PILLAR TABLE

Pillar is not only defined by its simple post leg, but by the variety of top shapes that can be combined into endless configurations. Below are configurations demonstrating how just 2-4 tables can form an inspiring space.

Duplicate the same table top shape to create "pods" or groupings of tables for creative workstations, touchdown spaces or collaborative areas.

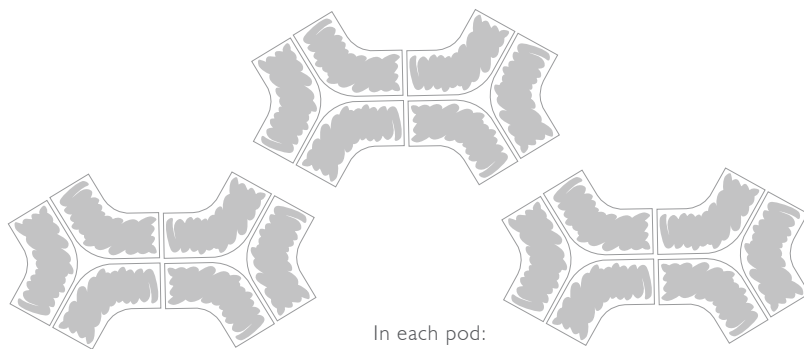

In each pod:
(4) Reduction (30"Dx60"Lx24"D)
(4) Reduction (24"Dx60"Lx30"D)

Reduction tables can create pods for long term or quick touchdown workspaces. The angled edge reduces direct eye contact across the table allowing fewer distractions and more privacy.

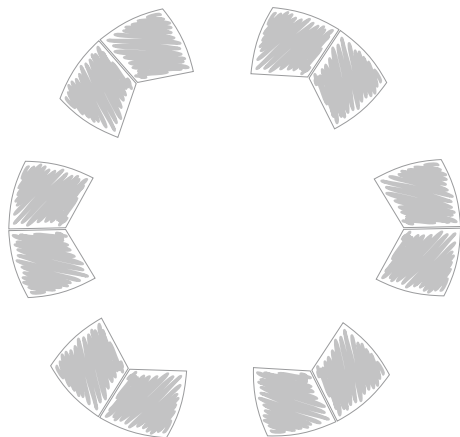

(6) 120 (30"D)

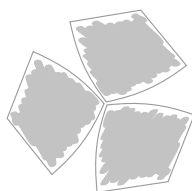

In each pod:
(6) 120 (30"D)

120 tables can be individual workspaces - or can be shared with one or two others, depending on the size of table.

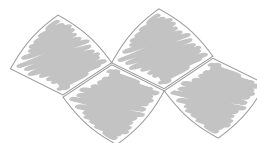

(12) Diamond (30"D)

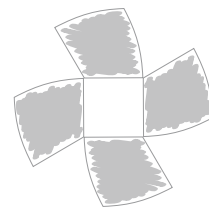

Diamond tables are able to reconfigure for a single user, a small group, or a "Theatre in the Round" arrangement for presentations or lessons.

(3) Diamond (36"D)

Mix and match table top shapes to expand Pillar's versatility in any application.

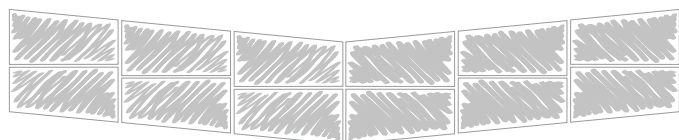

Provide a place to gather, an area to create, or a spot to focus.
