CRANK TABLE

General

The table shall consist of two adjustable height T bases (centered column on a horizontal foot) attached to a worksurface support that spans the two bases and supports a worksurface. The top of the worksurface shall adjust between 27.11” and 44.83” from the floor by means of a horizontal crank that can be located at either end of the table. Adjusts at a rate of 6-1/3 turns per inch. A ¾” diameter steel connecting rod shall span from column to column to enable simultaneous adjustment of both columns.

Base

The base shall consist of a column assembly and foot both finished with baked on 30 sheen powder coat paint. The column assembly shall consist of an outer member and an inner member. The outer member shall be 2-3/4” square 14-gauge steel tubing with a ¼” steel plate welded on the bottom end. The inner member shall be 2-1/2” square 14 gauge steel tubing with a ¼” steel plate welded on the top end. The foot shall consist of two formed and welded 11-gauge steel components. The foot shall be attached to the column with 8mm bolts. Two 1-1/2" diameter nylon base leveling glides shall be threaded into the foot.

Worksurface Support

The worksurface support shall be formed 11-gauge steel support members with ¼” steel attachment plates. The worksurface support shall be attached to the column with 8mm bolts.

Worksurface

Worksurfaces shall be constructed with 1-1/8” thick 45 lb. density particle board core. The top surface shall be covered with high-pressure laminate. The bottom surface shall be covered with a phenolic backing sheet. The perimeter shall be finished using high impact plastic edging. The worksurface shall be pre-drilled and attached to the bases using (16) #12 X 1” tapping screws. All Knife (KN) edge styles will use an M3 particle board composition. The undersurface edge is sanded, stained and sealed. Knife (KN) edge and Postformed (PL) edge options will only get these edges on the user side of the table.
