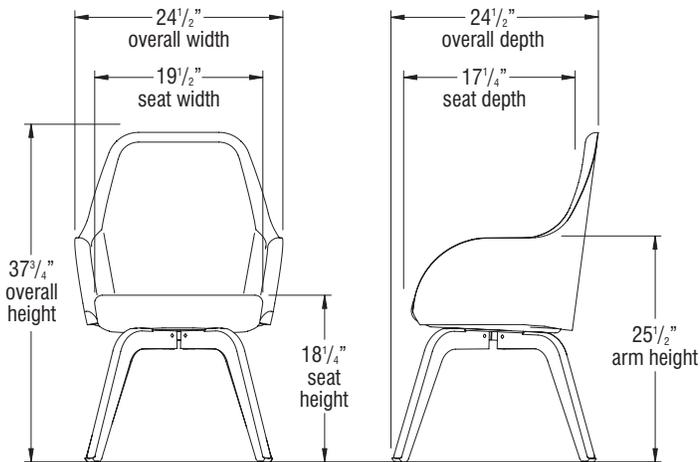

Seating passes BIFMA X5.4-2012 and KI's internal standard testing for 300-pound capacity.
