Specifications Form
January 2023

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied. RAILROADED FABRIC REQUIRES A PRODUCT MODIFICATION REQUEST DUE TO ADDITIONAL YARDAGE REQUIREMENTS

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54” wide. Fabrics less than 54” wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

C.O.M. INCREASE MATRIX (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7” REPEAT	8”–13” REPEAT	14”-21” REPEAT	22”-27” REPEAT	28”-33” REPEAT	34”-40” REPEAT	41”-48” REPEAT
54”	0	20%	25%	30%	45%	55%	70%	80%
51”-53”	15%	25%	30%	35%	50%	60%	80%	90%
48”-50”	20%	30%	35%	40%	55%	65%	85%	95%
45”-47”	30%	45%	50%	55%	60%	80%	90%	100%
36”-44”	50%	65%	70%	75%	80%	100%	110%	120%

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10” vertical with 14” horizontal would be 14+5=19.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M.

Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

Interior Frame Construction

The interior frame is constructed of ³/₄" thick hardwood plywood. The back is made from ¹/₂" thick molded or laminated hardwood veneers. All components are CNC-machined (computer numerical control) to maintain accuracy of part dimensions and to ensure that all connection joints are engineered to interlink with other hardwood plywood components. All joints are glued with polyvinyl acetate adhesive and further secured with staples and wood screws.

Seat Construction

The seat utilizes upholstery straps that are affixed to the machined frames. The seat cushion is ³/₄" thick and comprised of high-resilience polyurethane foam.

Backrest & Arm Construction

The inside backrest of the lounge unit utilizes a high-resilience polyurethane foam that provides the contour of the inside backrest as well as supporting product comfort. The outside portion of the unit utilizes polyurethane foam to maintain a smooth consistent shape around the perimeter. Arms are an extension of the back construction.

Upholstery

Upholstery is available in non-contrasting, or contrasting upholstery options on all models. A variety of KI ingrades, Pallas and customer ordered materials/KI ordered materials (COM/KOM) have been approved for use on the Sonrisa product line. All seams are reinforced with double-needle stitching. Stitching may be coordinated with the upholstery or color contrasted; 16 thread colors available.

Base Options

Four base options are available: Black poly feet with adjustable glides, black casters, black poly feet with adjustable glides with tilt-back activated rollers (only available on loveseats and lounge chairs), and swivel base (only available on lounge chairs).

Casters

Casters are 2" high and use 1 ¹/₂" diameter dual soft swivel wheels with a 150 lb weight rating per caster. Casters are Black in color, with four casters per lounge chair and ottoman or six per loveseat and bench. Casters are secured to the underside of the lounge frame using four #10 x 1" Phillips pan head screws.

Poly Feet

Poly feet are 2" high and contain an adjustable glide. Poly feet contain a ⁵/₁₆-18 x 1 ¹/₂" set screw, which twists into a threaded insert in the lounge frame to secure. Poly feet are Black in color with four feet per lounge chair and ottoman, or six per loveseat and bench. The adjustable-height glide bottom pad is of natural color poly, is impact resistant and threads into the nylon foot with a ¹/₄-20 threaded stem having ⁷/₈" of leveling adjustability.

Rollers

Roller housing is of molded polypropylene, with a semi-tubular rivet axle for the 1.57" diameter fixed wheel. Wheel is rubber with sealed ball bearings. Roller housing mounts to the underside of a chair or loveseat backrest frame using one #12 x 1" Phillips pan head screw into the underside and two #14 x 1 ¹/₄" Phillips pan head screws into the backrest of the lounge or loveseat. Rollers are black in color, are tilt-back activated and add 1 ³/₄" overall depth to bottom rear of chair or loveseat.

Swivel Base

The swivel base is all steel, consisting of 14-gauge round tubing, 14-gauge rectangular tubing, and two 11-gauge stamped steel plates. Steel roller bearings are used for smooth rotation. The ring base is a welded assembly while the swivel plate is bolted together. Swivel base is 2" high, is 22" in diameter and is Black in color. Allows for 360 degrees of swivel, no return.

Sonrisa Occasional Tables

Tabletops

All tabletops are $\frac{3}{4}$ " nominal overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in $\frac{3}{4}$ " thick tops is 45 lb/cu ft particleboard, M3 grade. All tops have a 2 mm bonded edge band for tamper and moisture resistance (73P).

Legs

Legs come in two variations, 16" and 21" fixed-height. The legs are constructed of $\frac{7}{16}$ " diameter formed steel wire. Legs are powder coat-painted in colors found in the Sonrisa Lounge Furniture Pricelist, on the Product Color Options page.

Glides

Glides are optional for all tables. The glides are Black, non-marking nylon. They attach to the bottom of the leg and are secured with a locking flat head machine screw. Glides add $\frac{5}{16}$ " to the overall height of the table.

- D

Select edge color.

Refer to the **Product Color Options** page in this price list.
- E

Select base finish.

Refer to the **Product Color Options** page in this price list.

FINISH INFORMATION

ADDITIONAL LAMINATE OFFERING

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturers name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested thru the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

MODEL		MODEL NUMBER			Approx. Packaged Weight	Delivered Pricing	Laminate Grade 2 add to list price	Laminate Grade 3 add to list price
