

Directions for changing out Vertebra channel

A small shoulder socket $\frac{1}{4}$ " x 1- $\frac{1}{4}$ " tool will be provided by KI upon request. This tool is necessary to remove the seat pins.

1. Pop off the bellows at the seat and back.
2. Remove the 4 screws on the back, 2 on each side.
3. Remove the 2 existing seat pins with the special shoulder socket.
4. Lift the seat off the channel.
5. Reassemble on the new channel.
6. Channel only part #87-7071-EP-Color
