How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written spec ifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54” wide. Fabrics less than 54” wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

C.O.M. INCREASE MATRIX (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7” REPEAT	8”–13” REPEAT	14”–21” REPEAT	22”–27” REPEAT	28”–33” REPEAT	34”–40” REPEAT	41”–48” REPEAT

36”–44”	50%	65%	70%	75%	80%	100%	110%	120%

Diagram A

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10” vertical with 14” horizontal would be 14+5=19.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M.

Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

UPHOLSTERY INFORMATION

C.O.M. Fabric
For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yeild as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can delay an order. For each roll that is sent, one yard needs to be added to one of the rolls, not separately.

Fabric Disclaimer
Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

Frame Construction - Frames and Arms

Frames and Arms are constructed of 6/4 lumber kiln dried to a moisture content of six to eight percent and laminated hardwood plywood ¾" in thickness. All mainframe joints are doweled or interlocked and glued. Stress points are further reinforced with the use of glued and screwed corner blocks.

Suspension - Seat and Back

The seat and back are sprung with stretch webbing stapled into position and covered with a layer of FLW (reinforced non-woven fiber sheet)

Foam Specifications

Seats and Backs

Tight seats and backs are filled with a layer of 4" polyurethane foam with a density of 2.5 and a compression of 35 pounds. This foam is covered with a layer of ¼" super soft foam.

Arms

Arm tops are 1 ½" thick polyurethane foam with a density of 4.6 and compression of 150 lb. ¼" polyurethane foam is around the entire arm and has a 1.5 density and 45 pound compression.

Other Surfaces

Other top surfaces are 1 ½" thick polyurethane foam with a density of 4.6 and compression of 150 lb. ¼" polyurethane foam covers these surfaces with a 1.5 density and 45 pound compression.

Optional Cup Holder

Cup holder is made of machined aluminum, finished with a clear anodized protective coating. It has an inside diameter of 2¾" and a 1 ½" depth. Outside diameter is 3" with a 3¾" diameter top rim.

Optional Ganger

UL HB rated nylon hooks and glass filled nylon pegs are mounted to 14-gauge steel plates with thread locking screws and steel inserts. The ganging plate assemblies are mounted to the wood frame using #10 x 1 ½" wood screws. Gangers are limited to No Arm or Low Arm side-to-side ganging only.

Base Construction

Sled bases are 1" O.D. by 16-gauge round steel tubing welded to a 14-gauge steel mounting plate. Bases are secured to the lounge frame with #10 x 1 ½" steel pan head wood screws. Chrome is an optional finish. Powder-coat paint is standard. Optional black plastic nylon glides can be added to all sled base units.

Post legs are solid machined aluminum, bolted to a 10-gauge steel plate. Post legs are then secured to the lounge frame with #10 x 1 ½" steel pan head wood screws. The aluminum leg posts have a polished aluminum finish. Friction-fit, clear plastic glides come standard on all post leg units.

Work Arm Tablet

The work arm functional tablet is constructed with a 15 mm thick Baltic Birch plywood core, with a .030" thick phenolic paper backer. The edges are shaped, sanded and coated with a clear lacquer finish. The top surface is .040" thick high pressure laminate, available in standard KI color and pattern choices. See Color Addendum for details. The work arm tablet is field-replaceable.

Optional AC Power & USB Charger (available on Work Arm, High Arm, Low Arm)

The optional USB/AC power module houses one 15-amp, 125 volt AC simplex receptacle with one 2.1-amp, 5 volt DC USB Type A and one Type C port (2.0 and 3.0 compatible, no data). Power module provides device charging and direct AC power. The module's aluminum housing contains the power & USB circuitry. The 54" exposed power cord is 14 AWG, 15-amp NEMA rated, three-conductor SJT, with a three-prong grounded plug. The power cord is strain-relief mounted to the rear of the module's aluminum housing and as it exits the lounge.

The entire electrical power and USB module is UL listed and passes UL spill test rating for protection against liquids. Both USB ports can power and charge two separate mobile devices simultaneously. The power module's optional faceplate/power & USB color combinations are: black/black, white/white and silver/white. Faceplates are finished with powder-coat paint.

Model/Family Numbers

* Table Families - MYTB

Base Construction

Table bases are ¾" O.D. 16-gauge round steel tubing, welded to a 12-gauge steel spider. The legs are fastened to the tabletop with #10 x ¾" long wood screws. The bases are finished in either chrome plating or baked-on electrostatically-applied powder-coat paint. Powder-coat paint is available in standard KI paint colors. See Color Addendum.

Tabletop Construction

Tabletops consist of .035" thick plastic laminate top surface glued over 45 lb density particle board. A 1/32" phenolic backer is laminated on the underside for balanced laminate construction and helps prevent moisture absorption in the core material. Finished tabletop thickness is 1 ¼". The table edge band is 2 mm polypropylene (74P) and is available in a variety of colors. Laminate colors are per KI Color Addendum.

Floor Glides

Floor glides are natural nylon, friction-fitted into the steel tube frame.

MyWay's Optional Power Locations

*Power can be specified on either the left-facing side, or the right-facing side of MyWay Lounge chairs. (Left-facing side power shown in images above)
