Information

How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M. Testing

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

KI Manitowoc
1400 South 41st Street
Manitowoc, WI 54220
Attn: Fabric Testing

C.O.M. Production

Customer's fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer's own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

C.O.M. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

Yardage Specification

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

1 to 50 yards — Add 5 yards
50 + yards — Add 10% over requirements

In all instances, send this form to the C.O.M. Specialist.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard laminate finish is the supplier's recommended finish for that color/pattern. Note: Nonstandard laminates from these suppliers (example: textured laminates) require a Product Modification Request. Contact customer service for details.

FINISH INFORMATION

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

FINISH INFORMATION

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer’s name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

SPECIFICATIONS

Cabinet Construction

The overhead cabinet shall be assembled complete and powder-coated in widths of 30", 36", 42", 48", 54" and 60". The overall dimensions of the end panels shall be 17" high and 16-1/2" deep. The shelf depth shall be 13-1/2". Inside height shall allow for oversize binders, such as Folscap and A4, to be stored vertically. The cabinet top, bottom, and shelf shall be fabricated from 18-gauge steel. Side panels shall be fabricated from 14-gauge steel and attached via resistance welding. Cabinet top, bottom, and shelf shall contain reinforcements fabricated from 18-gauge steel and attached via resistance welding. Pins for door and shroud attachment shall be fabricated from 3/8" diameter steel and attached via resistance welding. Shroud will be black only. All accessible or visible edges shall be smooth and rounded.

Door Construction

The upper door shall be available in colored or translucent extruded rigid polypropylene with spattercoat finish, fabric or laminate applied.

The overall door thickness shall be 3/8" with a .075 wall thickness. The door shall be capped with polycarbonate endcaps and attached to the case with polycarbonate arms. A center lock mechanism will be utilized between the upper and lower doors for security. The lower door shall be an aluminum extrusion with a powder-coat finish. The lower door shall have a .075 thickness and be ergonomic in design. The door shall be capped and attached to the case with polycarbonate arms.

Door Operation

The overhead cabinet doors shall be effortlessly operated from either a seated or standing position through use of the upper door or lower door. The upper door and lower door shall be synchronized in motion through the use of two 10-guage linkages. The doors shall be assisted with two extension springs and require less than 5 pounds of force to operate. Either door shall be opened or closed with a closed fist. The upper door shall open over the outside of case.

Cabinet Installation

The overhead cabinet shall include separate mounting brackets that allow for assembly to

panels or desk systems. The brackets shall be attached to the back of the overhead via a hook and groove system and two screw fasteners. The hook and groove system shall allow the installer to assemble brackets to a panel before attaching to overhead. The desk supports shall attach to the bottom of overhead via four screw fasteners.

Task Lights

Task lights shall be available which suspend from the underside of the cabinet. The task light shall mount flush with the underside of the overhead cabinet via two cantilever brackets. Task light shall be offered fully assembled in black only. The task light shall have an 8' long cord with three-prong grounded plug, and be available in three versions; standard high-power factor ballast, variable (high/low) high-power factor ballast, and electronic ballast. All three options shall include a cool white lamp. Chords shall be routed into and through wire trough located at rear underside of cabinet shelf. Installation and removal shall be accomplished without the use of tools or fasteners.

Shelf Dividers

Shelf dividers shall be powder-coated, 18-

gauge steel and offered in the same color as the overhead case. Installation and removal shall be accomplished without the use of tools or fasteners.

Tackboard/Tool Rail Mounting Bar

A powder-coated, 14-gauge bracket shall be available for the attachment of a hanging tool rail or tackboard to the underside of the overhead. The bracket shall be specified in the same widths as the overhead and is offered in the same colors as the overhead case.

Overhead Hanging Tackboard

Tackboards shall be available in 12" height and in 24", 30", 36", 42", 48", 54", and 60" widths. The tackboard shall be constructed of 3/4" industrial insulation board covered with fabric. The mounting brackets shall be steel powder-coated and attached to the coreboard with T-nuts and machine screws. Fabric shall be attached to the coreboard with staples. A mounting bracket bar is required to attach the tackboard to the overhead cabinet.

FINISH INFORMATION

Additional Laminate Offering
KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

FINISH INFORMATION

Additional Laminate Offering
KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.

FINISH INFORMATION

Additional Laminate Offering

KI offers laminates beyond those offered in the standard offering. Laminates that are currently available in the program can be viewed in KI product specification tools. Requests to add laminates to the program can be submitted via the product modification request process. Please note, requests to add laminates to the program must include the laminate manufacturer's name, color/pattern number, and finish code. Edge options are limited to standard edge colors. If a matching edge is required, this will need to be requested through the product modification request process and may be subject to additional costs. Due to varying manufacturing processes and quality issues with some laminates, some requests may be denied. Extended lead times and minimum order quantities may apply on orders containing special laminates. Contact the product modification team for questions or additional information regarding special laminates and pricing.
