

Assembly Instructions

RoomScape® Ladder

July 2005

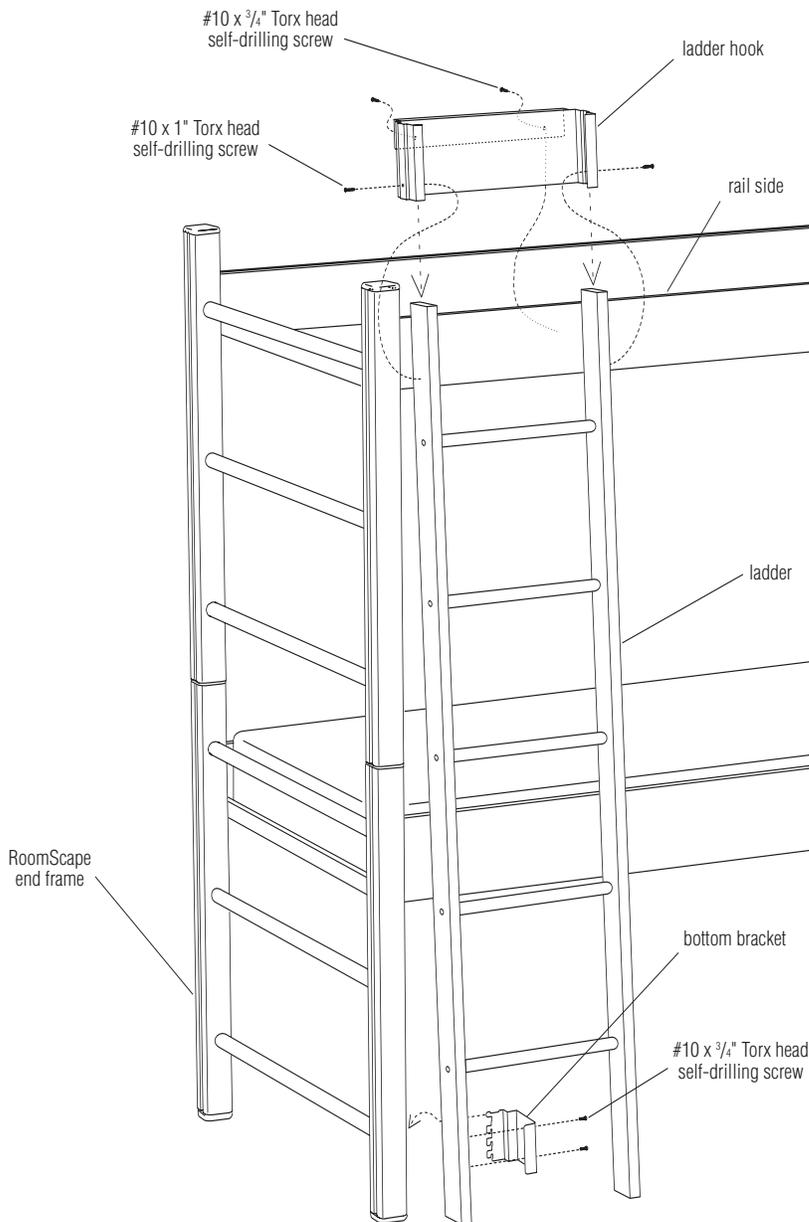

Figure 1

1. Begin installation by leaning the ladder against the upper bunk rail at the location where it is to be installed. Position the ladder hook over the ladder as illustrated. Slide the ladder hook onto the ladder and hook the back tab of the ladder hook onto the bed rail. **Do not secure ladder hook to ladder or side rail at this time** (Figure 1).
2. Position the bottom bracket as illustrated. Capture the lower end of the ladder leg with the bracket and hook the teeth of the bracket into the slot in the end frame close to the floor. Press down to secure bracket to end frame. Using a power driver route two #10 x 3/4" Torx head self-drilling screws through the two mounting holes and bore them into the ladder (Figure 1).
3. Using a power driver and two #10 x 3/4" Torx head self-drilling screws, secure the back tab of the ladder hook to the interior of the side rail through the pre-drilled mounting holes in the back tab (Figure 1).
4. Lastly, secure the upper ladder hook to the ladder by using a power driver and two #10 x 1" Torx head self-drilling screws. Route the screws through the mounting holes on each side of the ladder hook and bore the screws into the ladder (Figure 1).
