

# Connection Zone®

## Metal- and Wood-Leg Benching

*Shifting from ME to WE spaces to connect people and ideas*

**Efficient and simple** - Connection Zone benching maximizes the square footage of a workspace. Its universal design supports the focused work of an individual, serves as a touch-down space for a temporary user, and facilitates the collaborative process of a group.

**Defining personal space** - optional privacy screens, dividers and modesty panels let users define personal space and establish a higher degree of privacy while maintaining open, collaborative environments.

### Options:

Metal-leg benching: single- or dual-sided, in 29" or 42" heights  
Wood-leg benching: dual-sided only in 29" height  
Café-height teaming tables: double modesty panels  
Worksurfaces and frames are ordered separately.
