Trellis® Power Distribution System

Trellis establishes the framework for modern, dynamic workplaces. A simple, adaptive system, Trellis delivers power and data seamlessly to any freestanding table or desking solution. It provides structure to environments that frequently flex based on user preferences.

From collaborative lounge areas and interactive learning environments to open-plan workspaces with height-adjustable worksurfaces, Trellis supports a variety of flexible configurations. Trellis accommodates varying levels of user density quickly and efficiently. Its simple design supports straight run, 90-degree and 120-degree configurations. Chase widths range from 24" to 72" with heights of 24" and 30".

Trellis' simplicity lies within its light weight design and uncomplicated kit of parts. The system is easily installed and reconfigured with minimal tools, labor and cost. Cables and wiring are conveniently managed and may be removed as needed. Trellis installs and disassembles quickly without damaging flooring or interior walls. Trellis can be powered by 10-wire or Activ8® system.

Reduce the complexity of space planning and support a range of work styles with Trellis.

A simple infeed distributes power throughout the system

Top cap is removed to reveal access to wire management components

Power receptacles provide convenient access to power

Choose from several chase widths and heights
