

# UNIVERSAL SCREENS

## PRIVACY FOR ANY APPLICATION

Universal Screens are designed to provide various levels of privacy in open environments.

With fixed and height-adjustable options, Universal Screens offer a solution for any application.

When the goal is to provide a semi-permanent solution for privacy in open planning, fixed screens are the perfect solution. If an environment requires a mix of privacy and collaboration, height-adjustable screens will allow for both options. With a simple push or pull, screens seamlessly and quietly raise or lower to the desired level to create a distinct, private space or an inviting, collaborative space.

## UNIVERSAL SCREENS STATEMENT OF LINE

Fixed and adjustable height Universal Screens are offered in multiple sizes in polyester felt or fabric with a range of colors. Brackets can be painted in any standard powdercoat color to further enhance the overall design. Both felt and fabric are naturally sound dampening and tackable surfaces.
