

# Vertical Cable Manager

*Cable manager designed to organize power cords in static and adjustable tables.*

**Easy to assemble on any worksurface** - Attach bracket to underside of worksurface with screws. Or if using a trough on Toggle or WorkUp, simply attach the cable snake to the trough - no tools required.

**Customizable height** - simply add or remove plastic links as needed to create a customized length. Then feed the cord(s) through the snake to the weighted floor plate for a well-managed cord.

## Specifications:

Each kit includes 63 plastic links, a top connector, two screws, a three-link magnetic piece and one base plate.

Color: Silver

Cable manager with no base attached to leg with three-link magnetic piece

Free hanging cable manager with base
