Ordering Customer's Own Material (C.O.M.) Upholstery
Information

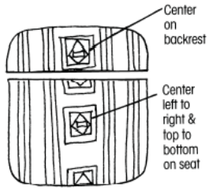
Ordering Customer's Own Material (C.O.M.) Upholstery
Information

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor's website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

Diagram A



When directional or patterned fabrics are used, they often require more yardage than solid colors.

C.O.M. must be supplied in continuous yardage.

C.O.M. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer's upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled with the KI product order number and customer purchase order number.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer's responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order.

Copyright/Logo/Trademark Release Form

(Intellectual Property)

I, _____, am the owner of the entire rights, title, and interests in the Intellectual Property identified in “Exhibit A” attached and grant Krueger International, Inc. (“KI”) the right to use and display Intellectual Property on products produced and manufactured by KI.

I warrant and represent that I am the owner of the Intellectual Property in Exhibit A and have the necessary legal rights and permissions to use said materials and/or convey their use to others.

I agree that I will not infringe or violate the Intellectual Property Rights of any party. I agree to indemnify, defend, and hold KI harmless against any claims, actions, judgements, losses, and/or damages (including, but not limited to, reasonable attorney’s fees) which may arise from any claims by any third party of an alleged or actual infringement out of the use and display of Intellectual Property on products.

I warrant I am of full legal age and have a right to contract in my name for the attached Intellectual Property. I have read the above authorization and release, before its execution, and I am familiar with the contents thereof. This authorization and release shall be binding upon me, my heirs, legal representatives, and/or assignees.

PRODUCT SPECIFICATIONS

600 Series Folding Chair

March 2023

TECHNICAL SPECIFICATIONS

The KI 600 Series Folding Chairs deliver optimum quality at a minimum price.
- KI Model 601 - no upholstery
- KI Model 604 - upholstered seat and backrest

600 Series Frames
Frames are electrically seam-welded 19-gauge, $^{7}/_{8}$" O.D. tubular steel. The two leg braces are 19-gauge, $^{5}/_{8}$" O.D. tubular steel.

Steel Backrests
Backrests are 7$^{1}/_{2}$" deep, pitched for proper posture support. Panel is curved 24-gauge cold-rolled steel with fully curled edge and spot-welded to frame.

604 Upholstered Backrest
Vinyl or fabric upholstered backrest panel of $^{1}/_{2}$" polyfoam is stapled to plastic base. Attached to backrest by rivets. Backrests are not field replacable.

601 Steel Seat
One piece 21-gauge cold-rolled drawn and shaped steel. Seat pivots on $^{1}/_{4}$" tempered steel rivets.

604 Upholstered Seats
20-gauge recessed steel seat pan. 1.25" polyfoam stapled to hardboard panel attached by rivets. Upholstered Seats are not field replaceable.

Feet
Replaceable non-marring linear polypropylene.

Frame Finish
Chair frames are finished with baked-on, electrostatically-applied epoxy powder-coat paint.

Industrial Adjustable Stools
Technical Specifications

PRODUCT SPECIFICATIONS

600 Series® Industrial Stool

March 2024

TECHNICAL SPECIFICATIONS

Frames

Two leg sections of 18-gauge, 7/8" O.D. seam-welded tubular steel are crossed and welded together. The foot ring and leg frame are welded into a single unit. Foot rings are 18-gauge, 5/8" O.D. and are shaped for an enlarged weld area at point of contact with leg. Equipped with replaceable polyethylene feet.

Seats

Steel Seats
Constructed of 20-gauge die-formed steel pan with fully curled edges for strength and safety, 14" in diameter. Tempered hardboard Masonite inset riveted into seat recess.

Upholstered Seats
Constructed of 20-gauge die-formed steel pan, 14" in diameter. Replaceable 5/8" foam pad mounted to hardboard, fastened into seat recess with mechanical fasteners. Seats are upholstered in vinyl.

Wood Seats
Wood seats are 14" in diameter, 1 1/4" hardwood (Rubberwood) with clear lacquer finish. Wood seats are attached to stool with screws.

Polypropylene Stool Seats
Polypropylene seats are injection-molded thermoplastic with integral rib construction for strength, 13" in diameter. Color permeates throughout the seat. White marks may occur at four spots on the front edge of seat but does not alter the structural integrity of the stool.

Base Spreads

18" high stools have a 14" base spread.
24" high stools have a 15 1/4" base spread.
30" high stools have a 15 1/2" base spread.

Glides

Glides are available on fixed-height or adjustable-height stools.

Frame Finish

Stool frames are finished with baked-on, electrostatically-applied epoxy powder-coat paint.

SPECIFICATIONS

The capacity listed in the above chart is for non-tablet arm chairs. Tablet arm chairs require double the space. Replacement feet and bumpers are available.

KV Series Vertical Storage Caddy

One-piece bed of 16-gauge steel with sides channeled to 1-1/2" high. To each end, a 4-1/2" x 1-1/2" angle steel member is electrically welded. To each outside corner of the bed is welded a 14-gauge, 1-1/4" o.d. end post socket to support removable 1-1/8" o.d., 18-gauge end posts. Loading stops are stamped into the bed. 4" high x 1-1/4" wide roller-bearing wheels.

Optional adjustable end post sockets are constructed of welded steel. Sockets and removable end post are positioned against partial loads to eliminate load from shifting.

KH Series Horizontal Storage Caddy

One-piece bed of 16-gauge steel with sides channeled to 1-1/2" high. Side rails are fitted into sockets welded to end posts. Distance between side rails is equal to folded height of chairs from top to bottom crossbrace for snug storage. 4" high x 1-1/4" wide roller-bearing wheels.

KDT84 Caddy

Legs, uprights and crossbrace are fabricated of 11-gauge, 1" x 2" tubular steel. Legs are welded to uprights; crossbraces are bolted. Open tubing ends are covered with plastic end caps. Chair suspension tines of 14-gauge, 1" o.d. round tubing. 5" high x 1-3/8" wide roller bearing wheels.
