How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

When directional or patterned fabrics are used, they often require more yardage than solid colors.

C.O.M. must be supplied in continuous yardage.

C.O.M. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled with the KI product order number and customer purchase order number.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order.

PRODUCT SPECIFICATIONS

Passel Desking System

Adjustable-Height Tables

December 2024

TECHNICAL SPECIFICATIONS

General

The table consists of a top with two adjustable height T-Leg or C-Leg bases. T-Leg columns are centered on a horizontal foot and C-Leg columns are offset two-thirds of the distance to the back of the horizontal foot. Bases are attached to a dual stringer worksurface cross bar support that spans the two bases and supports either a 1 1/4" or a 3/4" thick tabletop. The top of the worksurface adjusts in height between 22⁵/₁₆" and 48⁷/₁₆" on tables with 3/4" thick worksurfaces and 22¹¹/₁₆" and 48¹³/₁₆" on tables with 1 1/4" thick worksurfaces by means of electric two button control switch with up and down arrow indicators.

Base

The T-Leg or C-Leg base consists of a column assembly and foot, both finished with powder-coat paint. Column assembly consists of an outer member, an intermediate member, and an inner member. The lower outer member is 3 1/4" x 2" rectangular, 16-gauge steel tubing with a 1/4" thick steel plate welded inside the bottom end. The intermediate member is 3" x 1 3/4" rectangular, 16-gauge steel tubing. The top inner member is 2 3/4" x 1 1/2" rectangular, 16-gauge steel tubing with a 7 1/2" x 3 3/4" rectangular 11-gauge formed steel motor housing welded to the top end. The foot consists of two formed and welded 12-gauge steel components and is attached to the column with four 6 mm bolts. Two 1 3/4" diameter nylon base leveling glides with 3/8" of adjustability are threaded into each end of the foot.

Worksurface Support

The worksurface support is constructed using two formed 2.5 mm steel brackets that surround the motor housing at the top of each leg column. The bracket is secured to the housing using four 6 mm bolts. Four 1.5 mm J-Shaped cross members are included and can be adjusted based on worksurface width. When connected, the four channels create two full length cross members that attach to each leg bracket for stability.

Worksurfaces

Worksurfaces are available in two standard thickness, 3/4" or 1 1/4" overall thickness. Worksurfaces are constructed of 3/4" or 1 1/8" thick 45 lb density particleboard core. The top surface is covered with .030" high-pressure laminate and the bottom surface is covered with a phenolic backing. The perimeter is finished using high-impact plastic edging. The worksurface is pre-drilled and attached to the bases using twenty-four 5 mm tapping screws.

Cable Tray

The cable tray is an optional accessory which must be ordered separately. Constructed of 16-gauge sheet metal finished with a powder-coat paint which may be coordinated to match the color of the table base. Screws are provided for attachment to the underside of the worksurface, and tops are pre-drilled for cable tray attachment in predetermined locations based on worksurface size and base style. Trays provide open access from the front, user side to easily feed wires, route cables, place modules or power strips and/or install cable management systems.

TECHNICAL SPECIFICATIONS

Privacy Screens

Felt privacy screens are an optional accessory that must be ordered separately. They are constructed from a 1/4" thick sound-absorbing, 100% polyester felt. The panels have a density of 0.5 lb/ft2 and are sound absorbing tested to ASTM C423 with an NRC rating of .44 when using no air gap (A Mount testing method) and an NRC rating of .81 with 2" air gap. The polyester felt is in accordance with ASTM-E84 and achieve a Class A Flame Spread.

Fabric privacy screens are constructed from a 7/16" thick, 7.7 lb/ft ^ 3 fiberglass board that is wrapped in a fabric cover. Fabric styles come in any approved KI fabric, which is glued to both sides of the core. Standard sizes for privacy screens are 23 1/2" or 29 1/2" tall and 1⁵/₁₆" longer than the work surface edge it is mounted to.

Screens are secured to two or three 11-gauge steel formed brackets using two #10-32 knurled thumb screws per bracket.

Deluxe Control Pad

The Deluxe Control Pad is an optional accessory that includes three programable memory buttons for saved height settings, an LED display that lets users read the tables overall height, and a variable speed function.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note:

- The ☐ indicates that a choice is required.
- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are avail-able.

HOW TO BUILD A MODEL NUMBER

- A**Select basic model.
- B**Select edge color.
Refer to the **Product Color Options** page in this price list.
- C**Select surface finish.
Refer to the **Product Color Options** page in this price list.
- D**Select base finish color.

SPECIAL SERVICES

Special Carton Marking

With specially marked information N/C

Shipping
Ships **knocked down, FOB Bonduel, WI 54107, freight prepaid.**
